

Contents

Introduction	1
Part I: Basic Mixer Theory	7
Noise Figure and Conversion Loss of the Schottky Barrier Mixer Diode, <i>M. R. Barber (IEEE Transactions on Microwave Theory and Techniques, November 1967)</i>	8
Down-Converters Using Schottky-Barrier Diodes, <i>C. A. Liechti (IEEE Transactions on Electron Devices, November 1970)</i>	15
Effects of the Diode Junction Capacitance on the Conversion Loss of Microwave Mixers, <i>L. Mania and G. B. Stracca (IEEE Transactions on Communications, September 1974)</i>	24
Conversion Loss Limitations on Schottky-Barrier Mixers, <i>M. McColl (IEEE Transactions on Microwave Theory and Techniques, January 1977)</i>	31
Influence of Mixer Diode Reactances on Noise Figure and Conversion Loss, <i>F. Günes, D. P. Howson, and K. J. Glover (IEE Journal on Microwave, Optics and Acoustics, January 1979)</i>	37
Shot-Noise in Resistive-Diode Mixers and the Attenuator Noise Model, <i>A. R. Kerr (IEEE Transactions on Microwave Theory and Techniques, February 1979)</i>	40
Fundamental Limits on Conversion Loss of Double Sideband Resistive Mixers, <i>A. J. Kelly (IEEE Transactions on Microwave Theory and Techniques, November 1977)</i>	46
Effect of Source Resistance in Microwave Broadband Balanced Mixers, <i>E. Korolkiewicz and B. L. J. Kulesza (IEE Journal on Microwave, Optics and Acoustics, November 1978)</i>	49
Influence of Diode Capacitance on Performance of Balanced Microwave Mixers, <i>E. Korolkiewicz and B. L. J. Kulesza (Electron Letters, February 5, 1981)</i>	54
Predicted Conversion Gain in Superconductor-Insulator-Superconductor Quasiparticle Mixers, <i>J. R. Tucker (Applied Physics Letters, March 15, 1980)</i>	56
Part II: Accurate Modeling and Computer-Aided Analysis of Schottky Diode Mixers	59
Nonlinear, Linear Analysis and Computer-Aided Design of Resistive Mixers, <i>S. Egami (IEEE Transactions on Microwave Theory and Techniques, March 1973)</i>	60
A Technique for Determining the Local Oscillator Waveforms in a Microwave Mixer, <i>A. R. Kerr (IEEE Transactions on Microwave Theory and Techniques, October 1975)</i>	66
Conversion Loss and Noise of Microwave and Millimeter-Wave Mixers: Part 1—Theory, <i>D. N. Held and A. R. Kerr (IEEE Transactions on Microwave Theory and Techniques, February 1978)</i>	70
Conversion Loss and Noise of Microwave and Millimeter-Wave Mixers: Part 2—Experiment, <i>D. N. Held and A. R. Kerr (IEEE Transactions on Microwave Theory and Techniques, February 1978)</i>	77
Nonlinear-Linear Analysis of Microwave Mixer with Any Number of Diodes, <i>M. T. Faber and W. K. Gwarek (IEEE Transactions on Microwave Theory and Techniques, November 1980)</i>	84
Numerical Analysis of Subharmonic Mixers Using Accurate and Approximate Models, <i>R. G. Hicks and P. J. Khan (IEEE Transactions on Microwave Theory and Techniques, December 1982)</i>	92
Inherent Signal Losses in Resistive-Diode Mixers, <i>M. E. Hines (IEEE Transactions on Microwave Theory and Techniques, April 1981)</i>	99
Part III: Practical Implementations of Image-Enhanced Mixers	111
X-Band Integrated Circuit Mixer with Reactively Terminated Image, <i>K. M. Johnson (IEEE Transactions on Microwave Theory and Techniques, July 1968)</i>	112
4-GHz Integrated-Circuit Mixer, <i>M. Katoh and Y. Akaiwa (IEEE Transactions on Microwave Theory and Techniques, July 1971)</i>	122
An Integrated-Circuit Balanced Mixer, Image and Sum Enhanced, <i>L. E. Dickens and D. W. Maki (IEEE Transactions on Microwave Theory and Techniques, March 1975)</i>	126
Optimization of an 11 GHz Mixer Circuit Using Image Recovery, <i>C. J. Burkley and R. S. O'Brien (International Journal of Electronics, June 1975)</i>	132
Wide-Band X-Band Microstrip Image Rejection Balanced Mixer, <i>G. P. Kurpis and J. J. Taub (IEEE Transactions on Microwave Theory and Techniques, December 1970)</i>	143

A New "Phase-Type" Image Enhanced Mixer, <i>L. E. Dickens and D. W. Maki (IEEE MTT-S International Microwave Symposium Digest, 1975)</i>	145
Phasing Type Image Recovery Mixers, <i>T. H. Oxley (IEEE MTT-S International Microwave Symposium Digest, 1980)</i>	148
