

# CONTENTS

PREFACE .....	xvii
LIST OF SYMBOLS .....	xxi
CHAPTER 1 INTRODUCTION .....	1
1.1 POWER SPECTRUM .....	1
1.2 WHY POLYSPECTRA IN SIGNAL PROCESSING? .....	2
1.3 APPLICATIONS .....	4
REFERENCES .....	4
CHAPTER 2 CUMULANT SPECTRA OF STOCHASTIC SIGNALS .....	7
2.1 INTRODUCTION .....	7
2.2 MOMENTS AND CUMULANTS .....	7
2.2.1 Definitions .....	7
2.2.2 Relationship Between Moments and Cumulants .....	9
2.2.3 Properties of Moments and Cumulants .....	12
2.2.4 Moments and Cumulants of Stationary Processes .....	15
2.2.5 Variance, Skewness, and Kurtosis Measures .....	16
2.2.6 Time-Reversible Process .....	17
2.2.7 Cross-Cumulants .....	17
2.2.8 Ergodicity and Moments .....	19
2.3 CUMULANT SPECTRA .....	20
2.3.1 Definition .....	20
2.3.2 Alternative Definition .....	21
2.3.3 Special Cases of Cumulant Spectra .....	21
2.3.4 Variance, Skewness, and Kurtosis Measures .....	23
2.3.5 Time-Reversible Processes .....	24
2.3.6 Non-Gaussian White Noise Processes .....	24
2.3.7 One-Dimensional Slices of Cumulants and their Cumulant Spectra .....	26
2.3.8 Why Cumulant Spectra and not Moment Spectra .....	30
2.3.9 The $n$ th-Order Coherency Function .....	31

2.3.10 Cross-Cumulant Spectra .....	31
2.3.11 Linear Phase Shifts .....	33
2.3.12 Complex Regression Coefficients .....	34
2.3.13 Complex Processes .....	34
2.3.14 The Wigner Bispectrum .....	36
<b>2.4 CUMULANT SPECTRA OF NON-GAUSSIAN LINEAR PROCESSES .....</b>	<b>37</b>
2.4.1 Cumulant Spectra of LTI Systems .....	37
2.4.2 Cumulant Spectra of LTI Systems Driven by White Noise ....	38
2.4.3 Nonminimum Phase LTI Systems .....	45
2.4.4 Linear Processes with Gaussian and Non-Gaussian Components .....	53
2.4.5 Poisson Triggered Processes .....	56
2.4.6 Regression Coefficients of Linear Processes .....	57
<b>2.5 DETECTING AND IDENTIFYING NONLINEAR PROCESSES ...</b>	<b>58</b>
2.5.1 Sinusoidal Processes Applied to Nonlinear Systems .....	58
2.5.2 Quadratic Phase Coupling .....	59
2.5.3 Gaussian Processes Applied to Nonlinear Systems .....	61
2.5.4 Linear Non-Gaussian versus Nonlinear Processes .....	64
<b>2.6 SUMMARY .....</b>	<b>64</b>
<b>REFERENCES .....</b>	<b>66</b>
<b>CHAPTER 3 MOMENT SPECTRA OF DETERMINISTIC SIGNALS ....</b>	<b>71</b>
<b>3.1 INTRODUCTION .....</b>	<b>71</b>
3.1.1 Energy versus Power Deterministic Signals .....	71
3.1.2 Fourier Analysis of Energy Signals .....	72
3.1.3 Fourier Analysis of Periodic Power Signals .....	73
3.1.4 Finite-Duration versus Periodic Signals .....	75
<b>3.2 MOMENTS OF ENERGY SIGNALS .....</b>	<b>78</b>
3.2.1 Definition .....	78
3.2.2 Properties .....	78

