

CONTENTS

INVITED PAPERS

Galaxies, Turbulence, and Plasmas <i>C.C. Lin</i>	1
Sedimentation: A Review of Developments in a Classical Problem <i>G.K. Batchelor</i>	5
Cognition and Description of Patterns in Turbulent Flows <i>Hiroshi Sato</i>	7
Laminar-Turbulent Transition: The Intermittency Revisited <i>R. Narasimha</i>	13
Observations on Transition of the Unsteady Pipe Flow <i>A. K.M.F. Hussain</i>	14
Fluid Mechanics Serving Hydraulic Engineering in China <i>Lin Bingnan</i>	16

TURBULENCE

Wall Pressure Fluctuation and Turbulence Structure of a Boundary Layer <i>Y. Kobashi, M. Ichijo and M. Hayakawa</i>	24
Nonisotropic Vortex and Uniform Turbulence <i>Cui Shutang and Wu Feng</i>	29
On Compatibility of the Basic Hypotheses and the Expansions of Second-Order Moments in the Theory of Turbulence <i>Ye Jingtang</i>	35
Simplifications of the Triade Integral in Isotropic Turbulence <i>L. Crocco and P. Orlandi</i>	41
The Relation between the Markov Process Theory and the Kolmogoroff's Theory of Turbulence and the Extension of the Kolmogoroff's Laws <i>Yue Zengyuan and Zhang Bin</i>	51
Energy Spectrum in the Equilibrium Range of Homogeneous and Isotropic Turbulence <i>Zhou Zuwei</i>	54
Numerical Approach to the Characteristic Functional of Turbulent Fields <i>Iwao Hosokawa and Kiyoshi Yamamoto</i>	60
Numerical Study of a Reacting Turbulent Grid Flow <i>Edward E. O'Brien and Tong-Ho Hsieh</i>	63
The Large Scale Structure of the Turbulent Boundary Layer <i>Sinzi Kuwabara</i>	66
Observations on Structures of Turbulent Boundary Layer in a Flow with Strong Adverse Pressure Gradient <i>Lian Qixiang</i>	70

Modeling of Turbulent Flows in Hydraulic Systems <i>S. Y. Wang</i>	78
Characteristics of Fine-Scale Turbulence in Boundary Layers <i>K.R. Sreenivasan</i>	84
Experiments on Stably Stratified Homogeneous Turbulence and the Interpretation of Ocean Microstructure Measurements <i>C.W. Van Atta</i>	91
A Stochastic Model of Intermittently Turbulent Phenomena <i>Michio Ohji, Hideki Nabeshima and A. Hiruta</i>	95
Generation of High Intensity Turbulence and Control of Its Structure in a Low Speed Wind Tunnel <i>Hideharu Makita and Shinji Miyamoto</i>	101
Simultaneous Eulerian and Lagrangian Measurements of Turbulence in a Submerged Jet for Water and Dilute Polymer Solution <i>Tan Hung and Neil S. Berman</i>	107
An Advanced Simplified Laser Time of Flight Velocimeter System <i>Yue Yao and E.D. Hirleman</i>	112
Experimental Study of the Development Processes of Taylor-Gortler Vortex (Power Spectrum Analysis of Rotating Water between Inner Cylinder Rotating and Outer Cylinder at Rest) <i>Akira Ogawa, Yoshihiko Fujita, Hisao Nagabayashi and Yukihiro Kawamoto</i> ..	117
Large Coherent Structures in Two-Dimensional Mixing Layers <i>Wei Zhonglei, Niu Zhennan and Ma Wenju</i>	123
Entrainment in Coherent Structures <i>R. Chevray and S.V. Sherikar</i>	129
Encroachment: An Extension of the Entrainment Concept to Handle a Class of Shear Flows with Disturbed Turbulence Structure <i>Venkatesa I. Vasanta Ram, Verena Schulz and Siegfried Kiske</i>	138
Study of Pressure Fluctuation beneath Hydraulic Jump by means of Statistical Theory of Turbulent Flow <i>Wang Mulan, Hu Minglong, Xia Baolian and Shang Shuanglin</i>	148
Measurement of Pressure Fluctuations in a Compound Turbulent Jet <i>Kuniaki Toyoda and Yoshikuni Shirahama</i>	155
 FLOW STABILITY	
On the Resonant Triad for the Plane Poiseuille Flow in the Subcritical Range <i>Zhou Heng</i>	161
On Stability of Certain Magnetohydrodynamic Flows <i>A S Gupta</i>	169
Investigation of Nonlinear Transition Mechanisms in Boundary-Layer Flows by Numerical Solution of the Navier-Stokes Equations <i>H. Fasel</i>	170
Weakly Nonlinear Interaction of Random Waves in Parallel Shear Flows <i>Zhang Zhaoshun</i>	176