Part IV: Other Practical Implementations of Microwave Mixers	153
A Broad-Band Hybrid Junction and Application to the Star Modulator, <i>R. B. Mouw (IEEE Transactions on Microwave Theory and Techniques, November 1968)</i>	154
Recent Developments in Microwave Slot-Line Mixers and Frequency Multipliers, <i>J. K. Hunton and J. S. Takeuchi (IEEE G-MTT International Microwave Symposium, 1970)</i>	162
A New MIC Double-Balanced Mixer with RF and IF Band Overlap, <i>R. Pflieger (IEEE G-MTT International Microwave Symposium, 1973)</i>	164
Simplified 12-GHz Low-Noise Converter with Mounted Planar Circuit in Waveguide, <i>Y. Konishi, K. Uenakada, N. Yazawa, N. Hoshino, and T. Takahashi (IEEE Transactions on Microwave Theory and Techniques, April 1974)</i>	167
Low-Noise Microwave Down-Converter with Optimum Matching at Idle Frequencies, <i>G. B. Stracca, F. Aspesi, and T. D'Arcangelo (IEEE Transactions on Microwave Theory and Techniques, August 1973)</i>	171
Design and Performance Analysis of an Octave Bandwidth Waveguide Mixer, <i>L. T. Yuan (IEEE Transactions on Microwave Theory and Techniques, December 1977)</i>	175
An X-Band Balanced Fin-Line Mixer, <i>G. Begemann (IEEE Transactions on Microwave Theory and Techniques, December 1978)</i>	182
K-Band Integrated Double-Balanced Mixer, <i>H. Ogawa, M. Aikawa, and K. Morita (IEEE Transactions on Microwave Theory and Techniques, March 1980)</i>	187
E-Plane Components for a 94-GHz Printed-Circuit Balanced Mixer, <i>P. J. Meier (IEEE MTT-S International Microwave Symposium Digest, 1980)</i>	193
Single-Sideband Mixers for Communications Systems, <i>B. R. Hallford (IEEE MTT-S International Microwave Symposium Digest, 1982)</i>	196
An Analytic Design Approach for 2–18 GHz Planar Mixer Circuits, <i>R. B. Culbertson and A. M. Pavio (IEEE MTT-S International Microwave Symposium Digest, 1982)</i>	199
A Novel Broadband Double Balanced Mixer for the 18–40 GHz Range, <i>A. Blaisdell, R. Geoffroy, and H. Howe (IEEE MTT-S International Microwave Symposium Digest, 1982)</i>	202
Design and Performance of W-Band Broad-Band Integrated Circuit Mixers, <i>R. S. Tahim, G. M. Hayashibara, and K. Chang (IEEE Transactions on Microwave Theory and Techniques, March 1983)</i>	205
Part V: Harmonic Mixers	213
Harmonically Pumped Stripline Down-Converter, <i>M. V. Schneider and W. W. Snell, Jr. (IEEE Transactions on Microwave Theory and Techniques, March 1975)</i>	214
Harmonic Mixing with an Antiparallel Diode Pair, <i>M. Cohn, J. E. Degenford, and B. A. Newman (IEEE Transactions on Microwave Theory and Techniques, August 1975)</i>	219
Frequency Conversion Using Harmonic Mixers with Resistive Diodes, <i>J. D. Buchs and G. Begemann (IEEE Journal on Microwave, Optics and Acoustics, May 1978)</i>	226
Subharmonically Pumped Millimeter-Wave Mixers, <i>E. R. Carlson, M. V. Schneider, and T. F. McMaster (IEEE Transactions on Microwave Theory and Techniques, October 1978)</i>	233
Local-Oscillator Noise Cancellation in the Subharmonically Pumped Down-Converter, <i>P. S. Henry, B. S. Glance, and M. V. Schneider (IEEE Transactions on Microwave Theory and Techniques, May 1976)</i>	243
A Subharmonic Mixer Using a Planar Doped Barrier Diode with Symmetric Conductance, <i>R. J. Malik and S. Dixon (IEEE Electron Devices Letters, July 1982)</i>	247
Part VI: Intermodulation in Microwave Mixers	251
Intermodulation Analysis of Crystal Mixer, <i>L. M. Orloff (Proceedings of the IEEE, February 1964)</i>	252
Designing Microwave Mixers for Increased Dynamic Range, <i>R. L. Ernst, P. Torriano, W. Y. Pan, and M. M. Morris (IEEE Transactions on Electromagnetic Compatibility, November 1969)</i>	259
Prediction of Mixer Intermodulation Levels as Function of Local Oscillator Power, <i>E. F. Beane (IEEE Transactions on Electromagnetic Compatibility, May 1971)</i>	268
An Intermodulation Phenomenon in the Ring Modulator, <i>J. G. Gardiner (The Radio and Electronic Engineer, April 1970)</i>	276
Response Coefficients of a Double-Balanced Diode Mixer, <i>M. A. Maiuzzo and S. H. Cameron (IEEE Transactions on Electromagnetic Compatibility, November 1979)</i>	281