3.2.3 Special Cases .....	80
3.2.4 Cross-Moments .....	83
3.3 MOMENT SPECTRA OF APERIODIC ENERGY SIGNALS .....	84
3.3.1 Definition .....	85
3.3.2 An Alternative Definition .....	85
3.3.3 Special Cases of Moment Spectra .....	88
3.3.4 Scalar Measures of Energy Signals .....	89
3.3.5 Moment Spectra and LTI System Relations .....	90
3.3.6 Phase Conditions .....	94
3.3.7 Cross-Moment Spectra .....	98
3.3.8 The $n$ th-Order Coherency of Energy Signals .....	99
3.4 MOMENTS OF POWER SIGNALS .....	100
3.4.1 Definition .....	100
3.4.2 Special Cases for Periodic Signals .....	101
3.4.3 Cross-Moments of Periodic Signals .....	106
3.5 MOMENT SPECTRA OF PERIODIC POWER SIGNALS .....	107
3.5.1 Definition .....	108
3.5.2 An Alternative Definition .....	109
3.5.3 Special Cases of Moment Spectra .....	110
3.5.4 LTI System Relations .....	116
3.5.5 Cross-Moment Spectra .....	117
3.5.6 Higher-Order Coherency Function of Periodic Power Signals .	119
3.5.7 Finite-Duration versus Periodic Signals: Moment Spectra Relationships .....	120
3.6 SUMMARY .....	121
REFERENCES .....	121
CHAPTER 4 CONVENTIONAL METHODS FOR THE ESTIMATION OF HIGHER-ORDER SPECTRA .....	123
4.1 INTRODUCTION .....	123
4.2 INDIRECT CLASS OF CONVENTIONAL METHODS .....	124

4.2.1 Estimation of Higher-Order Statistics .....	124
4.2.2 Estimation of Higher-Order Spectra .....	125
4.2.3 Window Functions .....	126
<b>4.3 DIRECT CLASS OF CONVENTIONAL METHODS .....</b>	<b>132</b>
4.3.1 The Higher-Order Periodogram .....	132
4.3.2 Direct Estimation of Moment Spectra .....	136
4.3.3 The Zurbenko Method for the Estimation of Cumulant Spectra .....	138
<b>4.4 COMPLEX DEMODULATES CLASS OF CONVENTIONAL METHODS .....</b>	<b>141</b>
<b>4.5 STATISTICAL PROPERTIES OF CONVENTIONAL METHODS</b>	<b>142</b>
4.5.1 Properties of Bispectral Estimates .....	142
4.5.2 Properties of Higher-Order Spectrum Estimation .....	145
<b>4.6 TEST FOR ALIASING WITH THE BISPECTRUM .....</b>	<b>147</b>
<b>4.7 BISPECTRUM COMPUTATION ON POLAR RASTERS .....</b>	<b>149</b>
4.7.1 Introduction .....	149
4.7.2 Problem Formulation .....	150
4.7.3 The Direct Approach (DA) .....	151
4.7.4 The Zero-Padding Approach (ZPA) .....	151
4.7.5 The “Super-FFT Approach” (SFA) .....	153
4.7.6 Trispectrum Computation on a Polar Raster .....	155
4.7.7 Extension to Stochastic Signals .....	158
<b>4.8 SUMMARY .....</b>	<b>159</b>
<b>REFERENCES .....</b>	<b>159</b>
<b>CHAPTER 5 HIGHER-ORDER CEPSTRA (POLYCEPSTRA) .....</b>	<b>163</b>
<b>5.1 INTRODUCTION .....</b>	<b>163</b>
<b>5.2 THE COMPLEX CEPSTRUM OF DETERMINISTIC ENERGY SIGNALS .....</b>	<b>164</b>
5.2.1 Signal Assumptions .....	164
5.2.2 Definition .....	165
5.2.3 Properties .....	166

