## VOLUME 1

### Plenary Talks

Progress in MR Systems for Medical Applications .....	1
<i>I. Mano</i>	
Current Status of Maglev Transportation System in the World .....	9
<i>J. Fujie</i>	
Present Achievements and Prospects for Superconducting Tokamaks in the World .....	18
<i>P. Komarek</i>	
World's Achievements in the Development of Superconducting Materials at Liquid Helium Temperature .....	27
<i>K. Inoue</i>	

## High Energy Physics I

First Nb <sub>3</sub> Sn, 1 m Long Superconducting Dipole Model Magnets for LHC Break the 10 Tesla Field Threshold . . . . .	36
<i>A. Asner, R. Perin, S. Wenger and F. Zerobin</i>	
First Results of the High-Field Magnet Development for the Large Hadron Collider . . . . .	42
<i>The CERN LHC Magnet Team, reported by R. Perin</i>	
Design and Construction of a Twin-Aperture Prototype Magnet for the CERN LHC Project . . . . .	48
<i>D. Hagedorn, Ph. Lebrun, D. Leroy, R. Perin, J. Vlogaert and A. McInturff</i>	
Coupling Losses in a Superconducting Model Magnet for the LHC . . . . .	54
<i>P. Tixador, D. Leroy and L. Oberli</i>	
Critical Current Measurements of Prototype Cables for the CERN LHC up to 50 kA and Between 7 and 13 Tesla Using a Superconducting Transformer Circuit . . . . .	60
<i>H.H.J. ten Kate, B. ten Haken, S. Wessel, J.A. Eikelboom and E.M. Hornsveld</i>	
Development of a 10 T Nb <sub>3</sub> Sn ‘Twin Aperture’ Model Dipole Magnet for the CERN LHC . . . . .	66
<i>H.H.J. ten Kate, C. Daum, L.J.M. van de Klundert, H. Bode, W. Hoogland, J.D. Elen, F. van Overbeeke and R. Perin</i>	
Magnetic Fields and Lorentz Forces in an LHC Dipole Magnet: 3-D Analysis Using the FEM Program TOSCA . . . . .	72
<i>D. ter Avest, C. Daum and H.H.J. ten Kate</i>	
Measurements of Quench Propagation Velocity along a Super-stabilized Conductor . . . . .	78
<i>A. Devred</i>	
Mechanical Analysis of Different Yoke Configurations for the SSC Dipole . . . . .	85
<i>M.S. Chapman, J.M. Cortella, R.I. Schermer and R.H. Wands</i>	
Investigation of Heater-Induced Quenches in a Full-Length SSC R&D Dipole . . . . .	91
<i>A. Devred, M. Chapman, J. Cortella, A. Desportes, J. DiMarco, J. Kaugerts, R. Schermer, J.C. Tompkins, J. Turner, J.G. Cottingham, P. Dahl, G. Ganetis, M. Garber, A. Ghosh, C. Goodzeit, A. Greene, J. Herrera, S. Kahn, E. Kelly, G. Morgan, A. Prodell, E.P. Rohrer, W. Sampson, R. Shutt, P. Thompson, P. Wanderer, E. Willen, M. Bleadon, B.C. Brown, R. Hanft, M. Kuchnir, M. Lamm, P. Mantsch, P.O. Mazur, D. Orris, J. Peoples, J. Strait, G. Tool, S. Caspi, W. Gilbert, C. Peters, J. Rechen, J. Royer, R. Scanlan, C. Taylor and J. Zbasnik</i>	
Design of a Very High Field Magnet for an SSC Detector . . . . .	96
<i>H. Hirabayashi, A. Maki, S. Terada, K. Tsuchiya, T. Akiyama, T. Doi, H. Kakui and T. Oba</i>	
Study of the Current Carrying Element of the Superconducting Dipole Magnet for the UNK . . . . .	102
<i>A.N. Baidakov, K.P. Myznikov, L.S. Shirshov, V.P. Snitko, A.N. Surkov, V.V. Sytnik, N.V. Taran, V.A. Vasiliev, M.G. Vybornov and A.V. Zlobin</i>	
Heat Load on a Superconducting UNK Dipole . . . . .	107
<i>A.I. Ageyev, Yu.G. Bozhko, E.M. Kashtanov, S.S. Kozub, K.P. Myznikov, Ya.V. Shpakovich, V.V. Sytnik, A.V. Tarasov and A.A. Zolotov</i>	

