1	INTRODUCTION TO VACUUM ARCS	1
	James D. Cobine	
1.1	Basic Discharges, 2	
1.2	Principal Characteristics of Various Types of Arc, 4	
1.3	General Characteristics of the Vacuum Arc, 5	
1.4	Surface Phenomena in Vacuum Switches, 8	
1.5	Electrode Energy Balance, 12	
1.6	Auxiliary Electrodes and Surfaces, 16	
2	ELECTRICAL BREAKDOWN IN VACUUM	20
	George A. Farrall	
2.1	Early Studies, 20	
2.2	Emission Fundamentals, 21	
2.3	Field Emission and Breakdown in Vacuum, 24	
2.4	Anode Interactions, 35	
2.5	Electrode Geometry, 37	
	Curvature Radius and Edge Effects, 42	
	Uniform Electrode Geometry, 47	
2.6	Electrode Material, 49	
2.7	Electrode Conditioning, 51	
2.8	Gas Effects, 56	
2.9	Particle Effects, 60	
2.10	Insulators in Vacuum, 66	
2.11	Separable Contact Effects, 69	

3	ARC IGNITION PROCESSES	81
	George A. Farrall	
3.1	Surfaces in Contact Carrying Current, 81	
3.2	Contact Welding, 87	
	The Real Area of Contact, 88	
	Weld Strength and Adsorbed Gas, 90	
	Welding in Vacuum, 92	
3.3	The Triggered Vacuum Arc, 107	
	The Plasma State, 107	
	Arc Ignition Processes, 107	
4	ARC CATHODE PHENOMENA	120
	L. P. Harris	
4.1	Properties of Cathode Spots, 120	
4.2	Structure of Cathode Spot Emission, 132	
4.3	The Arc Voltage, 152	
4.4	Ion Flows from Cathode Spots, 160	
4.5	Summary, 166	
5	VACUUM ARC ANODE PHENOMENA	169
	James D. Cobine	
5.1	Anode Failure, 170	
5.2	Development of Anode Spots, 171	
5.3	Anode Spot Instabilities, 171	
5.4	Effects of Material on Anode Spots, 176	
5.5	Anode Spot Temperatures, 178	
5.6	Magnetic Field Effects, 179	
6	CURRENT ZERO PHENOMENA	184
	George A. Farrall	
6.1	Vacuum Arc Stability, 184	
6.2	Current Chopping, 195	
6.3	Recovery of Electrical Strength After Arc Extinction, 203	
	Recovery Strength Measurements, 204	
	Role of Neutral Vapor in Vacuum Gap Recovery, 207	
	Role of Ions in Vacuum Gap Recovery, 214	
6.4	Summary, 221	

7 THEORETICAL ASPECTS OF THE VACUUM ARC**228****Günter Ecker**

- 7.1 Definition of the Arc, 229
- 7.2 Cathode Spot Models, 230
- 7.3 General Aspects of the Cathode Spot Phenomena, 231
 - Questions Regarding the Bulk, 231
 - Questions Regarding the Cathode Surface, 235
 - Questions Concerning the Plasma Ball, 242
 - The Problem of Uncertainty, 249
 - The Problem of Stability, 251
- 7.4 The Smooth Surface Spot (SS), 253
 - Historical Review, 254
 - The Localized Smooth Surface Spot (LSS), 260
 - The Moving Smooth Surface Spot (MSS), 266
 - Unified Analysis of the Smooth Surface Spot, 273
- 7.5 The Rough Surface Spots (RS), 279
 - Historical Review, 280
 - Rough Surface Spot with Average Structure Effects (RSA), 284
 - Rough Surface Spot with Individual Structure Effects (RSI), 289
 - Operation of the Cathode Spot on a Rough Surface, 294
- 7.6 Cathode Spot Mechanism in the Light of Smooth Surface and Rough Surface Theories, 296
- 7.7 Interelectrode and Anode Phenomena, 298
 - The Plasma Flow in the Interelectrode Region, 299
 - The Potential Maximum, 302
 - Anode Spot Instability, 303
- 7.8 Chopping: An Example of Related Phenomena, 310
 - Analysis of Chopping on the Basis of the Smooth Surface Theory 311

8 VACUUM ARC APPLICATIONS**321****Allan N. Greenwood**

- 8.1 The Power Switching Function, 322
- 8.2 Interruption in Vacuum, 326
- 8.3 Construction of Vacuum Interrupters, 327

- 8.4 Functional Duties of a Power Switching Device, 331
- 8.5 Importance of Contact Material, 332
- 8.6 Current Chopping, 335
- 8.7 Dielectric Considerations, 337
- 8.8 Further Conflicting Needs, 340
- 8.9 Other Idiosyncrasies, 341
- 8.10 Interruption of Direct Currents, 343
- 8.11 Triggered Vacuum Gaps, 346
- 8.12 Vacuum Fuses, 351
- 8.13 State of the Art in Vacuum Switching and Prognostications
for the Future, 353