5.2.4 Computation and Phase Unwrapping .....	167
<b>5.3 THE DIFFERENTIAL CEPSTRUM OF DETERMINISTIC ENERGY SIGNALS .....</b>	<b>169</b>
5.3.1 Definition .....	169
5.3.2 Properties .....	170
5.3.3 Computation .....	171
<b>5.4 THE POWER CEPSTRUM OF DETERMINISTIC AND STOCHASTIC SIGNALS .....</b>	<b>172</b>
5.4.1 Definition .....	172
5.4.2 Properties .....	173
5.4.3 Computation .....	174
<b>5.5 THE BICEPSTRUM AND TRICEPSTRUM OF DETERMINISTIC AND STOCHASTIC SIGNALS .....</b>	<b>177</b>
5.5.1 Definition .....	179
5.5.2 Properties .....	181
5.5.3 Computation .....	182
5.5.4 The Tricepstrum .....	185
<b>5.6 THE CEPSTRUM OF BICOHERENCY .....</b>	<b>187</b>
5.6.1 Definition .....	189
5.6.2 Properties .....	189
5.6.3 Computation .....	190
5.6.4 Computation of $A^{(m)}, B^{(m)}$ from Second- and Third-Order Statistics .....	191
<b>5.7 HIGHER-ORDER SPECTRUM FACTORIZATION AND INDEX FOR LINEARITY .....</b>	<b>191</b>
<b>5.8 INVERSE FILTER RECONSTRUCTION .....</b>	<b>193</b>
<b>5.9 THE CROSS-BICEPSTRUM OF DETERMINISTIC AND STOCHASTIC SIGNALS .....</b>	<b>200</b>
5.9.1 Preliminaries .....	200
5.9.2 Signal Assumptions .....	203
5.9.3 Definition .....	203
5.9.4 Properties .....	204

5.9.5 Computation .....	205
<b>5.10 ANALYTIC PERFORMANCE EVALUATION OF THE COMPLEX CEPSTRUM AND BICEPSTRUM .....</b>	<b>209</b>
5.10.1 Preliminaries and Problem Definition .....	209
5.10.2 The Complex Cepstrum Evaluation .....	211
5.10.3 The Bicepstrum Evaluation .....	214
<b>5.11 SUMMARY .....</b>	<b>215</b>
<b>REFERENCES .....</b>	<b>216</b>
<b>CHAPTER 6 NONPARAMETRIC METHODS FOR SIGNAL RECOVERY FROM HIGHER-ORDER SPECTRA .....</b>	<b>219</b>
<b>6.1 INTRODUCTION .....</b>	<b>219</b>
<b>6.2 MAGNITUDE AND PHASE ESTIMATION FROM HIGHER-ORDER SPECTRA .....</b>	<b>220</b>
<b>6.3 PHASE RECOVERY ALGORITHMS .....</b>	<b>220</b>
6.3.1 The Brillinger Algorithm .....	221
6.3.2 The Lii-Rosenblatt Algorithm .....	222
6.3.3 The Bartelt-Lohman-Wirnitzer Algorithm .....	223
6.3.4 The Matsuoka-Ulrych Algorithm .....	224
6.3.5 Phase Reconstruction from a 45° Slice of the Bispectral Phase .....	228
<b>6.4 PHASE AND MAGNITUDE ALGORITHMS BASED ON POLYSPECTRA/POLYCEPSTRA PROPERTIES .....</b>	<b>230</b>
6.4.1 Preliminaries .....	230
6.4.2 Bispectrum Signal Reconstruction (BSR) .....	231
6.4.3 Two-Dimensional Phase Unwrapping .....	233
6.4.4 Duality Between Phase and Magnitude Recovery .....	234
6.4.5 Treating Singularities in the Vicinity of the Unit Circle .....	235
<b>6.5 SIGNAL RECONSTRUCTION FROM ONLY THE PHASE OF THE BISPECTRUM .....</b>	<b>237</b>
6.5.1 The Importance of Signal Recovery from Partial Information .....	237
6.5.2 Conditions for Signal Reconstruction from the Phase of the Bicepstrum .....	239

