

# TABLE OF CONTENTS

## ELECTRONIC MATERIALS & PROCESSES SYMPOSIUM

Chairman: Ronald N. Sampson, *Westinghouse Research Labs.*

### ELECTRONIC MATERIALS & PROCESSES DIVISION

Manager: James J. Licari, *Autonetics/Rockwell*

Tuesday 9/27/77

2:00 PM Ball Room

#### New Developments in Electronic Insulating Materials

Director: R.D. Hutchens, *AF Materials Lab/LTE, Wright-Patterson A.F.B.*

Co-Director: John Bart, *RADC/RBRP, Griffiss A.F.B.*

#### Internal Conformal Coatings for Microcircuits

G.T. Malloy, A.R. Mastro, J.K. Whittington, *Hughes Aircraft*  
and R.D. Hutchens, *Wright-Patterson A.F.B.* 1

#### Polyimide—An Emerging Printed Wiring Laminate Material

Larry E. Hayes and Rose E. Mayfield, *McDonnell Douglas Electronics Company* 7

#### Characteristics and Application of Triazine Resins

Morio Gaku, Kazuhiro Suzuki and Nobuyuki Ikeguchi, *Mitsubishi Gas Chemical Co., Inc.*, Tokyo, Japan 11

#### Ultraviolet Curable Covercoat Material for Flexible Circuitry

J.E. Rie, C.W. Garstang and C.R. Morgan, *W.R. Grace & Co.* 15

#### Microwave Packaging & Processing

Wednesday 9/28/77

3:00 PM PDR #16

Director: Frank Sullivan, *Raytheon*

Co-Director: Harold Sobol, *Collins Radio, Rockwell International*

#### Productizing A Garnet Phase Shifter and Driver

S. Gaglione, G. Hanley and J. Hecker, *Sperry Gyroscope Co.* 20

#### Producibile Design of Mic Phase Shifters for Phased Array Applications

Mark E. Davis, *General Electric Co.* 24

#### Millimeter Ferrite Phase Shifters Using Arc Plasma Spray Fabrication Techniques

Richard W. Babbitt and Richard A. Stern, *U.S. Army Electronics Technology and Devices Laboratory* 26

#### A Microstrip Slotted Line for Microwave Two-Port Device Characterization

J.P. Quine, J.G. McMullen and N.T. Lavoo, *General Electric Company* 31

#### Microwave Substrate Materials

PDR #16

Director: Frank Sullivan, *Raytheon*

Co-Director: Harold Sobol, *Collins Radio, Rockwell International*

#### Pyrolytic Boron Nitride As A Microstrip Substrate Material

C.M. Krowne and T.E. Washburn, *Watkins-Johnson Company* 35

#### Electrical Measurements of Microwave Circuit Board Materials

G. Robert Traut, *Rogers Corporation* 39

#### Low Dielectric Substrates for MIC's at Millimeter Wave Frequencies

John Reindel, *Naval Ocean Systems Center* 45

#### Composite Epoxy Glass-Microsphere Dielectric for Hermetic SMA Type RF Connectors

Patricia A. Fritzen and Peter J. Planting, *Hewlett-Packard Co.* 49

#### Hybrid Microelectronics

9:00 AM Crystal Room

Director: Donald B. Patterson, *GTE Sylvania*

Co-Director: J.R. DiNitto, *Raytheon Missile Systems Div.*

#### Electrically Insulative Adhesives For Hybrid Microelectronic Fabrication

G.W. Brassel, *Union Carbide Corp.* and D.R. Fancher, *Hughes Aircraft Company* 56

#### Corrosion Characteristics Of Passivated And Unpassivated Al-to-PtAg Wire Bonds Under Accelerated Temperatures-Humidity Conditions