Interaction of Detonation Wave Front and Deflagration Wave Front with Small Disturbances (Problem of Stability of Detonation and Deflagration Wave Fronts)	
<i>Xu Fu</i>	182
Critical Reynolds Numbers for the Flow in Flexible Tubes	
<i>Mieko Arakawa and Yaso'o Matunobu</i>	186
A New Approach to the Stability of Parallel Flows	
<i>Li Jiachun and Zhao Dagang</i>	192
Excitation of Unstable Waves in Supersonic Boundary Layer by Sound	
<i>Sergei Gaponov</i>	198
On the Nonlinear Stability of the Ekman Layer on a Porous Plate	
<i>B.S. Dandapat</i>	202
Topographic Instability in a Weakly Nonlinear Rossby Wave System	
<i>Yoshinori Inoue</i>	208

TRANSONIC FLOW

Subsonic and Transonic Flow Field in Two-Dimensional Laval Nozzles	
<i>Pu Qun and Lin Tongji</i>	213
A New Concept in Supercritical Airfoil Design	
<i>M. Nandan and M.A. Ramaswamy</i>	219
Potential Equation for Transonic Steady Flow with Large Longitudinal Disturbance and Line Relaxation	
<i>Luo Shijun</i>	225
Numerical Solutions of Two-Dimensional Transonic Flows by Second Order Approximation Method	
<i>Shen Keyang and Luo Shijun</i>	233
Transonic Full Potential Solutions by a Panel Method	
<i>K.S. Ravichandran, N.L. Arora and R. Singh</i>	240
Calculation of Subsonic and Transonic Flow about a Sphere or a Circular Cylinder	
<i>Liu Qiusheng and Lin Tongji</i>	246
Numerical Analysis for Aeroelastic Stability of Transonic Cascades	
<i>Lin Baozhen, Tang Zhiming and Zhou Sheng</i>	252
A Time Marching Finite Area Streamline Iteration Method and Its Application to Transonic Flow around Plane Cascade	
<i>Shen Mengyu and Chen Xidi</i>	258
On the Numerical Treatment of the Entry Boundary Conditions in Transonic Flow through Plane Cascade	
<i>Zhang Yaoke and Shen Mengyu</i>	265
An Experimental Result of Partially Modified Shockless Airfoil	
<i>Masayoshi Nakamura</i>	271
On Implementation of Boundary Condition in Axisymmetric Transonic Small Perturbation Equation	
<i>U.N. Sinha and V.R. Sarasamma</i>	277
Adaptive-Wall Wind Tunnels	
<i>Sanford Davis, Edward Schairer and Satyanarayana Bodapati</i>	283