Study of the Models of Superconducting Dipole Magnet for the UNK . . . . .	111
<i>A.I. Ageyev, N.I. Andreyev, V.I. Balbekov, V.I. Dolzhenkov, K.F. Gertsev, V.I. Gridasov, K.P. Myznikov, A.P. Orlov, N.L. Smirnov, V.V. Sytnik, N.M. Tarakanov, L.M. Tkachenko, Yu.V. Vanenkov, L.M. Vasiliev, V.A. Vasiliev, V.V. Yelistratov and A.V. Zlobin</i>	
Experimental Study of Cooldown and Warmup of a UNK Superconducting Dipole . . . . .	117
<i>A.I. Ageyev, Yu.G. Bozhko, K.P. Myznikov, A.N. Shamichev, V.V. Sytnik, A.V. Tarasov and A.V. Zhirnov</i>	
Magnetic System of the Pulse Stretcher Ring PSR-2000 . . . . .	121
<i>P.I. Gladkikh, Yu.N. Grigor'ev, S.V. Efimov, A.Yu. Zelinskij, I.M. Karnaukhov, S.G. Kononenko, N.I. Mocheshnikov, A.S. Tarasenko, A.A. Shcherbakov, M.G. Nagaenko, A.V. Popov, B.V. Rozhdestvenskij and N.F. Shilkin</i>	
The Bending Magnet System of LEP . . . . .	125
<i>M. Giesch and J.P. Gourber</i>	
Construction of the L3 Magnet . . . . .	130
<i>F. Wittgenstein, A. Hervé, M. Feldmann, D. Luckey and I. Vellitsky</i>	
Critical Current Measurements of Superconducting Cables for HERA Dipole Magnets Using the Facility MA.RI.S.A. . . . .	136
<i>P. Fabbriatore, R. Musenich, R. Parodi and R. Vaccarone</i>	
Time Dependence of Persistent Current Effects in the Superconducting HERA Magnets . . . . .	141
<i>H. Brück, Z. Jiao, D. Gall, G. Knies, J. Krzywinski, R. Meinke, H. Preissner and P. Schmüser</i>	
Performance of the Superconducting Magnets for the HERA Accelerator . . . . .	147
<i>H.R. Barton Jr, R. Bouchard, Y. Bi, H. Brück, M. Dabrowska, D. Darvill, W. He, Z. Chen, Z. Jiao, D. Gall, G. Knies, J. Krzywinski, J. Kulka, A. Ladage, R. Lange, L. Lin, A. Makulski, R. Meinke, F. Müller, K. Nesteruk, J. Nogiec, H. Preissner, W. Rakoczy, P. Schmüser, M. Surala, E. Schnacke, Z. Skotniczny and W. Shi</i>	

### High Energy Physics II

Industrial Series Fabrication of 722 Superconducting Dipole- and Sextupole/Quadrupole-Correction Magnets for the HERA Proton Storage Ring by Holec, Ridderkerk, The Netherlands . . . . .	153
<i>H.J. Israël, P.A.M. Bracké, P. Schmüser and C. Daum</i>	
Structural Analysis of the LHC 10 T Twin-Aperture Dipole . . . . .	159
<i>D. Leroy, R. Perin, D. Perini and A. Yamamoto</i>	
Development of Superconducting Dipole Magnets for Accelerator . . . . .	165
<i>K. Asano, T. Yamagiwa and T. Shintomi</i>	
Superconducting Quadrupole Magnets for the TRISTAN Low-Beta Insertion . . . . .	171
<i>K. Tsuchiya, N. Ohuchi, A. Terashima, H. Nakayama, K. Egawa, S. Takasaki, K. Asano, R. Hoshi and T. Yamagiwa</i>	
Training in High-Performance Superconducting Dipole Magnets and Room-Temperature Acoustic Signal Attenuation . . . . .	176
<i>O.O. Ige and Y. Iwasa</i>	