Subash Khadpe, *Motorola, Inc.* 61

#### Reliability Assessment Of Hybrid Encapsulants: Fluorinated Network Polymeric Materials And Silicones

A. Christou, *Naval Research Laboratory* 65

#### Metallization of Beryllia Ceramics for Microelectronics Use

John Devore, *General Electric* 70

#### New Developments in Electronic Insulating Materials

Monroe Room

Director: F. J. McGarry, *Rogers Corporation*

#### A Flex Circuit Composite Based On A Fiber Blend

Richard T. Traskos, *Rogers Corp.* 72

#### TEFLON Stripline Printed Boards—Consider The Thermal Properties Of This Dielectric

Thomas D. Newton, *Rockwell International* 75

#### High Reliability With The Dry-Film Solder Mask System

J.J. Hickman, R.F. Register, and L.R. Wallig, *Du Pont Co.* 80

#### New Liquid Silicone Rubber Products For Electronics Applications

J.W. Hawkins, *General Electric Company* 86

## ELECTRONIC CIRCUITRY DIVISION

Manager: John D. Kresge, *I.B.M. Corporation*  
Asst. Mgr.: J.W. Balde, *Western Electric Co.*

### Innovations In Circuitry

Director: Gordon Wheaton, *Hewitt-Packard Corp.*  
Co-Director: F. Bachner, *MIT Lincoln Laboratory*

<b>Chip-Module-Package Interfaces</b>	
D.P. Seraphim, <i>IBM</i>	90
<b>Fiber Optics Impact On Printed Wiring And Insulation Markets</b>	
Jeff D. Montgomery, <i>Gnostic Concepts, Inc.</i>	94
<b>A UV-Curable Solder Mask For Flexible Printed Circuitry—From Evaluation To Manufacturing</b>	
Gerald Fefferman, <i>Bell Laboratories</i>	97
<b>Direct Chip Attach</b>	
S.K. Wadhwa, <i>IBM</i>	102

### Systems Packaging Concepts

#### Crystal Room

Director: William Schumacher, *AMP Incorporated*  
Co-Director: Leonard S. Buchoff, *Hulltronics, Inc.*

<b>Polymer Thick Film Circuits on Printed Circuit Boards</b>	
F. Wayne Martin, <i>Method Development Company</i>	105
<b>Radiation Curable Conductive Ink</b>	
D.A. Bolon, G.M. Lucas and S.H. Schroeter, <i>General Electric Company</i>	108
<b>An Improved Materials System For Maintaining High Resistivity Of Electrical Insulation In Humid Environments</b>	
Charles A. Harper, <i>Westinghouse Electric Corp.</i>	112
<b>Solving The Design Problems Of A ZIF Connector To Accept Leaded LSI Packages</b>	
Gabe Cherian, <i>AMP Incorporated</i>	117
<b>Bare Copper Circuits On Ultra-Thin Copper Foil Clad Laminates</b>	
Jiri Konicek, <i>Perstorp U.S., Inc.</i>	124

## ELECTRICAL MATERIALS & PROCESSES SYMPOSIUM

Chairman: George I. Duncan, *Advance Transformer Company*

## INSULATION REPAIR AND MAINTENANCE DIVISION

Wednesday 9/28/77

8:30 AM Wabash Parlor

Chairman: George I. Duncan, *Advance Transformer Company*

### Panel Discussion: New Considerations in Repair and Maintenance of Electrical Equipment

Director: Horace B. Barks, Publisher, *Electrical Apparatus, Barks Publications, Inc.* 127B

## Insulation Repair and Maintenance of Rotating Equipment

Wednesday 9/28/77

3:00 PM Wabash Parlor

Director: Robert Sandman, *Sandman Electric*

<b>Let Us Recycle, Not Scrap</b>	
Donald E. Hertz, <i>Rems Corporation</i>	128
<b>Techniques of Temperature Limiting Burnoff Process for Form Wound Stators</b>	
Melvin W. Stark, <i>Louis Allis Company</i>	130
<b>A Potentiometer and Voltage Gradient Method for Locating Ground Faults in a Wound Electrical Machine Stator</b>	
Jimmy S. Chan, <i>National Electric Coil</i>	134
<b>Surge Comparison Testing of Rotating Machines</b>	
Gary L. Shook and David E. Schump, <i>Baker Instrument Company</i>	137
<b>The Art of Winding Random Wound Motors</b>	
Fred S. Stephens, <i>S/W Enterprises</i>	141

