Contents of Volume 1

Preface vii

Editorial Comments viii

SPECIAL LECTURES

Recent Advances in Noise Prediction for Control Valves 3
H L Miller and L R Stratton

Advances in Power Fluidics 17
R F Boucher

PNEUMATICS

An Analysis of Pneumatic PWM and its Application to a Manipulator 33
Y Morita, M Shimizu, T Kagawa, Y Yoshikawa and S Mamiya

Frequency Response of Pressure Control with an Electro-Pneumatic Proportional Valve D 39
K Araki, T Tanahashi and M Ehana

No Friction Cylinders for Pneumatic Positioners 45
G Belforte, A Romiti and T Raparelli

Speed and Position Control of a Pneumatic Cylinder Having a Ball-Screw Inside the Piston Rod 53
K Yamafuji and O Maki

On the Development of a PWM Control-Based Pneumatic Servomechanism 59
S G Lee and H S Cho

Performance of a Modified On-Off Controller with PD Action for Pneumatic Servomechanism 67
H S Cho and C W Lee

Pulse-Width-Modulated Feedback Force Control of a Pneumatically Powered Robot Hand 77
T Noritsugu

D indicates paper included in Discussion section

The Efficient Application of Programmable Controllers for Control of Pneumatic Actuators D 83
Lj Jacic

Simulation Program for Pneumatic System 89
S Nagai, T Kukuminato and T Sekine

Computer-Aided-Design of Pneumatic Digital Systems - A System Approach 95
L J Jacic

Intelligent Valve Positioner Employing New Control Method 101
M Fujiwara, M Kuroda and T Shiga D

Modal Representations for Fluid Transmission Line Dynamics 107
D A Hullender

State Variable Models for Fluid Transmission Line Dynamics 115
R L Woods, D A Hullender and C H Hsu D

Dynamic Characteristics of Pneumatic Transmission Lines 123
E Kanai, T Sawada, T Tanahashi and T Ando

Transient Analysis of Pneumatic Systems 129
A Romiti

Attenuation of Expansion Waves in a Pipe of Railway's Pneumatic Brake System 137
K Kage, S Kawagoe, K Matsuo, H Tanaka and I Hasegawa

Instantaneous Flowrate Measurement of Transient Air Flow 143
F Hiroki and T Masuda

HYDRAULICS

A Study on the Electrohydraulic Analog Loading Control System 151
W Yeh, Y Zhao, L Zhou and B Xu D

High-Speed Electro-Hydraulic Servovalves using Electrostrictive Ceramic PMN Actuators 157
H Ohuchi, K Nakano, K Uchino, H Endoh and H Fukumoto

Range of Control for Electrohydraulic Servovalves Represented by the Rate of Flow and the Frequency Characteristics 163
T Nakada

Electro-Hydraulic Digital Servo-Mechanism by the Pulse Flow Control 171
H Tanaka, H Tanaka, K Araki, Y Ogiura and S Hamamoto

Model Reference Adaptive Direct Drive Actuation System 177
H Panossian

Application of a High Speed Solenoid Actuator to Linear Hydraulic Servo-Mechanism 183
Y Okada, K Matsuda and B Nagai

Simulation and Testing of a Hydraulic Flow Fuse D 189
P R Ukrainetz, P N Nikiforuk and S Ramachandran

A New Approach to Improving Performances of Proportional Pressure Valves 197
Y Lu, D Hu and K Yu

Modelling of the Generation Mechanism of Flow Pulsations by an Axial Piston Pump D 203
H Nakano, T Machiyama and T Kawase

New Variable Displacement Pump/Motor 209
Y Kita, Y Nomura, Y Nakakohji and R Sugawara

Study of Oil Film of the Distributor with Annular Throttling Groove and Intermittent Oil Injection in Axial Piston Pump D 215
Y Xu and J Wang

Computer Aided Test System for Hydraulic Component Hardware and Software D 221
Y Huang, R Jin, C Wu, P Lu and H Zhang

On the Cavitation Inception in Oil Hydraulic Pipeline 227
I Y Lee, A Kitagawa and T Takenaka

Design and Assessment of a Digital Proportional Flow Control Valve 233
P R Ukrainetz, S Ramachandran and P N Nikiforuk

Step Response of a Hydraulic Servomechanism 241
A Abo-Ismail, A S Huzayyin and S S Krar

Identification of Energy Loss in Fluid Power System 249
X Qian and N Dai

BIOENGINEERING

Noninvasive Measurement of Intra-Arterial and Capillary Blood Pressure by a New Volume Oscillometric Method D 257
H Shimazu, H Ito, K Yamahoshi and K Tsuchiya

Secondary Flows in the Dog Aortic Arch D 263
Y Sohara and T Karino

Laser-Doppler and Hot-Film Anemometers for Measurement of Unsteady Turbulent Flow behind a Prosthetic Heart Valve D 269
J Seki, K Hayashi, T Nakamura and M Umezu