Development of Superconducting Dipole Magnet with Ideal Arch Structure Using Large Keystone Angle Cable . . . . .	181
<i>T. Shintomi, A. Terashima and H. Hirabayashi</i>	
The TBA Prototype Dipole Magnet of SRRC . . . . .	187
<i>C.H. Chang, C.S. Hwang, J.C. Lee, W.C. Chou, J.H. Huang, P.K. Tseng, C.S. Hsue and G.J. Hwang</i>	
Design of the Sextupole Magnet for an 8 GeV Storage Ring . . . . .	194
<i>J. Ohnishi and S. Motonaga</i>	
Development of a Superconducting Sextupole–Dipole Corrector Magnet . . . . .	200
<i>A. Ijspeert, R. Perin, E. Baynham, P. Clee, R. Coombs, J. Wheatley and D. Willis</i>	
Towards the Realization of Two 1.2 Tesla Superconducting Solenoids for Particle Physics Experiments . . . . .	206
<i>P.T.M. Clee and D.E. Baynham</i>	
Main Results of Magnetic Measurements on the OAE Modification of SSC2 (the Second Separated Sector Cyclotrons of GANIL) . . . . .	212
<i>D. Bibet, M. Barré, J. Blanchet, M. Duval, Cl. Eveillard, J. Fermé, A. Lemarié, M. Legay and J.F. Libin</i>	
The Upgrade of MA.RI.S.A. Facility from 6.5 to 10 Tesla: Design, Construction and Preliminary Test . . . . .	218
<i>S. Angius, P. Fabbriatore, R. Marabotto, R. Musenich, R. Parodi, M. Perrella, S. Pepe and R. Vaccarone</i>	
Dynamic and Magnetic Behaviour of Large Superconducting Coils in the Magnet of the Milan Heavy Ion Cyclotron . . . . .	223
<i>E. Acerbi and L. Rossi</i>	
ZEUS Magnets Construction Status Report . . . . .	229
<i>A. Bonito Oliva, F. Bordin, O. Dormicchi, G. Gaggero, M. Losasso, R. Penco, N. Valle, R. Bruzzese, M. Spadoni, N. Sacchetti and Q. Lin</i>	
Magnet Design Studies for the TRIUMF KAON Factory Proposal . . . . .	235
<i>A.J. Otter, L. Ellstrom, C. Haddock, M. Harold, P. Reeve, H. Sasaki and P. Schwandt</i>	
Development of Superconducting Bending Magnets for the SR Ring . . . . .	241
<i>T. Okazaki, Y. Hosoda, S. Isojima, T. Keishi, C. Suzawa and T. Masuda</i>	

### High Energy Physics III

Three Dimensional Magnetic Field Analysis for 5 m Superconducting Dipole Magnet . . . . .	247
<i>H. Hirabayashi, T. Shintomi, K. Kondo, M. Yamaguchi, S. Itoh, S. Murai and M. Hirano</i>	
Analysis of the Performance of the Eight Superconducting Quadrupoles for the LEP Low-Beta Insertions . . . . .	253
<i>P.J. Ferry, D. Semal, Ph. Lebrun, O. Pagano, S. Pichler, T.M. Taylor, T. Tortschanoff, L. Walckiers and L. Williams</i>	
Numerical Analysis of the Voltage Current Transition in Superconducting Cables . . . . .	259
<i>D. ter Avest and L.J.M. van de Klundert</i>	