BOUNDARY LAYER AND SHOCK WAVE

Turbulent Boundary Layers Perturbed by Embedded Bodies <i>Kirit S. Yajnik</i>	290
On the Mechanism of Drag Reduction in a Turbulent Boundary Layer Using a Thin Plate <i>S. Takagi</i>	292
The Unsteady Boundary Layer over a Semi-Infinite Flat Plate Caused by a Shock Advanced in a Moving Gas <i>S.F. Shen and Chen Yunming</i>	295
On the Propagation of a Shock Wave near a High Temperature Singularity of Strong Planar Explosion <i>Huang Dun and Rong Sheng</i>	302
Thick Boundary Layer Effects in Curved Ducts <i>A. Prabhu and B.N.S. Rao</i>	309
Three Layer Theory of a Turbulent Boundary Layer on a Flat Plate <i>Noor Afzal</i>	316
A Test of the Independence Principle in Swept Cylindrical Shock Wave/Turbulent Boundary Layer Interactions <i>Gary S. Settles and Teng Hsueh-Ying</i>	322
Bow Waves in a Supersonic Flow past a Delta Wing of a Finite Thickness with Subsonic Leading Edges <i>Tetsuya Fujimoto and Syozo Kubo</i>	328
The Pressure Calculation of a Shock Wave Diffraction around an Arbitrary 3-Dimensional Body <i>Chen Yaosong and Zou Guangyuan</i>	335
The Evolution of the Korteweg-De Vries-Burgers Shock Structure <i>Lin Yi</i>	342

AERODYNAMICS

Unified Supersonic/Hypersonic Theory of Unsteady Flow past Oscillating Airfoils <i>W.H. Hui</i>	348
Wind Loadings on Hemi-Spherical Shell <i>Ju Xingyan, Chen Weiyan, Gu Zhifu and Sun Tianfeng</i>	355
Power Augmentation in Savonius-Type Wind Rotors Using Diffusers <i>S. Sivasegaram</i>	361
Hypersonic Merged Layer on a Blunt Body <i>A.C. Jain and Saroj Prabha</i>	367
On Compressible Swirling Nozzle Flow <i>M. Yasuhara, K. Tsuboi, S. Maruyama, H. Okamoto and J.Z. Zhang</i>	374
Experimental Investigation on the Characteristics of the Side Force and Flow Phenomena of a Sharp-Nosed Slender Body of Revolution at High Angles of Attack <i>Wang Zhenyu, Chen Nanqian and Zhao Shicheng</i>	380

Experimental Investigation on the Aerodynamic Characteristics of Pointed Slender Bodies of Revolution at High Angles of Attack and Zero Sideslip <i>Yu Xinzhi, Wu Ze and Wang Daxuan</i>	386
Low Speed Aerodynamic Investigation of Forward Swept Wing <i>Zhang Lizhuang, Wang Xuejian, Guo Yuebin and Zhang Binjiang</i>	392
Transition Effects on Stability of a Slender Cone <i>Lou Hongtian</i>	398
Thermal Performance of a Gas-Loaded Heat Pipe <i>K. N. Shukla</i>	405
Thermo- and Fluid Dynamics of Heat Pipes <i>Koichi Oshima and Masahide Murakami</i>	411
The Computations of Three-Dimensional Supersonic and Two-Dimensional Subsonic Transonic Flows with Equations of Gasdynamics in Stream Surfaces(Lines) Coordinates <i>Wang Baoyu, Zhang Qinan and Chen Yu</i>	416
End Wall Flows in Aerofoil Cascades <i>K. Majka and S. Soundranayagam</i>	422
Unsteady Free Convection Induced by the Rotationally Symmetric Motion of a Vertical Plane <i>S.S. Chawla</i>	429
Measurements Related to Afterbody Studies on Thrust-Minus-Drag Rig <i>Sachidananda Kangovi and V. Krishnan</i>	432