Part VII: Cryogenic Schottky Barrier Diode Mixers	285
Low-Noise Room-Temperature and Cryogenic Mixers for 80–120 GHz, <i>A. R. Kerr (IEEE Transactions on Microwave Theory and Techniques, October 1975)</i>	286
Cryogenic Millimeter-Wave Receiver Using Molecular Beam Epitaxy Diodes, <i>R. A. Linke, M. V. Schneider, and A. Y. Cho (IEEE Transactions on Microwave Theory and Techniques, December 1978)</i>	293
A Cryogenic Millimeter-Wave Schottky-Diode Mixer, <i>E. L. Kollberg and H. H. G. Zirath (IEEE Transactions on Microwave Theory and Techniques, February 1983)</i>	297
Characteristics of Schottky Diodes with Microcluster Interface, <i>M. V. Schneider, A. Y. Cho, E. Kollberg, and H. Zirath (Applied Physics Letters, Sept. 15, 1983)</i>	303
All Solid-State Low-Noise Receivers for 210–240 GHz, <i>J. W. Archer (IEEE Transactions on Microwave Theory and Techniques, August 1982)</i>	306
Part VIII: Superconducting Junction Mixers	313
Super-Schottky Mixer Performance at 92 GHz, <i>R. L. Dickman, W. J. Wilson, and G. G. Berry (IEEE Transactions on Microwave Theory and Techniques, August 1981)</i>	314
Josephson-Junction Mixer Analysis Using Frequency-Conversion and Noise-Correlation Matrices, <i>Y. Taur (IEEE Transactions on Electron Devices, October 1980)</i>	320
Low-Noise Josephson Mixers at 115 GHz Using Recyclable Point Contacts, <i>Y. Taur and A. R. Kerr (Applied Physics Letters, June 1, 1978)</i>	328
Analytic Solutions to Superconductor-Insulator-Superconductor Quantum Mixer Theory, <i>A. D. Smith and P. L. Richards (Journal of Applied Physics, May 5, 1982)</i>	331
Low-Noise 115-GHz Receiver Using Superconducting Tunnel Junctions, <i>S. K. Pan, M. J. Feldman, A. R. Kerr, and P. Timbie (Applied Physics Letters, October 1983)</i>	338
Part IX: FET Mixers	341
Performance of GaAs MESFET Mixers at X Band, <i>R. A. Pucel, D. Massé, and R. Bera (IEEE Transactions on Microwave Theory and Techniques, June 1976)</i>	342
FET Mixers for Communication Satellite Transponders, <i>P. Bura and R. Dikshit (IEEE MTT-S International Microwave Symposium Digest, 1976)</i>	352
An Experimental Evaluation of X-Band GaAs FET Mixers Using Single and Dual-Gate Devices, <i>S. C. Cripps, O. Nielsen, D. Parker, and J. A. Turner (IEEE MTT-S International Microwave Symposium Digest, June 1977)</i>	355
The Conversion Gain and Stability of MESFET Gate Mixers, <i>G. Begemann and A. Hecht (Conference Proceedings of the 9th European Microwave Conference, 1979)</i>	358
Noise Figure and Associated Conversion Gain of a Microwave MESFET Gate Mixer, <i>G. K. Tie and C. S. Aitchison (Conference Proceedings of the 13th European Microwave Conference, 1983)</i>	363
Conversion Gain of M.E.S.F.E.T. Drain Mixers, <i>G. Begemann and A. Jacob (Electronics Letters, August 30, 1979)</i>	369
A Self-Oscillating Dual Gate MESFET X-Band Mixer with 12 DB Conversion Gain, <i>C. Tsironis, E. Stahlmann, and F. Ponse (Conference Proceedings of the 9th European Microwave Conference, 1979)</i>	371
Part X: Further Aspects on Microwave and Millimeter-Wave Mixers	377
Ka-Band Monolithic GaAs Balanced Mixers, <i>C. Chao, A. Contolatis, S. A. Jamison, and P. E. Bauhahn (IEEE Transactions on Microwave Theory and Techniques, January 1983)</i>	378
Receiver Technology for the Millimeter and Submillimeter Wave Regions, <i>B. J. Clifton (Integrated Optics and Millimeter and Microwave Integrated Circuits, 1981)</i>	383
Tunnel-Diode Converter Analysis, <i>C. S. Kim (IRE Transactions on Electron Devices, September 1961)</i>	392
Millimeter-Wave InP Image Line Self-Mixing Gunn Oscillator, <i>S. Dixon, Jr. and H. Jacobs (IEEE Transactions on Microwave Theory and Techniques, September 1981)</i>	404
Ka-Band Self-Oscillating Mixers with Schottky Baritt Diodes, <i>P. N. Förg and J. Freyer (Electronics Letters, October 23, 1980)</i>	408
A Low Temperature Bolometer Heterodyne Receiver for Millimeter Wave Astronomy, <i>T. G. Phillips and K. B. Jefferts (The Review of Scientific Instruments, August 1973)</i>	410
