

CONTENTS

Hypersonics Committee	v
Preface	vii
The ARS – AFOSR International Hypersonics Conference: Summary and Comments	1
Albert D. Wood and Adrian Pallone	
<u>A. Hypersonic Flow at Low Reynolds Number</u>	
Introduction	11
Lester Lees	
Density Behavior along the Stagnation Line of a Blunt Body in Hyperthermal Flow	13
Hakuro Oguchi	
Second-Order Compressible Boundary Layer Theory with Application to Blunt Bodies in Hypersonic Flow	37
Milton Van Dyke	
<i>Comment on above paper</i>	77
M. Lenard	
Rarefied Hypersonic Flow over a Sphere	81
E. S. Levinsky and H. Yoshihara	
The Rayleigh Problem for a Dissociated Gas	107
F. K. Moore and W. J. Rae	
<u>B. Chemical Kinetic Effects in Hypersonic Flow</u>	
Introduction	141
Edwin L. Resler, Jr.	
Chemical Kinetics: A General Introduction	143
S. H. Bauer	
Chemical Kinetics of High Temperature Air	181
Kurt L. Wray	
Chemical Effects in External Hypersonic Flows	205
Roberto Vaglio-Laurin and Martin H. Bloom	
Radiation at Hypersonic Speeds	255
Charles E. Treanor	
Radiation from the Nonequilibrium Shock Front	281
J. D. Teare, S. Georgiev, and R. A. Allen	
<u>C. Inviscid Hypersonic Flow</u>	
Introduction	319
Marten Landahl	
Slender Wings at High Angles of Attack in Hypersonic Flows	321
Julian D. Cole and Jerome J. Brainerd	

Newtonian Theory of Hypersonic Flow at Large Distances from Bluff Axially Symmetric Bodies.	345
N. C. Freeman	
Shock Layer Structure and Entropy Layers in Hypersonic Conical Flows. .	379
Robert E. Melnik and Richard A. Scheuing	
Theory of Entropy Layers and Nose Bluntness in Hypersonic Flow	421
James K. Yakura	
<u>D. Experimental Techniques I</u>	
Introduction	471
Peter P. Wegener	
Aerodynamic Testing at Mach Numbers from 15 to 20	473
J. Lukasiewicz, Jack D. Whitfield, and R. Jackson	
The Duration and Properties of the Flow in a Hypersonic Shock Tunnel . .	513
D. W. Holder and D. L. Schultz	
An Evaluation of the Hypersonic Gun Tunnel	547
K. N. C. Bray	
Diagnostic Studies of a Low Density, Arc Heated Wind Tunnel Stream . . .	581
F. S. Sherman and L. Talbot	
Initial Results from a Low Density, Hypervelocity Wind Tunnel	599
J. L. Potter, M. Kinslow, G. D. Arney, Jr., and A. B. Bailey	
<u>E. Experimental Techniques II</u>	
Introduction	625
Henry T. Nagamatsu	
The Free Flight Range: A Tool for Research in the Physics of High Speed Flight	627
A. C. Charters	
Survey of Shock Tube Research Related to the Aerophysics Problem of Hypersonic Flight	651
S. C. Lin	
Air Arc Simulation of Hypersonic Environments	663
W. R. Warren and N. S. Diaconis	
Development of the Shock Tunnel and Its Application to Hypersonic Flight	701
A. Hertzberg, C. E. Wittliff, and J. G. Hall