WATER WAVES

Dam-Break Waves in Prismatic Channels <i>Lu Jikang, Lin Bingnan and Gong Zhenying</i>	440
Waves in a Stratified Fluid (A Coupled System of K-deV Equations) <i>C.H. Su</i>	446
Wave Attenuation on Rippled Beds <i>Suphat Vongvisessomjai and Philipupillai Christy Manoharan</i>	453
Wave Generation of a Slowly Moving Body <i>T. Francis Ogilvie and Chen Sixiong</i>	460
The Two-Dimensional Steady Internal Wave Field Produced by a Cylinder Moving Vertically through a Density-Stratified Liquid <i>Ulrich Gärtner, Wolfgang Merzkirch and Zhang Dieli</i>	464
Interfacial Solitary Waves in a Two-Fluid System <i>Dai Shiqiang</i>	468
Fission of Solitary Waves in a Channel <i>Zhou Xianchu</i>	475
Computation of Wave-Diffraction around Arbitrary Offshore Structures <i>Subrata Bose, A.N. Biswas and B.N. Chanda</i>	482
Application of Differential Perturbation to Wave Hydrodynamics <i>Hiroyoshi Shi-igai and Toshitatsu Kyoto</i>	487

HYDRODYNAMICS AND HYDRAULICS

The Optimum Design of the Lateral Inlet Casing of a Hydraulic Turbine <i>T.S. Luu, B. Viney and J. Corniglion</i>	491
Determination of the Ratio of Flow Rates in Bifurcating Channels <i>Mitutosi Kawaguti and Akiko Hamano</i>	495
Operating Characteristics of a Reciprocating Water Pump <i>Goh Sing Yau</i>	501
Computation of Hydrodynamic Force for Three-Dimensional Vibrating-Floating Body by Using Similar Element Method <i>Zhang Diming and Hou Shuling</i>	508
Hydrodynamic Calculation for Submarines <i>Huang Fuhua</i>	514
Study of Flow Field in a Hydrocyclone <i>A. Ghosh</i>	518
Calculation of the Flow past a Supercavitating Hydrofoils near a Free Surface in a Water of Finite Depth <i>Computational Fluid Dynamics Group, Wuhan Institute of Water Transportation Engineering, China</i>	523
Unsteady Flows in a Contracting or Expanding Vortex Tube <i>Shigeo Uchida and Yukihiro Nakata</i>	531
On the Pressure Distribution around a Circular Oscillating Cylinder in Still Water and in Currents <i>Hah Kwai Fun, Chew Yong Tian and Cham Tao Soon</i>	537
Numerical Calculation of Free Outflow under a Sluice Gate <i>Chen Yaosong and Peng Yuelin</i>	544
Hydrodynamic Pressure on Sluice Gate Plane Wetted by Water in the Case of Free Outflow <i>Chen Zhencheng</i>	550
An Adaptive Algorithm for Updating the Parameters of the Rating Curve of a Gauging Station <i>Gnanathikkam Emmanuel Amirthanathan</i>	558
Overflow Turbulent Boundary Layer and Its Characteristics <i>Liang Zaichao</i>	564
The Hydraulic Properties of Crossing-Flow in an Intersected Fracture <i>Tian Kaiming</i>	571
Experimental Study on Scale Effects of Developed Cavitation <i>Hua Hanjin and He Yousheng</i>	577
Experimental Study of Cavitation Resistance of Concrete, Brittle Cementing Materials and Some Metals in Sediment Flow <i>Huang Jitang, Tian Liyan and Li Yuzhu</i>	584
Cavitation Noise as Influenced by Viscous Effects <i>V.H. Arakeri and V. Shanmuganathan</i>	590
Calibration of an Orifice by the “Falling Head” Technique <i>Sacha Sethaputra and Charles Peterson</i>	597

