

# Contents

## Session 1 : Opening session

Chairman : R. Michel

M.V. Morkovin E. Reshotko	*) Dialogue on Progress and Issues in Stability and Transition Research	3
F.J.M. Wubben D.M. Passchier J.L. Van Ingen	Experimental Investigation of Tollmien Schlichting Instability and Transition in Si- milar Boundary Layer Flow in an Adverse Pressure Gradient	31
B. Klingmann P.H. Alfredsson	On the Development of Turbulent Spots in Plane Poiseuille Flow	43
D.V. Maddalon F.S. Collier L.C. Montoya R.J. Putnam	Transition Flight Experiments on a Swept Wing with Suction	53

## Session 2 : Fundamental Aspects 1

Chairman : W.S. Saric

Y.S. Kachanov	*) Secondary and Cascade Resonant Instabi- lities of Boundary Layers. Wave-Resonant Concept of a Breakdown and its Substantiation	65
F.T. Smith	Nonlinear Breakdowns in Boundary Layer Transition	81
T. Herbert J.D. Crouch	Threshold Conditions for Breakdown of Laminar Boundary Layers	93
A.I. Ruban	Propagation of Wave Packets in the Boundary Layer on a Curved Surface	103
A.V. Dovgal V.Ya Levchenko V.A. Timofeev	Boundary Layer Control by a Local Heating of the Wall	113

## XXIV

### Poster Session 1

P.W. Carpenter P.K. Sen	Effects of Boundary-Layer Growth on the Linear Regime of Transition over Compliant Walls	123
W. Nitsche P. Mirow T. Dörfler	Investigations on Flow Instabilities on Airfoils by Means of Piezofoil-Arrays	129
M.B. Zelman I.I. Maslennikova	On the Spatial Structure of Disturbances in Boundary Layer Subharmonic Transition	137
P.A. Stewart	Three-Dimensional Effects in Boundary-Layer Transition : A High Reynolds Number Weakly Nonlinear Theory	143

### Session 3 : Fundamental Aspects 2

Chairman : V.Ya Levchenko

T.C. Corke	*) Effect of Controlled Resonant Interactions and Mode Detuning on Turbulent Transition in Boundary Layers	151
M.T. Landahl	Role of Transients in Boundary Layer Instability and Transition	179
K.S. Breuer	The Evolution of a Localized Disturbance in a Laminar Boundary Layer	189
J.Tso S.I. Chang R.F. Blackwelder	On the Breakdown of a Wave-Packet Disturbance in a Laminar Boundary Layer	199
M. Asai M. Nishioka	Development of Wall Turbulence in Blasius Flow	215

### Session 4 : Compressible Flows

Chairman : T. Cebeci

I.E. Beckwith F.J. Chen M.R. Malik	*) Transition Research in Low-Disturbance High-Speed Wind Tunnels	227
--	---	-----

XXV

A.D. Kosinov A.A. Maslov S.G. Shevelkov	Experimental Study of the Supersonic Boundary Layer Stability on the Cone-Cylinder Model	239
M.R. Malik	Stability Theory fo Chemically Reacting Flows	251
L.M. Mack	+) Effects of Suction, Pressure Gradient and Cooling on High Speed Boundary Layer Stability	
S. Cowley P. Hall	On the Instability of Hypersonic Flow Past a Wedge	261
J.A. Masad A.H. Nayfeh	On the Subharmonic Instability of Compressible Boundary Layers	271

Poster Session 2

D.S. Henningson A.V. Johansson A. Lundbladh	On the Evolution of Localized Disturbances in Laminar Shear Flows	279
M.B. Zelman B.V. Smorodsky	On the Wave Packets Interaction in a Transitional Boundary Layer	285
G. Gasperas	Stability of the Laminar Boundary Layer for an Imperfect Gas	291
A. Thumm W. Wolz H. Fasel	Numerical Simulation of Spatially Growing Three-Dimensional Disturbance Waves in Compressible Boundary Layers	303

