## 1

### Acoustic Scattering from Elastic Solids

ROGER H. HACKMAN

1. INTRODUCTION	1
2. SPHERICAL SOLIDS	3
3. INFINITE CYLINDRICAL SOLIDS	46
4. THE <i>T</i> -MATRIX FORMALISM	61
5. FINITE CYLINDERS	81
6. PROLATE SPHEROIDS	137
7. SURFACE WAVES AND QUASICYLINDRICAL MODES	174
ACKNOWLEDGMENTS	185
REFERENCES	185

## 2

### Variational Formulations in Acoustic Radiation and Scattering

ALLAN D. PIERCE

1. BASIC FEATURES OF VARIATIONAL STATEMENTS	196
2. HAMILTON'S PRINCIPLE	210
3. PLATES	217
4. SHELLS	227
5. ENERGY COROLLARIES	251
6. QUOTIENT PRINCIPLES AND RAYLEIGH'S PRINCIPLE	254
7. MINIMUM AND MAXIMUM PRINCIPLES	259
8. METHOD OF GERJUOY, RAU, AND SPRUCH	262
9. THE HELMHOLTZ-KIRCHHOFF INTEGRAL COROLLARIES	267
10. INTEGRAL EQUATIONS BASED ON THE HELMHOLTZ-KIRCHHOFF INTEGRAL COROLLARIES	273

11. VARIATIONAL PRINCIPLES DERIVED FROM INTEGRAL EQUATIONS	301
12. VARIATIONAL PRINCIPLES AND NON-SELF-ADJOINT OPERATORS	312
13. APPLICATION OF THE GERJUOY-RAO-SPRUCH TECHNIQUE	319
14. UNIQUENESS AND VARIATIONAL PRINCIPLES	327
15. NUMERICAL AND ANALYTICAL IMPLEMENTATIONS	331
16. AN ASSESSMENT	350
ACKNOWLEDGMENTS	354
REFERENCES	355
INDEX	373
CONTENTS OF PREVIOUS VOLUMES	379