COMPUTATIONAL FLUID MECHANICS

Analysis of a Wind Tunnel Contraction Using a Panel Method <i>D.R. Patil, G.R. Shevare and S.K. Sane</i>	603
3-D Shock-Boundary Layer Solution from N-S Equation <i>Ma Yanwen and Cheng S.I.</i>	609
An Explicit-Implicit Method for Numerical Solution of Supersonic and Hypersonic Separated Flow <i>Zhang Hanxin, Lu Linsheng, Yu Zechu and Ma Zhankui</i>	615
Vortex and Contour Dynamics in Two Dimensions: Steady State and Dynamical Solutions of the Euler Equations <i>H.M. Wu, E.A. Overman and N.J. Zabusky</i>	623
A Boundary Difference Scheme and Its Application in the Calculation of Steady-State Axisymmetric Nozzle Flow <i>Huang Lan-chieh</i>	629
A Difference Method for 3-D Incompressible Turbulent Boundary-Layer Calculations by Using Non-orthogonal Curvilinear Coordinate System <i>Shen Qixin</i>	635
Numerical Simulation of Base Flow <i>S.K. Saxena, S.M. Deshpande, R. Narasimha and T.S. Prahlad</i>	643
Wall Vorticity Schemes for Viscous Incompressible Flow <i>Zhang Huisheng</i>	649
Boundary Condition Effects on the Computation of Channel Flows <i>Laszlo Fuchs</i>	656
The Conjugate Gradient Method and Block Iterative Method for Penalty Finite Element of Three-Dimensional Navier-Stokes Equations <i>Li Kaitai, Huang Aixiang, Li Du and Liu Zhixing</i>	664
Modelling Transient State Circulation and Temperature Distribution in Shallow Cooling Pond by Finite Element Method <i>Zhu Xian, Wu Jianghang and Liu Lanfen</i>	672
Finite Layer Numerical Simulation for Thermal Density Flow in Channel <i>Zhang Benzhaoh</i> ,	679
Numerical Study of Flow past Two Circular Cylinders <i>Yoshifumi Shida, Kunio Kuwahara and Hideo Takami</i>	686
Numerical Solution of Multimediuum Flow with Various Discontinuities <i>Wu Xionghua and Zhu Youlan</i>	692
A Term-Condensing Method and Generalized Potential-, Stream- and Path-Functions for 3-D Compressible Viscous Flow <i>Liu Gaolian</i>	698

LOW REYNOLDS NUMBER FLOW AND KINETIC THEORY OF GASES

The Rate of Coagulation in a Dilute Dispersion of Small Particles <i>Wen Jingsong and G.K. Batchelor</i>	705
Fine Structure of the Stokes Flow near the Central Hole of a Torus <i>Shoichi Wakiya</i>	711

Low Reynolds-Number Flow past a Cylindrical Body <i>Ko Tamada, Hiroyuki Miura and Tosio Miyagi</i>	717
Slow Viscous Flow past a Circular Cylinder <i>Chen Jingyao</i>	723
Kinetic Theory of Slightly Strong Evaporation and Condensation for a Two-Surface Problem <i>Yoshimoto Onishi</i>	732
The Maxwellian Iteration of Ikenberry & Truesdell in the Kinetic Theory of Correlated Gases <i>Chen Tianquan</i>	738

VORTEX, WAKE & JET

Wake/Boundary Layer and Wake-Wake Interactions—Smoke Flow Visualisation and Modelling <i>A.M. Savill and Zhou Ming De</i>	743
Investigation of Fluid Jet Interaction <i>Subir Kar</i>	753
Flow behind Stepped and Tapered Coaxial Cylinders <i>N.W.M. Ko, A.S.K. Chan and C.M. Kan</i>	755
Air Entrainment by Plunging Liquid Jet <i>Afzal Ahmad</i>	761
Visualization of Longitudinal Vortices in a Concave Surface Boundary Layer <i>S.H. Winoto</i>	767
Flowfields Produced by a Vortex Ring or a Pair of Rectilinear Vortices Approaching a Solid Body <i>Hideo Yamada, Haruo Yamabe and Tatsuya Matsui</i>	777
Entanglement of Two Vortex Filaments <i>Ryuji Takaki and A.K.M.F. Hussain</i>	783
Experimental Determination of a Three-Dimensional Vorticity Field in the Boundary-Layer Transition Process <i>David R. Williams and Francis R. Hama</i>	789
Unsteady Flow Visualization of Airfoils with Spoilers <i>Satyanarayana Bodapati</i>	795
Autorotation of a Symmetrical Body <i>Yuko Oshima and Naoki Izutsu</i>	801
Experimental Study of Starting Flow behind a Triangular Prism in Uniform and Stratified Flow <i>Huhe Aode, Yan Mingshan, Zhang Boyin and Liu Keqi</i>	807
Surface Flow Patterns on a Delta Wing Mounted on a Cylindrical Body <i>Li Suxun</i>	813
Experimental Studies of Free-Surface Vortices near the Entrances of Outlets <i>Xie Peizhen, Lin Zongxin, Yang Zhengjun and Pan Mengqin</i>	821