6.5.3 The Bispectrum Iterative Reconstruction Algorithm (BIRA)	240
6.6 SIGNAL RECONSTRUCTION FROM THE BISPECTRUM BASED ON THE METHOD OF POCS .....	249
6.7 BLIND DECONVOLUTION USING BIRA .....	253
6.7.1 The Blind Deconvolution Scheme .....	254
6.7.2 Computation of the Differences of Cepstral Coefficients .....	256
6.8 SUMMARY .....	259
REFERENCES .....	261
<b>CHAPTER 7 PARAMETRIC METHODS FOR THE     ESTIMATION OF HIGHER-ORDER SPECTRA .....</b>	<b>265</b>
7.1 INTRODUCTION .....	265
7.2 MA METHODS .....	266
7.2.1 Closed Form Solutions .....	267
7.2.2 Optimization Methods .....	270
7.2.3 Parameter Estimation Based on ARMA and AR Approximations .....	271
7.2.4 The GM Method .....	276
7.3 NONCAUSAL AR METHODS .....	278
7.3.1 The Huzii Method .....	278
7.3.2 Cumulant Based Solutions .....	279
7.4 ARMA METHODS .....	282
7.4.1 Estimation of the ARMA Parameters from the System Impulse Response .....	282
7.4.2 Residual Time Series .....	284
7.4.3 The Double $c(q, k)$ Algorithm .....	286
7.4.4 The Q-Slice Algorithm .....	291
7.4.5 Identification of ARMA Systems Via Second- and Fourth-Order Cumulant Matching .....	293
7.5 MODEL ORDER DETERMINATION .....	295
7.5.1 MA Models .....	295
7.5.2 AR Models .....	304

7.5.3 ARMA Models .....	307
7.6 SUMMARY .....	307
REFERENCES .....	308
<b>CHAPTER 8 DIRECTION OF ARRIVAL ESTIMATION AND ANALYSIS OF TRANSIENT SIGNALS .....</b>	<b>313</b>
8.1 INTRODUCTION .....	313
8.2 TIME DELAY ESTIMATION .....	314
8.2.1 Problem Definition .....	314
8.2.2 Bearing and Range Estimation .....	315
8.2.3 Generalized Cross-Correlation (GCC) Method .....	317
8.2.4 Conventional TDE Methods Based on Third-Order Statistics	322
8.2.5 Parametric TDE Method in the Bispectrum Domain .....	327
8.2.6 TDE Method Based on the Cepstrum of the Cross-Bispectrum .....	331
8.2.7 TDE with the Mean Fourth-Cumulant (MFC) Criterion .....	332
8.3 BEARING ESTIMATION WITH HIGHER-ORDER STATISTICS	337
8.3.1 Problem Formulation .....	339
8.3.2 The Spatial Covariance Matrix .....	340
8.3.3 Bearing Estimation Based on the Spatial Covariance Matrix	342
8.3.4 The Spatial Fourth-Order Cumulant Matrix and Bearing Estimation .....	346
8.3.5 Bearing Estimation with Cross-Bispectrum Beamforming	352
8.3.6 MUSIC-Like Method Based on Cumulants .....	361
8.4 PARAMETER ESTIMATION OF TRANSIENT SIGNALS .....	366
8.4.1 Problem Formulation .....	366
8.4.2 The Third-Order Recursion Equation .....	367
8.4.3 Parameter Estimation Method .....	367
8.4.4 Parameter Estimation with Fourth-Order Moments .....	370
8.5 DETECTION OF TRANSIENT SIGNALS .....	371
8.5.1 Detection of Transient Signals Using the Bispectrum .....	373
8.5.2 Signal Detection Using Matched Filter Operations .....	375

