

1963 IEEE INTERNATIONAL CONVENTION RECORD

PART III - ELECTRON DEVICES; MICROWAVE THEORY AND TECHNIQUES

TABLE OF CONTENTS

	<u>Page</u>
<u>Semiconductor Devices</u>	
(Session 14: Sponsored by PGED)	
Secondary Breakdown and Hot Spots in Power Transistors. by R. M. Scarlett and W. Shockley.....	3
Properties and Device Applications of Evaporated InSb Films, by H. H. Wieder.....	14
Stabilization of the Hall Effect Multiplier, by Kermit K. W. Heid and David Silverman.....	21
Impact Ionization in Gold Doped Silicon, by Bert L. Escura.....	28
Thermoelectricity - Power Supply & Control, by Thomas P. Krieser.....	37
<u>Electron Devices</u>	
(Session 20: Sponsored by PGED)	
Permachon Type Scan-Converters, by R. J. Doyle.....	48
A New High Frequency Power Transistor, by A. Goetzberger, N. E. Zetterquist, and R. M. Scarlett.....	57
A High-Voltage Multigap Crowbar, by Glenn Grotz.....	63
Quartz Ultraviolet Lasers, by C. H. Becker.....	75
Lasecons: Microwave Phototubes with Transmission Photocathodes, by D. J. Blattner, H. C. Johnson, J. E. Ruedy, and F. Sterzer.....	79
<u>Broadening Device Horizons</u>	
(Session 28: Sponsored by PGED)	
Infrared and Visible Light Emission from Forward-Biased P-N Junctions, by R. H. Rediker. (Abstract).....	87
The Field-Effect Transistor -- An Old Device with New Promise, by J. T. Wallmark. (Abstract).....	88
Radiation Damage in Semiconductor Devices, by J.W.Easley. (Abstract).....	89
<u>Microwave Devices and Techniques</u>	
(Session 36: Sponsored by PGMIT and PGED)	
New Class of Parametric Amplifiers Enables Below-Signal Pumping, by H.B.Henning.....	90
Efficient High Level Parametric Frequency Converters. by B. S. Perlman and B. B. Bossard.....	98
The Multiple-Beam Traveling-Wave Klystron, by M. R. Boyd, R. A. Dehn, and T. G. Mihran. (Abstract).....	108
Theory and Performance of Depressed Trochoidal Collectors for Improving Traveling-Wave-Tube Efficiency, by T.S. Chen, H.J.Wolkstein, and R.W.McMurrough.....	109
Automated Measurement of the Phase and Transmission Characteristics of Microwave Amplifiers, by Peter Lacy.....	119

PART III
(TABLE OF CONTENTS, Continued)

	<u>Page</u>
<u>Microwave High Power</u> (Session 43: Sponsored by PGMIT)	
Research Applications of a High Power Microwave Radar System, by Richard C. Beitz.....	126
An Efficient Means of Converting Microwave Energy to DC Using Semiconductor Diodes, by R. H. George and E. M. Sabbagh.....	132
High Power Microwave Tubes, by Morris Ettenberg.....	142
Measurement of Phase Characteristics of High Power Microwave Tubes, by L. Clappitt, M. Huse, and W. Smith.....	147
Waveguide Windows for High-Power Microwave Tubes, by Delos B. Churchill.....	154
 <u>Microwaves</u> (Session 51: Sponsored by PGMIT)	
Optical Maser Detection by Microwave Absorption in Semiconductors, by F. A. Brand, H. Jacobs, S. Weitz, and J. Strozyk.....	162
A Comparison of the Bat's Sonar Equipment with that Built by Human Engineers, by L. J. Cutrona.....	167
A Gated Radiometer for Plasma Afterglow Study, by W. C. Taft, K. C. Stotz, and E. H. Holt.....	172
An Automatic Phase-Correction System, by Paul Rademacher and Dominick Randise.....	179
Investigation and Suppression of Spurious Modes in a Broad-Band Ferrite Modulator, by Baroukh Maher.....	187