Design of an AC Magnetic Biasing Circuit for the KAON Factory Booster RF Cavity . . . . .	264
<i>C. Haddock, R.L. Poirier, A. Otter, T. Energren and M. Zanolli</i>	
Dipole and Quadrupole Magnets Design with 2D and 3D Electromagnetic Analysis Codes . . . . .	270
<i>P. Molfino, M. Repetto, A. Matrone and P. Prati</i>	
Pole Shaping for Improving the Deviation of the Effective Length in Thin Quadrupole Magnets . . . . .	275
<i>S. Yamamoto, M. Morita, T. Matsuda and T. Yamada</i>	
Three Dimensional Analysis of a Deflection Yoke with Surface Charge Method . . . . .	280
<i>T. Nakagawa and S. Okuda</i>	
Quench Behaviour of a Thin Solenoid Model . . . . .	285
<i>A. Bonito Oliva, G. Masullo, O. Dormicchi, G. Gaggero and R. Penco</i>	
High Precision Automatic Magnetic Field Mapping System for the Dipole Magnet . . . . .	291
<i>C.S. Hwang, W.C. Chou, J.H. Huang, M.Y. Lin, T. Chang and P.K. Tseng</i>	
Field Inhomogeneity Effects on the Relation Between Short Sample Critical Current and the Quench Current of High Field Dipole Magnets . . . . .	297
<i>P. Fabbriatore, R. Musenich and R. Parodi</i>	
Three-Dimensional Computation of Magnetic Fields and Lorentz Forces of an LHC Dipole Magnet Using the Method of Image Currents . . . . .	302
<i>C. Daum and D. ter Avest</i>	
The Magnetic Design and Field Measurement of Fermilab Collider Detectors: CDF and D0 . . . . .	308
<i>R. Yamada</i>	

### High Energy Physics IV

A Five Pole Superconducting Vertical Wiggler . . . . .	314
<i>K. Ohmi, T. Yamakawa, T. Doi, H. Kakui and H. Ukisuka</i>	
Design of Superconducting Wiggler for a Synchrotron Radiation Facility . . . . .	319
<i>K. Aizawa, M. Sakiyama, M. Yokoyama, A. Iwata, I. Endo, T. Kasuga, M. Taniguchi, M. Tobiyaama and M. Nomura</i>	
A Superconducting Wiggler Magnet for an Electron Beam of 120 MeV . . . . .	325
<i>S. Owaki, K. Katagiri, S. Nishijima, T. Nishiura, K. Takahata, K. Seo and T. Okada</i>	
Successful Test of a Superconducting Wiggler for the Frascati Electron Storage Ring Adone . . . . .	331
<i>M. Barone, A. Cattoni and C. Sanelli</i>	
Final Design of a 7.5 T Superconducting Wiggler Magnet . . . . .	337
<i>J.-T. Eriksson, L. Kettunen, R. Mikkonen and L. Söderlund</i>	
Determination of Loading Order of Permanent Magnet Blocks in the Soft X-Ray Undulator (SXU) at the NSLS . . . . .	343
<i>M. Kitamura, L. Solomon, G. Decker and J. Galayda</i>	