8.6 SUMMARY .....	377
REFERENCES .....	378
<b>CHAPTER 9 ADAPTIVE FILTERING WITH HIGHER-ORDER STATISTICS .....</b>	<b>383</b>
9.1 INTRODUCTION .....	383
9.2 ADAPTIVE FILTERING WITH SECOND-ORDER STATISTICS .....	384
9.2.1 The Steepest Descent Method .....	385
9.2.2 The LMS Algorithm .....	387
9.2.3 The RLS Algorithm .....	388
9.3 THE LMF AND RLF ALGORITHM .....	390
9.3.1 The LMF Algorithm .....	392
9.3.2 The RLF Algorithm .....	396
9.4 ADAPTIVE IIR ALGORITHMS BASED ON HOS .....	397
9.4.1 An Adaptive Algorithm for MA Processes Based on Third-Order Cumulants .....	397
9.4.2 Adaptive Algorithms for ARMA Processes .....	400
9.5 ADAPTIVE LATTICE LINEAR PREDICTION USING CUMULANTS .....	402
9.6 ADAPTIVE MA MODEL ESTIMATION VIA NONCAUSAL AR APPROXIMATIONS .....	406
9.7 ADAPTIVE TIME DELAY ESTIMATION .....	414
9.8 ADAPTIVE BLIND EQUALIZATION ALGORITHMS .....	418
9.8.1 The Bussgang Techniques .....	422
9.8.2 The Polyspectra Algorithms .....	427
9.9 SUMMARY .....	441
REFERENCES .....	443
<b>CHAPTER 10 DETECTION AND CHARACTERIZATION OF NONLINEARITIES IN TIME SERIES .....</b>	<b>447</b>
10.1 GENERAL VOLTERRA SYSTEMS .....	448
10.2 SECOND-ORDER VOLTERRA FILTERS .....	448

10.2.1 Identification Assuming Gaussian Input and Access to Both Input and Output .....	449
10.2.2 Identification Assuming a Simple Linear Term and White Unobservable Input .....	451
10.2.3 Identification Assuming General Non-Gaussian Input: Three-Wave Coupling Equation .....	453
<b>10.3 THE IDENTIFICATION OF A PARTICULAR NONLINEAR TIME SERIES SYSTEM .....</b>	<b>455</b>
<b>10.4 QUADRATIC PHASE COUPLING .....</b>	<b>459</b>
10.4.1 Conventional Techniques for Detection and Quantification of Quadratic Phase Coupling .....	461
10.4.2 Parametric Methods for the Detection of Phase Coupling .....	465
10.4.3 Time-Domain Approach to Quadratic Phase Coupling Estimation .....	476
<b>10.5 CUBIC PHASE COUPLING .....</b>	<b>482</b>
<b>10.6 SUMMARY .....</b>	<b>483</b>
<b>REFERENCES .....</b>	<b>484</b>
<b>CHAPTER 11 TIME-FREQUENCY DISTRIBUTIONS BASED ON HIGHER-ORDER SPECTRA .....</b>	<b>487</b>
<b>11.1 INTRODUCTION .....</b>	<b>487</b>
<b>11.2 WIGNER-VILLE DISTRIBUTION (WD) .....</b>	<b>488</b>
<b>11.3 COHEN'S GENERAL CLASS OF TIME-FREQUENCY DISTRIBUTIONS .....</b>	<b>491</b>
11.3.1 Reduced Interference Distributions .....	492
<b>11.4 WIGNER HIGHER-ORDER MOMENT SPECTRA: CONTINUOUS CASE .....</b>	<b>494</b>
11.4.1 Definition .....	495
11.4.2 Properties .....	496
11.4.3 General Class of Time-Frequency Higher-Order Spectra-Based Distributions .....	501
11.4.4 Reduced Interference Higher-Order Distribution (RIHOD) .	502

<b>11.5 WIGNER POLYSPECTRA: DISCRETE CASE .....</b>	<b>503</b>
11.5.1 Discrete Time WHOMS (DT-WHOMS) .....	504
11.5.2 Discrete Frequency WHOMS (DF-WHOMS) .....	504
11.5.3 Discrete Time and Frequency WHOMS (DTF-WHOMS) ...	505
11.5.4 Computation of DTF-WHOMS .....	507
11.5.5 Relation Between the WHOMS and the DTF-WHOMS After Sampling .....	508
<b>11.6 APPLICATIONS OF WIGNER HIGHER-ORDER SPECTRA ...</b>	<b>512</b>
<b>11.7 SUMMARY .....</b>	<b>520</b>
<b>REFERENCES .....</b>	<b>520</b>
<b>CHAPTER 12 CURRENT AND FUTURE TRENDS .....</b>	<b>525</b>
<b>REFERENCES .....</b>	<b>526</b>
<b>INDEX .....</b>	<b>529</b>