The Wake Structure of a Sharp-Edged Square Plate Normal to an Air Stream <i>Wu Fenglin, Wei Qingding and Zhou Guangjiong</i>	827
Measurements in the Wake of a Symmetric Aerofoil at Zero Incidence <i>K.S. Hebbar</i>	833
Study of Flow Mechanism past Two-Dimensional Rectangular Cylinders <i>Lu Zhiyong and Laneville, A.</i>	844
Fluid Flow Studies on Radial Injectors of Liquid Rocket Engines <i>B.N. Raghunandan, A. Vidyarthi, H.S. Mukunda and P.J. Paul</i>	853
A Study of the Turbulent Axisymmetric Jet <i>W.K. George, S.P. Capp, A.A. Seif, C.B. Baker and D.B. Taulbee</i>	863
Jet Excited by External Oscillations in the Potential Core Region <i>M.A. Badri Narayanan and S. Raghu</i>	869
Some Effects of Nozzle Lip Geometry on Jet Noise <i>Fujihiko Sakao and Masao Hiramoto</i>	874
Jet Noise Generated by Instability Waves <i>Yan Dachun</i>	880

GEOPHYSICAL AND ASTROPHYSICAL FLUID MECHANICS

The Initial Cause of Changes in Atmospheric Motions <i>Wang Shizhong</i>	885
Finite Amplitude Dynamics of Baroclinic Waves <i>Joseph Pedlosky</i>	895
Studies on the Motion and Core Structure of a Geostrophic Vortex <i>Lu Ting and Ling Guo-Can</i>	900
Enhancement of Turbulence by Surface Waves on Grid-Stirred Layers: A Contribution to Ocean Mixed Layer Exchange Processes? <i>Jia Fu and N.H. Thomas</i>	906
The Numerical Simulation of Typhoon <i>Zhang Ming and Zeng Qingcun</i>	912
Atmospheric Diffusion under Light Wind <i>Zu Tielin</i>	918
A Numerical Simulation Study on the Zonal Vortex Formation in the Boundary Layer over Qinghai-Tibet Plateau <i>Zhang Jijia, Peng Yongqing, Qian Weihong and Wang Dingliang</i>	924
Nonlinear Rossby Waves <i>Zhang Xuehong and Zeng Qingcun</i>	931
On the Coastal Boundary Condition for Wind-Driven Circulation in Shallow Sea <i>Su Jilan</i>	938
The Classification of a Family of Stratified Shear Flow and Some Relevant Nonlinear Solution <i>Liu Shida, Chen Jiayi, Liu Shikuo and Wang Shufang</i>	945
Density Waves in Thin Disk-Shaped Spiral Galaxies <i>S.P. Ho</i>	953

TWO-PHASE FLOW

Heat Flux for Countercurrent Two-Phase Flow of Laminar Falling Film and Turbulent Vapour in Vertical Tubes <i>R. Mottaghian and Z. Nejat</i>	958
Reacting Flow in Gas-Solid Fluidization Systems <i>Chen Gantang, Sun Guanglin, Wang Zhangmou and Chen Jianxin</i>	964
Study of the Influence of Density and Grain-Size of Cloud of Particles on Drag Coefficient in Gas-Solid Two-Phase Flow <i>Zhou Yanhuang, Sun Xingchang and Yin Hebao</i>	971
Mixing and Combustion in Two-Phase Flow of a Pulverized-Coal Flame Stabilized by a Plasma Jet <i>Zhou Lixing and Yang Zeliang</i>	977
Film Boiling Characteristics of Freon-12 <i>C.P. Tso, S.H. Teh and K.K. Lim</i>	988
Strong Shock Wave Propagation in Two-Phase Flow <i>Fan Zhengqiao, Lian Guisen and Ren Anlu</i>	993

