

## Table of Contents

	Page
<b>Forward</b> . . . . .	v
<b>Preface</b> . . . . .	vii
<b>Table of Contents</b> . . . . .	ix
<b>List of Lecturers</b> . . . . .	xi
<i>Continuum Mechanics - A Brief Review</i> (K. S. Pister) . . . . .	1
<i>Theory of Conjugate Projections in Finite Element Analysis</i> (J. T. Oden) . . . . .	41
<i>Finite Element Approximations in Nonlinear Thermoviscoelasticity</i> (J. T. Oden) . . . . .	77
<i>Finite Element Approximations in Nonlinear Elasticity</i> (J. T. Oden) . . . . .	121
<i>The Finite Element Method in Fluid Mechanics</i> (J. T. Oden) . . . . .	151
<i>Finite Element Formulation of Nonlinear Boundary-Value Problems</i> (J. T. Oden) . . . . .	187
<i>Mathematical Theory of Linear Structures</i> (E. R. de Arantes e Oliveira) . . . . .	209
<i>Static-Geometric Analogies and Finite Element Models</i> (B. Fraeijs de Veubeke) . . . . .	299
<i>Duality in Structural Analysis by Finite Elements</i> (B. Fraeijs de Veubeke) . . . . .	323
<i>The Dual Principles of Elastodynamics Finite Element Applications</i> (B. Fraeijs de Veubeke) . . . . .	357
<i>Isoparametric Element Forms in Finite Element Analysis</i> (O. C. Zienkiewicz) . . . . .	379
<i>Weighted Residual Processes in Finite Element with Particular Reference to Some Transient and Coupled Problems</i> (O. C. Zienkiewicz and C. Taylor) . . . . .	415

## CONTENTS

<i>Finite Element Studies of Soils and Porous Media</i> (O. C. Zienkiewicz and D. J. Naylor) . . . . .	459
<i>Basic Principles of Structural Dynamics</i> (R. W. Clough) . . . . .	495
<i>Vibration Analysis of Finite Element Systems</i> (R. W. Clough) . . . . .	513
<i>Numerical Integration of the Equation of Motion</i> (R. W. Clough) . . . . .	525
<i>Large Strain, Large Displacement Analysis</i> (P. V. Marcal) . . . . .	535
<i>Instability Analysis Using the Incremental Stiffness Matrices</i> (P. V. Marcal) . . . . .	545