## Insulation Repair and Maintenance of Transformers

Thursday 9/29/77

9:00 AM Crystal Room

Director: R.M. Blazak, *REMS Corp.*

<b>Desludging of Energized Power Transformers</b>	
Robert Parish and Joseph J. Kelly, <i>Transformer Consultants</i>	146
<b>Periodic Testing and Maintenance of Power Transformers to Extend Life and Improve Reliability</b>	
Stephen D. Smith, <i>SUNOHIO</i>	156
<b>Development of Methods to Retrofill Transformers with Silicone Transformer Liquid</b>	
William C. Page and Terry Michaud, <i>Dow Corning Corporation</i>	159
<b>Silicone Retrofill of Askarel Transformers</b>	
Terry O'Neil and Joseph J. Kelly, <i>Transformer Consultants</i>	167
<b>Power Factors of Askarel and Askarel-Filled Transformers</b>	
Karl Stutz and Joseph J. Kelly, <i>Transformer Consultants</i>	171
<b>On-Line Incipient Fault Detector</b>	
Robert A. Kurz, <i>Westinghouse Electric Corp.</i>	174

## MOTOR & GENERATOR DIVISION

Manager: E.J. Michaels, *Louis Allis Company*

## Insulation for Small Intermediate Sized Rotating Machines

Tuesday 9/27/77

9:00 AM Wabash

Director: Virgil Scardina, *Allis Chalmers*  
Co-Director: Gerald B. Fleeson, *Sterling Chemical Division, Reichold Chemicals, Inc.*

<b>Mechanical Fatigue Strength of Micaceous Composite Insulation</b>	
Kyoichi Shibayama and Tatsuo Kitagawa, <i>Mitsubishi Electric Corp., Amagasaki, Hyogo, Japan</i>	179
<b>Energy Utilization in Curing Insulating Varnishes</b>	
C.H. Beckett, <i>Bayco Industries of California</i>	183

<b>Evaluation of Slot Wedge Material</b>	
H.A. Wroblewski, W.J. Day and M.L. Donnell, <i>McGraw-Edison Company</i>	186
<b>A New Navy Classification Criterion for Insulation Life</b>	
E.L. Brancato, L.M. Johnson, F.J. Campbell, <i>Naval Research Laboratory</i>	188
<b>Minimizing Insulation Failure Damage: Progress in Life Test Protection Schemes</b>	
Delmar E. Crawford, <i>General Electric Co.</i>	194

### Insulation for Large Form Wound Rotating Machines

Wednesday 9/28/77

3:00 PM Monroe Room

Director: Louis R. Zenker, *Louis Allis Company*  
Co-Director: H.C. Lauroesch, *General Electric Company*

<b>New Type of Turn Insulation for Medium-Sized, High-Voltage Electrical Machines</b>	
L.G. Virsberg and A. Bjorklund, <i>ASEA</i>	199
<b>Compatibility Studies with Mica Bonds and Solventless Epoxy Impregnants for Form-Wound Stators</b>	
J.D.B. Smith and A.I. Bennett, <i>Westinghouse Research and Development Center</i>	202
<b>VIPAK<sup>RII</sup>—Insulation System for Form Wound Coils in High Voltage Applications</b>	
G. Harold Miller, <i>Keene Corporation</i>	206
<b>Mechanical Fatigue Characteristics of High Voltage Generator Insulation</b>	
A. Futakawa, S. Hirabayashi, T. Tani, K. Shibayama, <i>Mitsubishi Electric Corp.</i> , Amagasaki, Hyogo, Japan	209
<b>A New Class F Armature Insulation System for Turbine-Generators</b>	
H.N. Galpern and G.H. Vogt, <i>General Electric Company</i>	215
<b>Experience with Post Cured Insulation Systems for Large Form Wound Machines</b>	
R.H. Schuler, <i>Brown, Boveri and Company Ltd.</i>	220

## NEW MATERIALS TECHNOLOGY DIVISION

Manager: B.D. Pratt, *Owens Corning Fiberglas*

### Composite Materials

Tuesday 9/27/77

9:00 AM State Ballroom

Director: D.D. Bergh, *General Electric Company*

<b>Mica Paper Insulations for Conductors and Cables</b>	
W.H. Andres, <i>Insulation Systems Isola Ltd.</i>	225
<b>Fiberglass Rod for Electrical/Mechanical Applications</b>	
John Haarsma, <i>Joslyn Mfg. and Supply Co.</i>	231
<b>A Novel Method for Evaluating High Temperature Mechanical and Thermal Properties of Laminated Thermosetting Insulating Plastics</b>	
C.J. Photiadis and S. A. Gause, <i>Westinghouse Electric Corp.</i>	234
<b>Continuous Filament Ceramic Fiber Refractory Insulation</b>	
George F. Everitt, <i>3M Company</i>	236