A Magnet with a Highly Homogeneous Field for a Frozen Spin Polarized Target of Proton and Deuteron . . . . .	348
<i>S. Isagawa, S. Ishimoto, K. Morimoto, A. Masaike, S. Suzuki and E. Ban</i>	
Design and Construction of a Large Superconducting Spectrometer Magnet . . . . .	354
<i>T. Shintomi, Y. Doi, O. Hashimoto, T. Kitami, Y. Makida and T. Nagae</i>	
An Ultra-Precise Storage Ring for the Muon $g-2$ Measurement . . . . .	360
<i>D. Brown, T. DeWinter, E. Hazen, C. Heisey, B. Kerosky, F. Krienen, D. Loomba, E. McIntyre, D. Magaud, W. Meng, J. Miller, L. Posnick, B. Roberts, D. Stassinopoulos, L. Sulak, W. Worstell, G. Bunce, H. Brown, B. Chertok, G. Cottingham, J. Cullen, G. Danby, B. DeVito, J. Jackson, M. May, J. Mills, C. Pai, A. Pendzick, I. Polk, A. Prodell, L. Snydstrup, R. Shutt, A. Soukas, K. Woodle, K. Becker, M. Lubell, T. Kinoshita, Y. Orlov, D. Winn, K. Jungmann, H. Mundinger, G. zu Putlitz, K. Endo, H. Hirabayashi, S. Kurokawa, T. Sato, A. Yamamoto, K. Ishida, W. Lysenko, L. Barkov, B. Khazin, E. Kuraev, Ya. Shatunov, J.T. Reidy, K. Nagamine, K. Nishiyama, H. Ahn, J. Bailey, P. Cushman, S. Dhawan, A. Disco, F. Farley, V. Hughes, H. Venkataramania</i>	
A Superconducting Toroidal Magnet for Charged Particle Spectroscopy . . . . .	366
<i>J. Imazato, H. Tamura, T. Ishikawa, R.S. Hayano, T. Yamazaki, A. Yamamoto and T. Kawaguchi</i>	
Corrective Coils for the Electron Cooler at ESR (GSI) . . . . .	372
<i>Th. Odenweller</i>	
<b>Energy Storage, Power Applications and MHD Magnets</b>	
A Method for the High Energy Density SEMES—Superconducting Magnetic Energy Storage . . . . .	378
<i>Y. Mitani and Y. Murakami</i>	
An Optimal Design of Solenoidal Superconducting Coil Used for Electrical Power System Stabilization . . . . .	384
<i>Y. Mitani and Y. Murakami</i>	
Desired Capacity and Control Strategy of SMES for Load Change Compensation Aid of Power System . . . . .	390
<i>J. Hasegawa and E. Tanaka</i>	
Study of SMES System with DC Intertie for Power Line Stabilization . . . . .	396
<i>H. Okada, T. Ezaki, K. Ogawa, H. Koba, F. Irie, M. Takeo, S. Sato, K. Terazono, M. Takamatu, N. Kawakami and M. Hirano</i>	
On the Multiple-Ring Coil System for SMES . . . . .	402
<i>T. Ezaki and F. Irie</i>	
Design and Tests of the Superconducting Magnet for Energy Storage . . . . .	408
<i>T. Tominaga, O. Takashiba, H. Fujita and K. Asano</i>	
25 kV Superconducting Fault Current Limiter . . . . .	413
<i>T. Verhaege, J.P. Tavergnier, A. Février, Y. Laumond, M. Bekhaled, M. Collet and V.D. Pham</i>	
Switch of Magnetic Field by Rotating Superconducting Shield . . . . .	419
<i>K. Takahata, S. Nishijima and T. Okada</i>	
Development of the Thermal Superconducting Switch and Research on its Closed Process . . . . .	425
<i>Y.B. Lin, Y.L. Chen, L.Z. Lin and S. Han</i>	