FLOW THROUGH POROUS MEDIA

Microscopic and Macroscopic Researches on Multiphase Flow through Porous Media <i>Guo Shangping, Huang Yanzhang, Ma Xiaowu and Zhou Juan</i>	997
Two-Phase Displacement of Non-Newtonian Fluid <i>Chen Lilian and Wu Wangyi</i>	1003
On Transport of Groundwater Contamination <i>A. Das Gupta</i>	1009
Turbulent Convection in Porous Media Using Spectral Method <i>N. Rudraiah</i>	1015
Thermal Cellular Convection in a Rotating Fluid Saturated Porous Layer Using Brinkman's Model <i>R. Friedrich and N. Rudraiah</i>	1021
Parameter Identification of Fluid Dynamic Systems with Double Porosity <i>Li Yun and Lang Zhaoxin</i>	1032
A New Numerical Method of Simulating Two-Dimensional Two-Phase Flow through a Medium with Single- or Double-Porosity <i>Liu Mingxin and Chen Zhongxiang</i>	1038

NON-NEWTONIAN FLOW

On the Explicit Form of Differential Operator for the Oldroyd Rate Type Constitutive Equation <i>Chen Yihong, Xu Yuanze and C.F. Chan Man Fong</i>	1044
Mechanical Laws of Polymer Drag Reduction Flow <i>Dou Guoren</i>	1050
Viscoelastic Effects on Slider Bearing Lubrication <i>C.F. Chan Man Fong and Cai Fushi</i>	1057

Influence of Inertia Effect on the Kinematics and Dynamics in Converging Flow of Non-Newtonian Fluids <i>Xu Yuanze and Chen Yihong</i>	1062
Study on Mass and Heat Transfer in Film Flow of Non-Newtonian Power-Law Fluids <i>Jiang Tiqian</i>	1070
Stability of Flow of a Generalized Second-Order Fluid down an Inclined Plane <i>Fan Chun</i>	1078
Rheological Properties of Some Water-Based Gel Fracturing Fluids from Polymers <i>Xu Xi, Ru Delin, Yang Changmei, Yang Zhonghe, Huo Junjun, Zhu Zhaoming, Xiang Shiqi and Lian Shengjiang</i>	1084

MAGNETOHYDRODYNAMICS AND PHYSICO-CHEMICAL FLOW

Some New Comments on Hydromagnetic Shocks <i>C. K. Chu</i>	1091
MHD Flow in a Homopolar Device with Wire Electrodes <i>Hu Wenrui</i>	1093
On the Problems of Magnetohydrodynamic (MHD) Lubrication by the Methods of Quasilinearization and Adjoints <i>Guo Bentie, Ying Yuyan and Chen Bangguo</i>	1100
A Theoretical Model of Gas Flow Laser Amplifier <i>Gao Zhi</i>	1107
Numerical Simulation of Two-Dimensional Two-Phase Stefan Problems <i>Xin Xiaokang and E. Varoglu</i>	1113
Theory of the Reaction Surface with $L_{ef} \neq 1$ and Its Application to Investigation of Oxidation-Sublimation Coupling Process <i>Zhong Jiakang</i>	1119

BIOFLUID-MECHANICS

The Inlet Effect on the Drag Factor of a Sphere at Low Reynolds Number <i>Wu Wangyi and Richard Skalak</i>	1125
Some New Phenomena of Steady Flow in Collapsible Tube <i>Tao Zulai and Xi Baoshu</i>	1132
An Investigation on Electrochemical Measurement of Wall Shear Stresses in the Flow Field of Cardiac Valve Prosthesis <i>Deng Xiaoyan</i>	1139

AUTHER INDEX	1147
