<b>Preface</b> .....	iii
<b>List of Symbols</b> .....	ix
<b>1. Introduction</b> .....	1
<b>2. Fundamentals of the Interaction of Electron Beams with Matter</b> .....	3
<b>2.1 Rationale</b> .....	3
<b>2.2 Basic Electron Interaction Data</b> .....	3
<b>2.2.1 Total Mass Stopping Power</b> .....	3
<b>2.2.2 Mass Collision Stopping Power</b> .....	3
<b>2.2.3 Restricted Mass Collision Stopping Power</b> .....	9
<b>2.2.4 Mass Radiative Stopping Power</b> .....	11
<b>2.2.5 The Continuous-Slowing-Down Range</b> .....	14
<b>2.2.6 Mass Scattering Power</b> .....	18
<b>2.3 Differential Electron Fluence</b> .....	22
<b>2.4 Energy Spectra</b> .....	23
<b>2.4.1 General</b> .....	23
<b>2.4.2 Spectrum of Electrons Traversing a Plane-Parallel Slab</b> .....	24
<b>2.4.3 Energy Distribution of the Electron Fluence Inside an Absorber</b> .....	26
<b>2.4.4 Slowing-Down Spectra Independent of the Space Coordinates</b> .....	27
<b>2.5 Angular Distribution</b> .....	28
<b>2.5.1 General</b> .....	28
<b>2.5.2 Angular Distribution of the Electrons Crossing a Plane Surface</b> .....	28
<b>2.6 Lateral Distribution</b> .....	29
<b>2.6.1 General</b> .....	29
<b>2.6.2 Incident Narrow Gaussian Beams</b> .....	30
<b>2.6.3 Rectangular and Circular Incident Beams</b> .....	31
<b>2.7 Depth Distribution</b> .....	31
<b>2.7.1 General</b> .....	31
<b>2.7.2 Fluence and Planar Fluence</b> .....	31
<b>2.7.3 Particle and Charge Transport</b> .....	32
<b>2.8 Absorbed-Dose Distribution</b> .....	34
<b>2.8.1 General</b> .....	34
<b>2.8.2 Point Monodirectional Beam</b> .....	35
<b>2.8.3 Plane-Parallel Beam</b> .....	36
<b>2.8.4 Point Isotropic Source</b> .....	37
<b>2.8.5 Plane Isotropic Source</b> .....	38
<b>2.8.6 Reciprocity</b> .....	39
<b>2.9 Secondary Particle Production</b> .....	39
<b>2.9.1 General</b> .....	39
<b>2.9.2 Bremsstrahlung</b> .....	39
<b>2.9.3 Positrons</b> .....	40
<b>2.9.4 Photonuclear Reactions</b> .....	40
<b>2.9.5 Electronuclear Reactions</b> .....	41
<b>3. Characteristics of Clinical Electron Beams</b> .....	43
<b>3.1 General</b> .....	43
<b>3.2 Irradiation Geometry</b> .....	43
<b>3.2.1 Emittance and Beam Optics</b> .....	43
<b>3.2.2 Beam Flattening</b> .....	45
<b>3.2.3 Beam Collimation</b> .....	46
<b>3.2.4 Irradiation Geometry Parameters</b> .....	48
<b>3.3 Energy</b> .....	55

3.3.1 Energy Parameters .....	55
3.3.2 Determination of Electron Energy .....	57
3.4 Time Structure .....	63
<b>4. Determination of Absorbed Dose .....</b>	<b>65</b>
4.1 Relationship Between Absorbed Dose in the Detector and in the Medium .....	65
4.1.1 General .....	65
4.1.2 Small Detector .....	65
4.1.3 Large Detector .....	65
4.2 Location of Effective Point of Measurement and Values of Perturbation Correction Factor .....	66
4.2.1 Gas-Filled Detectors .....	66
4.2.2 Solid and Liquid Detectors .....	68
4.3 Stopping Power ratio .....	70
4.3.1 Fundamentals .....	70
4.3.2 Transition Material Between Wall and Radiation Sensi- tive Material of a Detector .....	71
4.3.3 Wall-Less Detectors .....	72
4.3.4 Comparison of Calculated and Experimental Values ...	74
4.3.5 Recommended Stopping Power Ratios .....	76
<b>5. Absorbed Dose Measurement Techniques .....</b>	<b>77</b>
5.1 General .....	77
5.2 Calorimetry .....	77
5.2.1 Introduction .....	77
5.2.2 Experimental Work with Calorimeters .....	77
5.2.3 Uncertainty in the Determination of Absorbed Dose in a Reference Material .....	78
5.2.4 Transfer of Absorbed Dose Calibration to Different Dosimetric Systems and to a Point in Water .....	79
5.3 Chemical Methods .....	80