Theory and Verification Tests of the Nb-Ti Ribbon Thermally Controlled Switch for 50 Hz Applications . . . . .	431
<i>I. Hlásnik, N.V. Markovsky, O.A. Shevchenko and J. Kokavec</i>	
Basic Test of a 3-Phase Superconducting Fault Current Limiting Reactor . . . .	437
<i>H. Kado and T. Ishigohka</i>	
Nb <sub>3</sub> Sn Persistent Current Switch . . . . .	443
<i>M. Urata, H. Maeda, M. Tanaka, S. Murase, Y. Oda, S. Nakamura, E. Suzuki, S. Kageyama and S. Kabashima</i>	
Test on Superconducting AC Fault Current Limiter . . . . .	449
<i>D. Ito, E.S. Yoneda, T. Fujioka and K. Tsurunaga</i>	
Off-On Characteristics of Magnetically Controlled Superconducting Switch . .	455
<i>T. Nitta, M. Tada, T. Okada and S. Isojima</i>	
Operation of a New-Type Rectifier Fluxpump with Saturable Core Transformer .	461
<i>K. Funayama, T. Isono, M. Suzuki, M. Sato and T. Anayama</i>	
Design, Construction and Testing of a 50 kA Superconducting Transformer . .	467
<i>G. Pasztor, E. Aebli, B. Jakob, P. Ming, E. Siegrist and P. Weymuth</i>	
Quench Recovery Test of 3-Winding Superconducting Transformer with an Auxiliary Winding Only in Low Voltage Side . . . . .	473
<i>H. Kamijo, T. Ishigohka, N. Mizukami and M. Yamamoto</i>	
On the Inductive Method for Maximum Current Testing of Superconducting Cables . . . . .	479
<i>G.B.J. Mulder, H.H.J. ten Kate, H.J.G. Krooshoop and L.J.M. van de Klundert</i>	
AC Loss Characteristics of Superconducting Power Transmission Cable . . . . .	485
<i>K. Arai, N. Natori, N. Higuchi and T. Hoshino</i>	
Sectionalizing and Optimization of Toroidal Superconductive Windings . . . . .	491
<i>V.V. Andrianov, A.Y. Archangelsky, V.V. Zheltov, S.I. Kopylov and M.B. Parizh</i>	
The Influence of a Real Magnet on the Performance of Cold MHD Device . . . . .	497
<i>P. Del Vecchio, G. Pasotti and G.M. Veca</i>	
MHD Magnet Design for the J.E. Corette Plant Retrofit . . . . .	502
<i>H. Gurol</i>	
High Field Superconducting Magnet for a Closed Cycle Disk MHD Generator . . . . .	507
<i>T. Okamura, Y. Okuno and S. Shioda</i>	
Superconducting Magnets for Disk-Shaped MHD Generators: Review and Pre-design . . . . .	513
<i>H.G. Knoopers, H.H.J. ten Kate, L.J.M. van de Klundert, P. Masseur, H.A.L.M. de Graaf and W.J.M. Balemans</i>	
<b>SC Generators and Motors</b>	
First Results of the Start-up Phase of the 2 MVA Superconducting Generator SMG . . . . .	519
<i>H. Köfler, F. Ramsauer and H. Fillunger</i>	

