

CONTENTS

<i>Preface</i>	v
--------------------------	---

1. Elements of Conventional Circuit Theory

1.1 Transmission Line Theory.	1
1.2 Smith Chart.	12
1.3 Bilinear Transformations	23
1.4 Power Waves	33
Problems	38

2. Electromagnetic Field Vectors

2.1 Vectors	40
2.2 Maxwell's Equations	63
2.3 Plane Waves	73
Problems	83

3. Waveguides

3.1 Perfect Conductors.	85
3.2 TE ₁₀ Mode in Rectangular Waveguides	87
3.3 Introductory Eigenvalue Problem	99
3.4 Eigenfunctions for Waveguides	113
3.5 General Theory of Waveguides	130
3.6 Examples of Waveguides	138

3.7	Waveguide Discontinuities	149
3.8	Effect of Wall Losses	156
3.9	Waveguides with Inhomogeneous Media	164
	Problems	167
4.	Resonant Cavities	
4.1	Introduction.	170
4.2	Expansions of Electromagnetic Fields	173
4.3	Equivalent Circuits.	185
4.4	Perturbation of Boundaries	193
4.5	Cavities with Imhomogeneous Media	196
	Problems	198
5.	Matrices and Waveguide Junctions	
5.1	Matrices	200
5.2	Reciprocal Conditions	217
5.3	Lossless Conditions	224
5.4	Frequency Characteristic of Lossless Reciprocal Junctions	226
5.5	Lossless Reciprocal Three-port Networks	232
5.6	Symmetrical Y Junctions	234
5.7	Tensor Permeability of Ferrites	240
5.8	Three-port Circulators	247
	Problems	253
6.	Coupled Modes and Periodic Structures	
6.1	Distributed Couplings	257
6.2	Perturbation Method for the Eigenvalue Problem	264
6.3	Interactions between Two Waves.	269
6.4	Periodic Structures	274
6.5	ω - β Diagram	282
	Problems	288
7.	Linear Amplifiers	
7.1	Canonical Forms	290
7.2	Noise Measure	299
7.3	Unconditional Stability	308
7.4	Unilateral Gain.	315
7.5	Tunnel Diode Amplifiers	318

7.6 Manley-Rowe Relations 333
 7.7 Negative Resistance Parametric Amplifiers 337
 Problems 343

8. Electron Beams

8.1 An Electron Beam Model 346
 8.2 Space Charge Waves 351
 8.3 Gap Interactions 359
 8.4 Continuous Interaction with a Slow Wave Structure 367
 8.5 Electron Beam Noise 372
 Problems 378

9. Oscillators

9.1 A Simplified Oscillator Model 380
 9.2 Synchronization by Injection Locking 386
 9.3 Noise in Oscillators 389
 Problems 397

Appendix I Proof of $\lim_{n \rightarrow \infty} k_n^2 = \infty$

1. One-Dimensional Case. 399
 2. Two-Dimensional Case 404
 3. Three-Dimensional Case 409
 4. Resonant Cavities with Inhomogeneous Media. 410

Appendix II Generalized Functions and Fourier Analysis
