

Table of Contents

POWER ELECTRONICS I , Session Chairman, R. Corbett, Lockheed Missile & Space Company; Session Co-Chairman, P. Stover, Air Force Aeropropulsion Laboratory.	1	A Switching Amplifier for Capacitive Loads Using Incremental Resonant Charging , D. Smart, <i>SYSTRON DONNER, Inertial Division</i>	98
The General Theory of Switching Power Converters , Peter Wood, <i>Westinghouse Electric Corporation</i>	3	General Topological Properties of Switching Structures , S. Čuk, <i>California Institute of Technology</i>	109
Modeling and Analysis of Power Processing Systems , Y. Yu, <i>TRW Defense and Space Systems Group</i> ; F. C. Lee, <i>Virginia Polytechnic Institute and State University</i> and J. Kolecki, <i>NASA, Lewis Research Center</i>	11	SWITCHING REGULATORS I , Session Chairman, H. A. Owen, Jr., Duke University; Session Co-Chairman, Y. Yu, TRW Defense & Space Systems Group	131
A 20 KW Inverter Flyback Charging System , S. R. Bird, <i>Westinghouse Electric Corporation, System Development Div.</i>	25	Practical Design Considerations of a Multi-Output Čuk Converter , G. E. Bloom and A. Eris, <i>Litton, Guidance and Control</i>	133
Computer Analysis of Thyristor Chopper Circuits with Detailed Device Modeling , C. C. Gordon and L. L. Ogborn, <i>Purdue University</i>	32	Frequency Modulated Switching Regulator , W. T. Porter, <i>General Electric Company, Aerospace Electronic Systems</i>	147
Start-Up Transient of a DC-to-DC Converter Powered by a Current-Limited Source , T. G. Wilson, Jr., <i>Bell Laboratories</i>	40	Digital Implementation and Simulation of an Average Current Controlled Switching Regulator , T. V. Papathomas and J. N. Giacomelli, <i>Bell Laboratories</i>	155
POWER ELECTRONICS II , Session Chairman, T. C. Wang, General Motors Research Laboratory; Co-Chairman, P. Thollot, NASA, Lewis Research Center . . .	53	On the Precise Regulation of Multiple Outputs in a DC-DC Converter with an Energy Storage Reactor , K. Harada, T. Ninomiya and T. Nabeshima, <i>Kyushu University, Japan</i>	162
The Development of a Power Darlington Transistor and Hybrid Integrated Circuit for a DC-to-DC Converter , S. Krishna and A. J. Yerman, <i>General Electric Company, Corporate R&D Center</i>	55	Comparison of Multiple-Output DC-DC Converters Using Cross Regulation , H. Matsuo, <i>Nagasaki University, Japan</i>	169
Selection of Snubbers and Clamps to Optimize the Design of Transistor Switching Converters , W. McMurray, <i>General Electric Company, Corporate R&D Center</i>	62	State-Space Analysis of Cross Regulation , K. Harada, T. Nabeshima and K. Hisanaga, <i>Kyushu University, Japan</i> . . .	186
Gate and Emitter Design for High Frequency Thyristors , C. K. Chu, J. E. Johnson and J. F. Donion, <i>Westinghouse Electric Corporation, Semiconductor Division</i> ; Y. C. Kao, <i>Westinghouse Electric Corporation, R&D Center</i>	75	POWER CONVERTERS , Session Chairman, R. Hoft, University of Missouri-Columbia; Session Co-Chairman, W. McMurray, General Electric Company, Corporate R&D.	193
Aegis Low Voltage Power Supply System , M. C. Johnson, <i>RCA Corporation, Missile and Surface Radar</i> . . .	80	Phase-Controlled Voltage Regulation Using a "Bridge-Doubler" Circuit Configuration , G. J. Rokas, <i>Sperry Univac, Canada</i>	195
Dynamics of Switching DC-DC Converter: A Comparison Between Theoretical Previsions and Breadboard Computerized Experimentation , A. J. Fossard, <i>Ecole Nationale Supérieure de l'Aéronautique et de l'Espace Complexe Aérospatial (ENSAE)</i> , France; M. Clique and P. Pipet, <i>Centre d'Etudes et de Recherches de Toulouse (CERT) Département d'Etudes et de Recherches en Automatique Complexe Aérospatial</i> , France	90	An Active Power Filter with Saturable Cores , K. Harada, <i>Kyushu University, Japan</i> ; K. Murata, <i>Yatshushiro College of Technology, Japan</i>	206
		An AC-to-AC Converter Improved in Input Current Harmonics and Power Factor , T. Tanaka and H. Kasahara, <i>Tokyo Denki University, Japan</i>	212