Design Concepts and Experimental Results of Superconductor for Field Windings of 70 MW Class Superconducting Generator . . . . .	525
<i>A. Ueda, S. Maeda, T. Hirao, K. Mio, Y. Nagata, T. Yamada, M. Morita and H. Yoshimura</i>	
300 MVA Superconducting Generator and First Experiments of its Cooling-Down . . . . .	529
<i>G.M. Khutoretsky, I.F. Filippov, V.D. Varschawsky, Yu. L. Rybin and S.G. Stefanovich</i>	
Electrical Power System Stabilization Utilizing Energy in Field Winding of Superconducting Generator . . . . .	534
<i>Y. Mitani, Y. Kowada, K. Tsuji and Y. Murakami</i>	
Finite Element Modelling of Electromagnetic Shields in Superconducting AC Generator . . . . .	540
<i>S. Hahn, D. Han, H. Sin, B. Lee, G. Cha, S. Hahn and Y. Won</i>	
Calculation of Magnetic Field Caused by Armature Winding of Superconducting Generator . . . . .	545
<i>K. Yamaguchi and N. Maki</i>	
Specifications and Selecting Procedures on Superconducting Field Windings of Superconducting Generators . . . . .	550
<i>K. Uyeda, S. Meguro, T. Saitoh, K. Takahashi and H. Hatakeyama</i>	
Current Situation of R&D on Superconducting Generators Carried Out by Engineering Research Association for Superconductive Generation Equipment and Materials . . . . .	556
<i>T. Tanaka, S. Hirose, M. Tanaka, T. Kitajima and M. Sunada</i>	
Design and Manufacture of Superconducting Generator with High-Response Excitation . . . . .	562
<i>T. Okada, T. Nitta, S. Hayashi, K. Saikawa, M. Tari and M. Kumagai</i>	
Fully Superconducting AC Generator with Brushless Excitation System . . . . .	568
<i>I. Muta, H. Tsukiji, Y. Tsutsui, T. Hoshino, E. Mukai and T. Furukawa</i>	
A Study of Application of High $T_c$ Superconductors to Superconducting Generators . . . . .	574
<i>N. Maki, K. Yamaguchi and Y. Yagi</i>	
Test Results of Motors with a Superconducting Rotor . . . . .	580
<i>M. Takahashi, K. Arai, M. Satoh, M. Watanabe, N. Takahashi and R. Takahashi</i>	
Fundamental Design for Meissner Motor . . . . .	586
<i>A. Ishikawa, A. Takeoka and Y. Kishi</i>	
Thermo-Electromagnetic Stability of Ultrafine Multifilamentary Superconducting Cables for Industrial Frequency Use . . . . .	592
<i>A. Guéraud, J.P. Tavergnier, A. Février, Y. Laumond, A. Lacaze, B. Dalle and A. Ansart</i>	
Performances of Industrial Superconducting Wires for 50–60 Hz Applications . . . . .	598
<i>J.Y. Georges, A. Février, Y. Laumond, L. Lacaze and P. Bonnet</i>	

Influence of Thermomechanical Working Schedules on Critical Current Density and Structure of Superconductor Nb–Ti Base Alloys . . . . .	604
<i>G.K. Zelenskiy, A.V. Arsent'ev, A.P. Golub', E.A. Golub', V.E. Klepatsky, V.V. Medkov, E.V. Nikulenkov, A.D. Nikulin, V.Ya. Fil'kin, V.S. Titov, P.P. Pashkov, V.A. Vasil'ev and A.I. Nikulin</i>	

Development of kA-Class Superconducting Cables for AC Use: (I) Design and Fabrication . . . . .	610
<i>T. Hamajima, M. Shimada, M. Ono, M. Yamaguchi, D. Itoh, T. Fujioka, K. Funaki, K. Tasaki, M. Iwakuma, M. Takeo, K. Yamafuji, T. Kumano and E. Suzuki</i>	

Development of kA-Class Superconducting Cables for AC Use: (II) Electromagnetic Properties . . . . .	615
<i>K. Funaki, K. Tasaki, M. Iwakuma, M. Takeo, K. Yamafuji, T. Hamajima, M. Shimada, M. Ono, M. Yamaguchi, D. Itoh, T. Fujioka, T. Kumano and H. Suzuki</i>	

Superconductors and Rare Earth Magnets: An Exciting Combination for Electrical Motors . . . . .	621
<i>P. Tixador, Y. Brunet, P. Brissonneau and M. Ivanec</i>	

### Hybrid Magnets

45 T, Steady State . . . . .	627
<i>R.J. Weggel, M.J. Leupold, J.E.C. Williams and Y. Iwasa</i>	

A Design of 50 T Hybrid Magnet for Quasi-Stationary Operation . . . . .	633
<i>Y. Nakagawa, G. Kido, S. Miura, A. Hoshi, K. Watanabe and Y. Muto</i>	

The Construction of Pulsed Field Solenoids in the Oxford–Leuven Collaboration . . . . .	639
<i>H. Jones, F. Herlach and J.A. Lee</i>	

Generation of Long Flat-Top Pulse Fields for Solid State Physics . . . . .	645
<i>N. Miura, S. Takeyama and K. Watanabe</i>	