## New Materials & Processes—1

Wednesday 9/28/77

8:30 AM Adams Room

Director: T.H. Klein, *Bell Laboratories*

<b>New Impregnating Materials with a Thermal Rating of 155 to 180°C</b>	
Rudolf Steinhaus, <i>BASF Farben + Fasern AG/Beck</i>	
<b>Heat-Shrinkable Tubing: What Makes It Tick?</b>	
Robert Timmerman, <i>Essex Group, Inc.</i>	246
<b>P-Vinyl Phenol Polymer—A Highly Heat Resistant New Material for Insulation</b>	
Asao Takahashi, <i>Maruzen Oil Co., Ltd.</i> and Masaru Shimizu, <i>Maruzen Oil of U.S.A., Inc.</i>	252
<b>Electron Processing of Dielectric Materials</b>	
A.S. Denholm and S.V. Nablo, <i>Energy Sciences Inc.</i>	257
<b>Polyarylsulfones as Electrical Insulation</b>	
R.M. Eichhorn and C.E. McChesney, <i>Union Carbide Corporation</i>	264

## New Materials & Processes—2

Thursday 9/29/77

9:00 AM Monroe Room

Director: D. Douglas Ward, *Rostone Corporation*

<b>A New Class-H Thermally Stable Casting Resin for Large Molds</b>	
H. Yokono, S. Numata and M. Koto, <i>Hitachi Research Laboratory</i>	270
<b>Chemical and Dielectric Properties of Oil-Impregnated All Polypropylene Film Power Capacitor Insulation System</b>	
Y. Ishioka, S. Yasufuku, T. Umemura, Y. Yasuda, <i>Tokyo Shibaura Electric Company</i>	273
<b>Inorganic Insulations for High Voltage Dry Type Transformers</b>	
Michael W. Eisele, <i>Quin-T Corporation</i>	279
<b>Polyurethane Casting Resins for Electrical Applications</b>	
G. Lottanti and K. Schiegg, <i>Micafil Ltd.</i>	283
<b>Unsaturated Polyester Resins for Vacuum Pressure Impregnation</b>	
Richard H. Ferro, <i>General Electric Co.</i>	289

## Magnet Wire Coatings and Varnishes—1

Tuesday 9/27/77

9:00 AM Red Lacquer Room

Director: R.F. Weddleton, *Westinghouse Electric Corp.*

<b>High Speed Multiple Insulation Tapes Application</b>	
John M. Townsend, <i>The Magna-Ply Company</i>	292
<b>Linear Paper Insulated Rectangular Magnet Wire</b>	
G. Daniel Hilker and James E. Bodette, <i>Phelps Dodge Magnet Wire Company</i>	295
<b>Concepts of Magnet Wire Film Materials Costs</b>	
Richard E. Zauner, <i>General Electric Company</i>	300
<b>Heat Resistant Magnet Wire Insulation Based on Acrylic Enamels</b>	
Kyoichi Shibayama, Hiroshi Ono, Megumi Kawahara, <i>Mitsubishi Electric Corp.</i> ; Yukio Hiraoka, Yoshinobu Noda, <i>Dianichi Nippon Cables Ltd.</i>	303
<b>Class H Solventless Encapsulants—Unsaturated Polyester Development and Evaluation</b>	
William L. Martin, Jr., <i>The P.D. George Co.</i>	309

**Panel Discussion:  
Standards for Insulating Materials**

**Wednesday 9/28/77**

**3:00 PM Red Lacquer Room**

Director: H.J. Stremba, *American Society for Testing & Materials*  
313A

**Transformers**

**Tuesday 9/27/77**

**2:00 PM Monroe Room**

Director: E.T. Norton, *E.P.R.I.*  
Co-Director: Tom Rouse, *General Electric Corp.*  
Co-Director: Earl L. Morrison

**TRANSMISSION & DISTRIBUTION DIVISION**

Manager: R.W. Samm, *Electric Power Research Institute*

**Insulated Power Cable**

**Tuesday 9/27/77**

**9:00 AM Monroe Room**

Director: Thomas F. Garrity, *E.R.D.A.*  
Co-Director: Al Zanona, *Commonwealth Edison Co.*

