

## CONTENTS

Preface .....	v
Pseudospectral Calculations on 2-D Turbulence and Nonlinear Waves .....	1
BENGT FORNBERG	
Random Vortices and Random Vortex Sheets .....	19
ALEXANDRE J. CHORIN	
Progress and Problems in Regional Numerical Weather Prediction .....	32
CARL W. KREITZBERG	
The Numerical Simulation of Severe Convective Storms .....	59
HAROLD D. ORVILLE	
On the Construction and Application of Implicit Factored Schemes for Conservation Laws .....	85
R. F. WARMING and RICHARD M. BEAM	
An Efficient Explicit-Implicit-Characteristic Method for Solving the Compressible Navier-Stokes Equations .....	130
ROBERT W. MACCORMACK	
The Computation of Two-Dimensional Asymmetrical Flows Past Cylinders ...	156
S. C. R. DENNIS
