FOREWORD	v		
<b>REPORT OF THE TASK GROUP ON SPATIAL DISTRIBUTION OF RADIATION DOSE</b>		Damage to the bone marrow and to the cellular defences against infection	16
<b>Preface</b>	1	Defective growth and development	17
<b>Basic considerations</b>	1	Life-shortening and generally deleterious somatic effects	17
<b>Current recommendations on non-uniform exposure</b>	2	Genetic damage	19
<b>A scheme for non-uniform exposure based on risk considerations</b>	3	<b>The radiosensitivities of different organs and tissues in man</b>	20
<b>Range of linearity of dose response</b>	5	Lens opacification	21
<b>Non-uniformity of dose within organs and tissues</b>	6	Fertility	21
Class 1. Partial irradiation of representative tissue	6	Tumour induction	21
Class 2. Partial irradiation of non-representative tissue	7	The proper measure of carcinogenesis for the purposes of radiation protection	22
Class 3. Irradiation from radioactive materials in particulate form	8	The assessment of relative tissue sensitivity to tumour induction by radiation	23
<b>Additivity</b>	9	The classification of organs according to their radiosensitivity for cancer induction in the adult: Groups I-IV	23
Combination of long-lived bone-seekers and external radiation	9	Thyroid cancer	25
Exposure of gonads and foetus	9	Basic general assumptions about sensitivity to tumour induction	26
Non-uniform exposure with external radiation	10	Differences between foetus, child and adult	26
<b>Summary</b>	10	Sources of new information on cancer induction by radiation in man	26
<b>References</b>	10	<b>Relative sensitivity to different kinds of biological damage by radiation and the overall assessment of radiation damage</b>	27
<b>REPORT OF THE TASK GROUP TO CONSIDER THE RELATIVE RADIOSENSITIVITIES OF DIFFERENT TISSUES</b>		A formal scheme for deriving dose limits for partial exposure of the body	29
<b>Preface</b>	11	The concept of "critical organ"	31
<b>Introduction</b>	11	<b>Revision of currently recommended dose limits</b>	32
<b>The expression of radiation damage</b>	12	<b>Summary and general conclusions</b>	33
The form of the relationship between radiation dose and response	13	<b>References</b>	35
Tumour induction	14		
Cataract	15		
Impaired fertility	15		

	PAGE		PAGE
<b>Appendix I.</b>		<b>Appendix IV.</b>	
<b>Radiation cataract in man</b>	37	<b>The derivation of numerical values     for dose limits: an example for dis-     cussion</b>	110
<b>Appendix II.</b>			
<b>Radiation and human fertility</b>	51		
<b>Appendix III.</b>		<b>Appendix V.</b>	
<b>The relative sensitivity of different     tissues to tumour induction by radia-     tion: the human evidence</b>	56	<b>Further information which could be     helpful</b>	117