Peak Power Tracking Technique for Photovoltaic Arrays , D. A. Fox, K. C. Shuey and D. L. Stechschulte, <i>Westinghouse Electric Corporation, Aerospace Electrical Division</i>	219	A Microcomputer-Based Controller for a Single-Phase, 2 HP DC Motor Drive , C. Slivinsky, R. McLaren, J. Inman and L. Howard, <i>University of Missouri-Columbia</i>	318
An Output Clamped Series Thyristor Inverter , P. Shively and S. B. Dewan, <i>University of Toronto, Canada</i>	228	Amorphous Magnetic Alloys for High Frequency Power Electronic Applications , D. Y. Chen, <i>General Electric Company, Corporate R&D</i>	321
Advantages of Using a "I" Source for Push-Pull Inverter in Power Supply Applications , D. V. Jones, <i>General Electric Company, R&D Center</i>	234	Analysis and Simplified Representation of a Current Source Inverter—Induction Motor Drive , S. S. Abd-El-Hamid and D. P. Carroll, <i>Purdue University</i>	325
SWITCHING REGULATORS II , Session Chairman, F. Lee, Virginia Polytechnic Institute and State University; Session Co-Chairman, R. Parker, Hughes Aircraft Company	237	Dynamic Modeling of a Brushless DC Motor-Power Conditioner Unit for Electromechanical Actuator Application , N. A. Demerdash and T. W. Nehl, <i>Virginia Polytechnic Institute and State University</i>	333
A Unifying Derivation of Switching DC-DC Converter Topologies , E. E. Landsman, <i>MIT, Lincoln Laboratory</i>	239	Microprocessor Control of a PWM Inverter Induction Motor Drive , J. M. D. Murphy, L. S. Howard and R. G. Hoft, <i>University of Missouri-Columbia</i>	344
Switching Transients in High-Frequency High-Power Converters Using Power MOSFET's , T. H. Sloane, H. A. Owen, Jr. and T. G. Wilson, <i>Duke University</i>	244	Transient Characteristics and Reliable Commutation Limit of DC Thyristor Commutatorless Motor , Y. Takeda, H. Irie and T. Hirasa, <i>University of Osaka, Japan</i>	349
Common-Mode Noise Generation in a DC-to-DC Converter , T. Ninomiya and K. Harada, <i>Kyushu University, Japan</i> ; M. Mamon, <i>SERELEC, France</i>	256	POWER ELECTRONICS III , Session Chairman, D. Page, Westinghouse Electric Corporation; Session Co-Chairman, W. Burns, Bell Laboratories	357
Charge Controlled Conversion Principle in DC/DC Regulators Combines Dynamic Performance and High Output Power , A. Capel, <i>European Space Agency Technology Centre, The Netherlands</i>	264	An Adaptive Controlled Switching Regulator-Implementation, Analysis and Design , F. C. Lee, <i>Virginia Polytechnic Institute and State University</i> ; Y. Yu, <i>TRW, Defense and Space Group</i>	359
A New Current-Fed Converter Topology , R. Severns, <i>Intersil, Incorporated</i>	277	Design of Switching Power Supplies for Improved Reliability and Maintainability , B. S. Shaw and D. O. Monteith, <i>University of Texas, Applied Research Lab.</i>	374
Modelling and Analysis of Switching DC-to-DC Converters in Constant-Frequency Current-Control Mode , S. P. Hsu, A. Brown, L. Rensink and R. D. Middlebrook, <i>California Institute of Technology</i>	284	High Current Propulsion System , M. R. G. Petersen, <i>National Gas Turbine Establishment West Drayton, Naval Engineering Department, England</i>	379
Dynamic Behavior Analysis of PWM Chopper System with Triangular Reference Voltage , T. Mochizuki and Y. Tanaka, <i>Kyushu Institute of Technology, Japan</i>	302	Parametric Analysis of Power MOSFET , C. Hu, <i>University of California, Berkeley</i>	385
ELECTROMAGNETIC DEVICES AND CIRCUITS , Session Chairman, T. Lipo, General Electric Company, Corporate R&D; Session Co-Chairman, H. Lord, Consultant	309	An Efficient Digital Simulation of Thyristor Circuits by Means of Network-Tableau Approach , H. Haneda and T. Maruhashi, <i>Kobe University, Japan</i>	396
High Reliability Control Circuit of PWM Inverter for Electric Car Drive , M. Ibamoto, H. Narita, T. Tsuboi, H. Kiwaki, Y. Onoda, S. Okamatsu and Y. Shimizu, <i>Hitachi Research Laboratory, Japan</i> ; T. Katta, <i>Teito Rapid Transit Authority, Japan</i>	311	POWER ELECTRONICS IV , Session Chairman, J. Kassakian, Massachusetts Institute of Technology; Session Co-Chairman, D. Schaefer, General Electric Company, Corporate R&D	409

Models for Thyristors and Diode in Digital Simulations, A. Sangiovanni-Vincentelli and M. Venturini, <i>University of California, Berkeley</i> ; P. Wood, <i>Westinghouse Electric Corporation</i>	411	A Multikilowatt Polyphase AC/DC Converter With Reversible Power Flow and Without Passive Low Fre- quency Filters, C. Schwarz and W. L. Moize De Chateaux, <i>State University of Technology, Delft, The Netherlands</i> .	448
A Technique for Increasing the Useful Frequency Range of Semiconductor Devices, V. A. K. Temple, M. S. Adler and P. V. Gray, <i>General Electric Company, Corporate R&D.</i>	420	The MK84: New Level of Performance for Transistorized Power Converters, S. M. Kurzet, <i>ALS Electronics Corporation</i>	459
A DC Model for Power Switching Transistors Suitable for Computer-Aided Design and Analysis, P. M. Wilson, R. T. George, H. A. Owen, Jr. and T. G. Wilson, <i>Duke University</i>	428	Rectifiers, Noise, and Regulatories, W. T. Rhoades, <i>Xerox Corporation</i>	469
A Double-Sided Cycle-Converter, F. C. Schwarz, <i>State University of Technology, Delft, The Netherlands</i>	437	RAP SESSIONS	480