**Improved Unitary and Multicomponent Gaseous Insulators**

M.O. Pace, L.G. Christophorou, D.R. James, R.Y. Pai, R.A. Mathis and D.W. Bouldin, *Oak Ridge National Laboratory*  
313

**The Voltage Endurance of Cast and Molded Resins**

T.W. Dakin and S.A. Studniarz, *Westinghouse Research and Development Center*  
318

**Epoxy Casting Composition for UHV Service in Compressed SF<sub>6</sub> Insulated Equipment**

Terrence E. Chenoweth and Fred A. Yeoman, *Westinghouse Electric Corp.*  
322

**Glass As A Dielectric For High Voltage Cable Systems**

M.C. Weinberg and G.L. Glen, *Owens-Illinois, Inc.*; E.D. Eich and J.A. Williams, *Power Technologies, Inc.*; D.R. Uhlmann and R. Straff, *Massachusetts Institute of Technology*  
327

**Progress in Insulator Development for Flexible Gas Insulated Transmission Systems**

T.F. Brandt, P.C. Netzel, J.Z. Ponder, *Gould Inc.*  
331

**Switchgear Insulation**

**Thursday 9/29/77**

**9:00 AM Adams Room**

Director: Glen Bates, *E.R.D.A.*  
Co-Director: Al Zanona, *Commonwealth Edison Co.*

**SF<sub>6</sub> Epoxy Foam—A Novel Electrical Insulation Material**

B.G. Giessner, *Gould Inc.*  
336

**Selection of Insulating Materials Used in SF<sub>6</sub> Circuit Breakers**

K.H. Yoon, *Westinghouse Electric Corp.*  
340

**Arc Resistance Testing of Materials Under Various Gaseous Atmospheres**

D.H. Reighter, *Gould Inc.*  
346

**A Test for the Effect of High Energy Arcs on the Flash-Over Strength of Insulators in Compressed SF<sub>6</sub>**

R.E. Wooton, F.T. Emery, *Westinghouse R&D Center*; Alan H. Cookson, *Westinghouse CGIT Laboratory*  
351

**The Correlation of Chemical, Electrical, and Mechanical Changes in CAVALITE T During Thermal Aging in an Oil Filled Transformer Environment**

William F. Graham and John D. Craig, Jr., *E.I. DuPont de Nemours & Company, Inc.*  
356

**Large Capacity Class-H Resin Molded Transformer**

S. Isobe, N. Ikemoto, Y. Kihara, K. Asakura, *Hitachi Ltd.*  
363

**Conductor Insulation Requirements for Large High Voltage Power Transformers**

H.R. Moore, L.N. Arnold, L.S. McCormick, *Westinghouse Electric Corporation*  
368

**Aging and Life Testing of Transformer Insulation Systems in Polydimethylsiloxane**

G.H. Kaufmann and W.A. Fessler, *General Electric*  
372

**Panel: Fluid Dielectrics**

**Tuesday 9/27/77**

**9:00 AM Adams Room**

Director: William E. Shula, *E.P.R.I.*  
Co-Director: Eric O. Forster, *Exxon Research & Engrg. Co.*  
Co-Director: James S. Nelson, *General Electric Co.*

**Panel Discussion: Dielectric Fluids Fire Safety Issues**

Forster, Moderator  
377

**Panel Discussion: Environmental Issues**

Nelson, Moderator  
378

**Magnet Wire Coatings and Varnishes**

**Tuesday 9/27/77**

**2:00 – 5:00 PM**

Director: William J. Schnyder, *Emerson Electric Company*  
Co-Director: Robert W. Schneider, *Gould, Inc.*

**Film – “How Magnet Wire Is Made” by Phelps Dodge Magnet Wire**

**Dissipation Factor as a Systems Test**

Kenneth C. Heckeler, *Schenectady Chemicals, Inc.*  
379

**Magnet Wire Aluminum Alloy Conductors and Coil Winding**

Ernest A. Goodman, *Ernest A. Goodman, Inc.*  
382

**Up-Dating Nema Magnet Wire Standards**

R. O. Roberds, *Hudson Wire Company*  
386

**Entering The Second Generation of Control of Extrusion**

D. Swing, *Autometrix*
