## Chapter 1 **The CW GaAs Tunnnett Diodes**

*Kaoru Motoya and Jun-ichi Nishizawa*

I. Introduction	2
II. Theory of TUNNETT Diode	3
III. Preparation of the GaAs Hyperabrupt $p^+-n^+-i(\nu)-n^+$ Diode	19
IV. Experimental Results	22
V. Features of the GaAs Hyperabrupt $p^+-n^+-i-n^+$ TUNNETT Diodes	37
VI. Future of the TUNNETT Diode	41
VII. Conclusion	43
References	43

## Chapter 2 **Computer-Aided Testing of SIS Junctions and Solid-State Devices**

*Martin V. Schneider and Denise A. Brown*

I. Introduction	47
II. Nonlinearities in SIS Junctions, Schottky Diodes and FETs	48
III. Description of Test System	52
IV. Software	52
V. Measurements	54
VI. Conclusions	58
References	58
Appendix A	59
Appendix B	60
Appendix C	62
Appendix D	78

### Chapter 3 **Multichannel Far-Infrared Collective Scattering System for Plasma Wave Studies**

*D. L. Brower, H. K. Park, W. A. Peebles, N. C. Luhmann, Jr.*

I. Introduction	83
II. Review of Collective Thomson Scattering Theory	86
III. Far-Infrared Probe Source	97
IV. Optical Scattering System	110
V. Mixers, Amplifiers, and Data Acquisition	130
VI. Calibration of Optical System	140
VII. Typical Scattering Data	149
VIII. Other Applications	164
IX. Acknowledgements	166
X. References	167

### Chapter 4 **Special Imperfections in Semiconductors**

*E. Otsuka*

I. Introduction	173
II. Electron Scattering by Dislocations	174
III. Natural Quantum Wells in ZnSe	184
IV. Deep Level Defects in Semi-Insulating GaAs	196
V. Concluding Remarks	210
Acknowledgements	211
References	211

### Chapter 5 **SIT as a Ballistic Device**

*Jun-ichi Nishizawa and Kaoru Motoya*

I. Introduction	213
II. SIT	215
III. Ideal SIT	229
IV. Ideal SITT	240
V. Conclusion	245
References	246
