

## CONTENTS

### FIRST SESSION: THEORETICAL AND FUNDAMENTAL ASPECTS

	<i>Page</i>
Introduction and Historical Survey	3
by PROFESSOR E. G. RICHARDSON (King's College, Newcastle upon Tyne)	
Dust deposition from a turbulent airstream	8
by PROFESSOR P. R. OWEN (Department of the Mechanics of Fluids, University of Manchester)	
The classical computation of the aerodynamic capture of particles by spheres	26
by H. HERNE (Scientific Department, National Coal Board)	
Particle trajectories, collision and attachment in froth flotation	34
by DR. D. J. BROWN (Scientific Department, National Coal Board)	
Electric charge effects in aerosol particle collision phenomena	44
by DR. T. GILLESPIE (Dow Chemical Co., Midland, Mich.)	
DISCUSSION	50

### SECOND SESSION: EXPERIMENTAL APPLICATION OF CAPTURE TECHNIQUES

Aspects of the deposition of radioactive and other gases and particles	63
by A. C. CHAMBERLAIN (Atomic Energy Research Establishment, Harwell)	
The size of wood smoke particles	89
by DR. W. W. FOSTER (Torry Research Station, Aberdeen)	
The impingement of water drops on a surface moving at high speed	97
by D. C. JENKINS and J. D. BOOKER (Royal Aircraft Establishment, Farnborough)	
The distribution of impacted particles of various sizes on the blades of a turbine cascade	104
by D. L. MARTLEW (National Gas Turbine Establishment, Pyestock)	
The role of diffusion, interception and inertia in the filtration of airborne particles	112
by R. G. DORMAN (Chemical Defence Experimental Establishment, Porton Down, Wilts.)	
DISCUSSION	123

## THIRD SESSION: CAPTURE OF PARTICLES BY RAINDROPS

	<i>Page</i>
The suppression of airborne dust by water spray by W. H. WALTON and A. WOOLCOCK (National Coal Board, Mining Research Establishment, Isleworth, Middlesex)	129
The theoretical collision efficiency of small drops by DR. L. M. HOCKING (University College, London)	154
Collection efficiencies for water drops in air by DR. R. G. PICKNETT (Department of Meteorology, Imperial College, London)	160
Scavenging action of rain on non-wettable particulate matter suspended in the atmosphere by C. S. PEMBERTON (Atomic Weapons Research Establishment, Aldermaston, Berks.)	168
Laboratory experiments relating to the wash-out of particles by rain by B. OAKES (King's College, Newcastle upon Tyne)	179
DISCUSSION	194
Appendix by DR. C. N. DAVIES	199