5.3.1 Introduction .....	80
5.3.2 Ferrous Sulphate Dosimeter .....	80
5.4 Gas Ionization Chambers .....	83
5.4.1 Gas-Ionization Chamber for Absolute Determinations ..	84
5.4.2 Field Instruments .....	86
5.4.3 Calibration of Field Instrument Against a Chamber of Known Sensitivity .....	87
5.4.4 Calibration of a Thimble Chamber as a Field Instrument in a Cobalt-60 Gamma-Ray or 2 MV X-Ray Beam ...	87
5.5 Liquid Ionization Chambers .....	90
5.6 Solid State Dosimetry .....	90
5.6.1 Introduction .....	90
5.6.2 Thermoluminescent Phosphors .....	91
5.6.3 Optical Absorption in Clear Polymethyl Methacrylate (PMMA) .....	92
5.6.4 Silicon Diode Detectors .....	92
5.7 Film Dosimeters .....	92
<b>6. Absorbed Dose in a Phantom Irradiated with an Electron     Beam .....</b>	<b>96</b>
6.1 General .....	96
6.2 Phantoms .....	96
6.2.1 Standard Phantom .....	96
6.2.2 Material Equivalence .....	96
6.2.3 Reference Plane and Reference Point .....	97
6.3 Absorbed Dose at the Reference Point .....	99
6.3.1 General .....	99

<b>6.3.2 Determination of Absorbed Dose</b> .....	99
<b>6.4 Absorbed Dose on the Reference Axis</b> .....	101
<b>6.4.1 General</b> .....	101
<b>6.4.2 Absorbed Dose Determination</b> .....	101
<b>6.4.3 Characteristics of the Depth-Dose Curve</b> .....	103
<b>6.5 Absorbed Dose in Planes Perpendicular to or Parallel to the Beam Axis</b> .....	109
<b>6.5.1 General</b> .....	109
<b>6.5.2 Measurements</b> .....	109
<b>6.5.3 Uniformity</b> .....	110
<b>6.5.4 Penumbra</b> .....	111
<b>6.5.5 Leakage Radiation</b> .....	111
<b>7. Determination of Absorbed Dose Distribution in a Patient</b> ..	112
<b>7.1 General</b> .....	112
<b>7.2 Conversion of Phantom Data to Tissue Data</b> .....	112
<b>7.3 Correction for Oblique Incidence</b> .....	112
<b>7.4 Corrections for Inhomogeneities</b> .....	113
<b>7.5 Decelerators, Bolus and Wedges</b> .....	115
<b>7.5.1 Decelerators</b> .....	115
<b>7.5.2 Bolus</b> .....	116
<b>7.5.3 Wedges</b> .....	116
<b>7.6 Electron Beam Treatment Planning</b> .....	116
<b>7.6.1 General</b> .....	116
<b>7.6.2 Multiple Beams</b> .....	117
<b>7.6.3 Moving Beams</b> .....	117
<b>7.7 Computerized Treatment Planning</b> .....	119
<b>7.7.1 Empirical Methods</b> .....	119
<b>7.7.2 Analytical Methods</b> .....	120
<b>7.7.3 Monte Carlo Methods</b> .....	121
<b>7.7.4 Conclusions</b> .....	121
<b>8. Electron Beam Monitors</b> .....	122
<b>8.1 Introduction</b> .....	122
<b>8.2 Transmission Ionization Chambers</b> .....	122
<b>8.3 Choice of Monitor Systems—Practical Implications and Safety Considerations</b> .....	123
<b>9. Tests of Constancy of Performance Parameters and Schedules for Such Testing</b> .....	125
<b>9.1 Introduction</b> .....	125
<b>9.2 What Should be Checked and When</b> .....	125
<b>9.2.1 Light Beam, Radiation Beam Alignment, Distance Indicators and Mechanical Alignments</b> .....	125
<b>9.2.2 Monitor Check</b> .....	125
<b>9.2.3 Absorbed Dose Checks</b> .....	125
<b>9.2.4 Energy Check</b> .....	126
<b>9.2.5 Radiation Beam Uniformity Checks</b> .....	126
<b>9.2.6 Contamination and Leakage Measurements</b> .....	126
<b>9.2.7 Summary</b> .....	127
<b>9.3 Dosimetric Measurements on the Patient</b> .....	127
<b>10. Radiobiological Aspects</b> .....	128
<b>10.1 Introduction</b> .....	128
<b>10.2 Survey of the Radiobiological Data</b> .....	128
<b>10.3 Theoretical Considerations</b> .....	130
<b>10.4 Conclusions: Implications in Radiotherapy</b> .....	132
<b>References</b> .....	133
<b>ICRU Reports</b> .....	152
<b>Index</b> .....	155