Primary Design of 40 Tesla Class Hybrid Magnet System . . . . .	651
<i>K. Inoue, T. Takeuchi, T. Kiyoshi, K. Itoh, H. Wada, H. Maeda, K. Nii, T. Fujioka, Y. Sumiyoshi, S. Hanai, T. Hamajima and H. Maeda</i>	

Removal of Dissolved Oxygen in Water for High-Power Resistive Magnet . . . . .	657
<i>A. Hoshi, S. Miura and Y. Nakagawa</i>	

A 20 T, 130 mm Bore Hybrid Magnet . . . . .	663
<i>P. Rub, M. Ohl, H.-J. Schneider-Muntau and J.C. Vallier</i>	

The Nijmegen High-Field Magnet Laboratory: Experience with the New 30-T Hybrid Magnet System . . . . .	668
<i>K. van Hulst, H. van Luong, J.A.A.J. Perenboom, J. Rook and J. Singleton</i>	

### Mechanical Design and Materials

Plastic Bending Large Displacement Analysis and Spring-Back of a Conductor Jacket of a Superconducting Magnet for Fusion Reactors . . . . .	674
<i>R.E. Gori and P. Zaccaria</i>	

Structural Characteristics and the Influence of Mechanical Disturbance in Superconducting Toroidal Coils . . . . .	680
<i>Y. Kannoto, H. Hashizume, M. Minami, K. Hayakawa, T. Takagi and K. Miya</i>	
Temperature Rise Due to Frictional Sliding of SUS316L vs SUS316L and SUS316L vs Polyimide at 4 K . . . . .	686
<i>A. Iwabuchi and T. Honda</i>	
Fracture Toughness of 304 Stainless Steel in High Magnetic Fields at Cryogenic Temperature . . . . .	692
<i>E. Fukushima, S. Kobatake, M. Tanaka and H. Ogiwara</i>	
Superconducting Magnets in High Radiation Environments: Design Problems and Solutions . . . . .	697
<i>S.J. St Lorant and E. Tillmann</i>	
Investigation of Impregnants for Superconducting Magnets . . . . .	703
<i>D.L. Zha, S. Han and L.Z. Lin</i>	
Creep Test of Composite Materials under Irradiation Condition . . . . .	708
<i>T. Nishiura, S. Nishijima, K. Katagiri, T. Okada, J. Yasuda and T. Hirokawa</i>	
Mechanical Behavior of Insulating Material of Forced Flow Superconducting Magnets . . . . .	714
<i>S. Nishijima, T. Okada and M. Kawakami</i>	
Comparison of Test Results with Analysis of Glass Fibre Reinforced Epoxy Shear Test Samples . . . . .	719
<i>F. Fardi, N. Mitchell and R. Poehlchen</i>	
Development of Radiation-Resistant Magnets for High Intensity Beam Lines . . . . .	725
<i>K.H. Tanaka, Y. Yamanoi, M. Takasaki, T. Suzuki and K. Kato</i>	
Effect of Cold Work and Heat Treatment on the 4°K Tensile, Fatigue and Fracture Toughness Properties of Incoloy 908 . . . . .	731
<i>M.M. Morra, I.S. Hwang, R.G. Ballinger, M.M. Steeves and M.O. Hoenig</i>	
Effect of Stiffness on Serrated Deformation at Very Low Temperatures under Constant Loading Rate Conditions and its Computer Simulation . . . . .	737
<i>K. Shibata and K. Fujita</i>	
Mechanical Properties of SUS304 Stainless Steel under Cold Thermal Cycles . . . . .	743
<i>Y. Mukai and A. Nishinura</i>	
Creep and Discontinuous Deformation Behavior of Austenitic Steels at Cryogenic Temperatures . . . . .	749
<i>T. Ogata, K. Ishikawa, T. Yuri and O. Umezawa</i>	
Fatigue and Fracture of Ti Alloys at Cryogenic Temperatures . . . . .	754
<i>K. Nagai, T. Yuri, O. Umezawa and K. Ishikawa</i>