Fluidic Fatigue Testing Machine for Prosthetic Heart Valve 275
S Q Zhou, S B Jiang and Z H Kang

Flow Visualization of Artificial Heart and Its Quantitative Analysis D 285
Y Katahira, S Nitta, M Tanaka, Y Kagawa, T Hongo and T Horiuchi

Mathematical and Hydraulic Simulators for Circulatory Assist Devices - Optimization Strategies D 291
D P F Möller and K Tsuchiya

Noninvasive Measurement of Instantaneous Arterial Blood Pressure of Human Body During Exercise D 299
H Nakane, H Maruyama, S Saito, S Omori, K Otake and K Toyoshima

Effects of Artificial Heart Drive Conditions on Water Hammer Phenomenon D 305
M Umezu, T Yoshihara, H Takano and T Akutsu

A Computer Simulation Model of the Human Arterial System D 311
G Ho

FLUIDICS

Experimental Investigation of the Frequency Response of Laminar Proportional Amplifiers D 325
K Sato, H Shimizu and H Hatanaka

Theoretical Fundamentals of Physical Similitude in Fluidics D 331
M Horejsi

Modelling of Fluidic Circuit Components D 339
D A Hullender and R L Woods

A Fluidic Low Output Impedance Device 347
R L Woods and R-J Tseng

A Numerical Study of Swirling Flow Field in a Vortex Device D 353
A Shimizu, Y Matsumoto and T Wada

Factors Affecting the Application of Vortex Diodes and Throttles D 359
G H Priestman and J R Tippetts

Investigation on Vortex and Momentum Interaction Fluidic Diodes D 365
S Kar and M Tharakan

Effect of Scale on the Performance and Stability of Vortex Amplifiers 373
P C Perera, N Syred and K Sato

Optimisation of Vortex Amplifier Designs for Very Low Control Pressures 379
S Z Torangi-Sarjamee and N Syred

Fluidically Controlled Liquid Filling Device with Automatic Compensation 385
Y Chen, L Yu, G Wang and J Liu

Power Fluidics - Development Story of Several Elements and Applications D 393
V Tesar

The Applications of the Power Fluidics Oscillator in the Process of Mass Transfer 403
G Liu

Fluid Control and Fluid Measurement Techniques in Process Control 409
K Ho

Fluidic Sprinkler for Irrigation with Stepwise Rotation 415
F M Tang and Z H Kang

A Study on a Fluidic Pump with Vortex Diodes D 421
T Wada, M Takagi and A Shimizu

Experimental Study of a Single Acting Fluidic Pump D 427
H Yoshitomi, T Koizumi, K Muroyama, T Kubota, H Ojima, H Kashihara and S Nagahara

Effect of Jet Inclination on its Natural Laminar Length 433
J Golden, C Jordan, A Tsui, G Rankin and K Sridhar

Attachment Process of Switching of a Jet in a Wall-Attachment Device D 439
T Murao, Y Tomita and J Seki

Effect of Inlet Condition to Flow Field in Wall Attachment Device 445
Y Nakayama, H Ogino, K Aoki and H Ohta

Drop Formation in Ink Jet Through Theoretical Analysis of One-Dimensional Model and Experimental Scale-Up Nozzles 451
Y Matsuda, Y A Ono and K Tsuchiya

Characteristics of Magneto-Fluidic Control Devices which use Magnetic Fluid as Working Fluid D 457
N Kabei, Y Sakurai and K Tsuchiya

Jet Thrust Vector Control by Sound for Fluidic Underwater Vehicles 463
I Kimura, M Yonemochi and T Takamori

Pulse Code Modulation Techniques by Fluidics 469
H Saeki and M Miki

Self-Excited Oscillation of Flow through Collapsible Tube D 475
K Ohba and A Sakurai

Two-Point Pressure-Velocity Correlations, Conditional Average and Linear Estimation in a Round Jet Flow 481
P H-P Chang, R J Adrian and B G Jones

Experimental Verification of Numerical Simulation of Flows in Cyclones and Hydrocyclones 493
J Staciek and R Zwierzchowski

FLOW CONTROL

Effect of Solid-Body Swirl on Performance of Wide Angle Diffusers 503
A Thakker

Closed-Loop Mach Number Control in a Blowdown Transonic Wind Tunnel 515
H Miwa, M Sato, S Sakakibara and K Takashima

The Flow Measurement of High Specific Centrifugal Compressor 521
M Saito, K Kurata, N Misaki, Y Imai and K Akiyama D

Development of Acceleration Mechanism of Liquid by Boiling of Pulsatingly Injected Liquid Freon 527
S Saito, A Yasumatsu and T Sakai

Collision of Multiple Supersonic Jets Related to Pip Noise Generation in Cage Valve 533
R Okutsu, W Oomoto, E Outa and T Machiyama

Ship Stern Flow Control by Use of Bilge Rotors 539
K Tokunaga

Multi-Spark Visualization of Typical Combustor Flowfields 545
D G Lilley

DISCUSSIONS 556
