

Contents

1 Mixed Finite Element Solution of Fluid Flow Problems	1
<i>R. L. Taylor and O. C. Zienkiewicz</i>	
2 Conservation Laws for Primitive Variable Formulations of the Incompressible Flow Equations Using the Galerkin Finite Element Method	21
<i>R. L. Lee, P. M. Gresho, S. T. Chan, R. L. Sani, and M. J. P. Cullen</i>	
3 A Theoretical Framework for Petrov–Galerkin Methods with Discontinuous Weighting Functions: Application to the Streamline-Upwind Procedure	47
<i>T. J. R. Hughes and A. Brooks</i>	
4 Theoretical Analysis of Some Finite Element Methods for Convective Diffusion Equations	67
<i>F. Kikuchi and T. Ushijima</i>	
5 Modelling of Estuarine Hydrodynamics and Field Data Requirements	89
<i>R. T. Cheng and R. A. Walters</i>	
6 Large-Amplitude Water Waves	109
<i>P. L. Betts and M. I. Assaat</i>	
7 A Three-Dimensional Multiple Level Finite Element Method Considering Variable Water Density	129
<i>M. Kawahara, M. Kobayashi, and K. Nakata</i>	
8 Finite Element Solution of the Shallow-Water Wave Equations in Fourier Space, with Application to Knight Inlet, British Columbia	157
<i>B. M. Jamart and D. F. Winter</i>	

9 A Finite Element Simulation of the Subsidence of a Gas Reservoir Undergoing a Waterdrive	179
<i>R. W. Lewis and B. A. Schrefler</i>	
10 A Variable Domain Finite Element Analysis of Seepage from a Ditch	201
<i>E. Varo\u0111lu and W. D. L. Finn</i>	
11 Thermomechanically Coupled Creeping Flow of Saturated Cohesive Porous Media	213
<i>P. R. Dawson and P. F. Chavez</i>	
12 A Finite Element Analysis of Volumetrically Heated Fluids in an Axisymmetric Enclosure	233
<i>D. K. Gartling</i>	
13 Numerical Solution of Flow and Heat Transfer in Polymer Melts	251
<i>S. Nakazawa, J. F. T. Pittman, and O. C. Zienkiewicz</i>	
14 Penalty Finite Element Analysis of Natural Convection at High Rayleigh Numbers	285
<i>J. C. Heinrich and M. Strada</i>	
15 RIP Methods for Stokesian Flows	305
<i>J. T. Oden</i>	
16 Optimal Control Penalty Finite Elements in Fluid Mechanics . . .	319
<i>T. J. Chung, G. R. Karr, and J. Y. Kim</i>	
17 A Diabatic, Turbulent, Atmospheric Boundary-Layer Model . .	347
<i>E. S. Takle, R. L. Sani, and L. P. Chang</i>	
18 On an Efficient New Preconditioned Conjugate Gradient Method. Application to the In-core Solution of the Navier-Stokes Equations Via Non-linear Least-Squares and Finite Element Methods	365
<i>R. Glowinski, B. Mantel, J. Periaux, P. Perrier, and O. Pironneau</i>	
19 Boundary Methods for Fluids	403
<i>I. Herrera</i>	

20 Finite Element Boundary Techniques for Improved Performance in Computing Navier-Stokes and Related Heat Transfer Problems	433
<i>A. G. Hutton</i>	
21 Transonic Flow Simulations by Finite Elements and Least-Square Methods	453
<i>M. O. Bristeau, R. Glowinski, J. Periaux, P. Perrier, O. Pironneau, and G. Poirier</i>	
22 Finite Element Methods for the Solution of Full Potential Equation in Transonic Steady and Unsteady Flow	483
<i>A. Eberle</i>	
23 Treatment of Transonic Flows with Shocks Using Finite Elements	505
<i>H. U. Akay and A. Ecer</i>	
24 Finite Element Analysis of Quasi-Three-Dimensional Flow in Turbomachines	531
<i>H. Keck and W. Haas</i>	
25 A Finite Element Analysis of Plasmas Pinched in Three Dimensions	551
<i>R. P. Gupta, E. Panarella, and P. Silvester</i>	
26 The Flow of a Maxwell Fluid Around a Sphere	573
<i>M. J. Crochet</i>	
27 A Finite Element Solution for Laminar Flow Between Coaxial Disks	599
<i>G. Dhatt, P. Florent, D. Nguyen, and P. Vaillant</i>	
28 Acoustic Transmission in Lined Flow Ducts	617
<i>R. J. Astley and W. Eversman</i>	
Index	635
