

# Contents

<i>Chapter 1. Introduction</i> .....	1
<i>Chapter 2. Modal Analysis of Slab Waveguides</i> .....	5
2.1. Introduction .....	5
2.2. General Theoretical Considerations .....	7
2.3. A Simple Planar Waveguide .....	12
2.3.1. TE Modes .....	13
2.3.2. TM Modes .....	17
2.4. Asymmetric Guides .....	24
<i>Chapter 3. Planar Waveguides with Continuous Dielectric     Constant Variation</i> .....	31
3.1. The Square-Law Medium .....	32
3.1.1. Modal Analysis .....	33
3.1.2. The Kernel .....	36
3.1.3. The Parabolic Equation Approach .....	42
3.2. Exponential Variation of the Refractive Index .....	44
3.2.1. TE Modes .....	46
3.2.2. TM Modes .....	48
3.3. A Continuous Dielectric Constant Model for $p$ - $n$ Junctions .....	49
3.4. Summary .....	53

<i>Chapter 4. Dielectric Clad Cylindrical Waveguides</i> .....	55
4.1. The Ray Analysis .....	56
4.2. Solutions of Bessel's Equation .....	57
4.3. Modal Analysis (Approximate Theory) .....	61
4.3.1. The Poynting Vector .....	70
4.4. Rigorous Modal Analysis .....	71
<i>Chapter 5. Inhomogeneous Circular Waveguides</i> .....	79
5.1. Modal Analysis .....	80
5.1.1. The Kernel .....	83
5.1.2. Propagation of a Gaussian Beam Incident Normally at an Off-Axis Point .....	85
5.1.3. Path of Rays: A General Treatment .....	87
5.1.4. Three-Dimensional Intensity Pattern Near Focus .....	91
5.1.5. Effect of Absorption .....	93
5.2. The Parabolic Equation Approach .....	95
5.2.1. Solution of Eq. (5.96) when $K_2$ is Independent of $z$ .....	100
5.2.2. Analytical Solutions for Specific Dependence of $K_2(z)$ and Path of Rays in Conical SELFOC Fibers .....	105
5.2.3. Resolving Power of a SELFOC Lens .....	111
5.2.4. Focusing by a Gas Lens .....	113
5.2.5. Effect of Random Inhomogeneities in a SELFOC Fiber .....	117
5.3. Considerations for General Inhomogeneous Media .....	119
5.4. Summary .....	124
<i>Chapter 6. Vector Theory for Inhomogeneous Circular         Waveguides</i> .....	125
6.1. General Solutions for Arbitrary Inhomogeneity .....	126
6.2. Solutions for a Square-Law Medium .....	132
6.3. Asymptotic Solutions for Arbitrary Profiles .....	136
6.4. Approximate Methods .....	139
6.5. The Perturbation Method .....	139
6.5.1. Perturbation Theory for Cladded Square-Law Media .....	140
6.5.2. Perturbation Theory for Planar Waveguides Formed by the Outdiffusion Technique .....	143
6.5.3. Perturbation Theory for Taking into Account Higher Order Terms in a SELFOC Fiber .....	144

6.5.4. Perturbation Theory for Studying the Effect of $\nabla K$ Term in Lens-like Media .....	145
6.6. The WKB Method .....	148
6.7. The Variational Method .....	151
<b>Chapter 7. Dispersion in Optical Waveguides</b> .....	153
7.1. Introduction .....	153
7.2. Impulse Response for a Gaussian Source in a Cladded Fiber-Ray Treatment .....	155
7.3. Gaussian Temporal and Spatial Distribution .....	159
7.4. Ray Delay in Graded Index Fibers .....	160
7.5. Broadening of a Gaussian Temporal Pulse using Modal Analysis .....	161
7.6. Gaussian Temporal and Spatial Pulse in a SELFOC Fiber .....	164
7.7. Response of a Gaussian Pulse in a Cladded Fiber: Wave Optics Treatment .....	170
7.8. Dependence of Dispersion on Input Pulse Widths .....	175
<b>Chapter 8. Propagation in Imperfect Waveguides</b> .....	177
8.1. $K = K_0(z) + K_1(x, y)$ .....	178
8.2. $K = K_0 - K_2(z)r^2$ .....	181
8.3. $K = K^{(0)}(x, y) + K^{(p)}(x, y, z)$ .....	187
8.4. Application .....	191
8.4.1. Guided Modes .....	192
8.4.2. Radiation Modes .....	193
<b>Chapter 9. Ray Tracing and Aberrations in Lens-like Media</b> .....	201
9.1. Hamiltonian Formulation .....	202
9.2. Ray Tracing Method .....	215
9.3. Numerical Results .....	219
<b>Appendix A. Fabrication of Planar Waveguides</b> .....	227
A.1. Thin-Film Waveguides .....	227
A.1.1. Thin-Film Dielectric Waveguides .....	227
A.1.2. Guided Propagation through Thin Films .....	228
A.1.3. Asymmetric Slab Waveguides .....	229
A.2. Optical Waveguides Formed by Electrically Induced Migration of Ions in Glass Plates .....	230
A.3. Optical Waveguides of $\text{LiNbO}_3$ and $\text{LiTaO}_3$ .....	231
A.4. Fabrication of Optical Waveguides by Diffusion .....	236
A.5. $p$ - $n$ Junctions as Waveguides .....	237

<i>Appendix B. Fabrication of Inhomogeneous Circular Waveguides</i> .....	239
B.1. Conventional SELFOC Fibers .....	240
B.1.1. Fiber Diameter .....	240
B.1.2. Change in Refractive Index Induced by Ion-Exchange Methods .....	240
B.1.3. Results of Typical Experiments .....	242
B.2. The New SELFOC Fibers .....	244
B.3. SELFOC Fibers by Copolymerization .....	246
B.4. Gas Lenses .....	247
B.4.1. Experimental Method .....	247
B.4.2. Temperature and Refractive Index Variation in a Gas Lens .....	248
<i>Appendix C. General Solution of Eq. (5.84)</i> .....	253
<i>Appendix D. Derivation of the Ray Equation</i> .....	255
<i>References</i> .....	259
<i>Author Index</i> .....	265
<i>Subject Index</i> .....	267