Session 5 : Stability in 3D Flows

Chairman : L. Mack

D. Arnal G. Casalis J.C. Juillen	*) Experimental and Theoretical Analysis of Natural Transition on "Infinite" Swept Wing	311
H.H. Chen T. Cebeci	An Evaluation of Stability-Based Methods for Transition of Three-Dimensional Flows	327

## XXVI

F.S. Collier D.W. Bartlett R.D. Wagner V.V. Tat B.T. Anderson	Correlation of Boundary Layer Stability Analysis with Flight Transition Data	337
H.L. Reed G. Stuckert P. Balakumar	Stability of High-Speed Chemically Reacting and Three-Dimensional Boundary Layers	347
N. Itoh	Cross-Flow Instability of 3D Boundary Layers on a Flat Plate	359
J.R. Dagenhart W.S. Saric J.A. Hoos M.C. Mousseux	Experiments on Swept-Wing Boundary Layers	369

### Poster Session 3

J. Viken F.S. Collier R.D. Wagner D.W. Bartlett	On the Stability of Swept Wing Laminar Boundary Layers Including Curvature Effects	381
V. Theofilis P.W. Duck D.I.A. Poll	An Investigation of the Non-linear Instability of Flow near a Swept Attachment-Line	389
K.R. Kirchartz	Time dependent Instabilities of Rayleigh-Bénard Convection in Boxes	395
W. Pfenninger C.S. Vemuru F.S. Collier	Blunt-Nosed Swept Supercritical LFC Wings Without Nose Flaps	401
M. Douaya G. Cognet	+d) Analysis of Transition in Taylor-Couette Flow with Small Aspect Ratio	

Session 6 : 3D Flows and Longitudinal Vortices

Chairman : J.L. Van Ingen

H. Bippes	*) Instability Features Appearing on Swept Wing Configurations	419
Y. Kohama F. Ohta K. Segawa	Development and Interaction of Instabilities in the Crossflow Field	431
A.S. Sabry X. Yu J.T.C. Liu	Secondary Instabilities of Three-Dimensional Inflectional Velocity Profiles Resulting from Longitudinal Vorticity Elements in Boundary Layers	441
P. Hall Y.B. Fu	On the Görtler Vortex Instability Mechanism at Hypersonic Speeds	453
J. Matsson P.H. Alfredsson	+ ) Instabilities in Curved and Rotating Channels Flow	
S. Masuda M. Matsubara	Visual Study of Boundary Layer Transition on Rotating Flat Plate	465

Session 7 : Receptivity

Chairman : M. Nishioka

E.J. Kerschen M. Choudhari R.A. Heinrich	*) Generation of Boundary Layer Instability Waves by Acoustic and Vortical Free-Stream Disturbances	477
B. Müller	Experimental Study of the Travelling Waves in a Three-Dimensional Boundary Layer	489
Y.S. Kachanov O.I. Tararykin	The Experimental Investigation of Stability and Receptivity of a Swept-Wing Flow	499
H.R. Grek V.V. Kozlov M.P. Ramazanov	Receptivity and Stability of the Boundary Layer at a High Turbulence Level	511
A.V. Dovgal V.V. Kozlov	Hydrodynamic Instability and Receptivity of Small Scale Separation Regions	523

## **XXVIII**

### Poster Session 4

A. Chpoun	Hypersonic Transitional Flow in a Compression Corner in 2D Configuration	533
M. Wimmer	Classification of Laminar-Turbulent Transition near Rotating Bodies	545
R. Kobayashi T. Arai	Spiral Vortex Behaviour in Transition Region and Separation of Three-Dimensional Boundary Layers on Spheres Rotating in Axial Flow	551
W.H. Finlay	Wavy Vortices in Rotating Channel Flow	559
S. Jallade D. Arnal H. Ha Minh	Theoretical Study of Görtler Vortices : Linear Stability Approach	565
V.S. Kosorygin N.Ph. Polyakov	Laminar Boundary Layers in Turbulent Flows	573
J.M. Floryan U. Dallmann	Certain Aspects of Flows over Rough Leading Edges	579

### Session 8 : Numerical Simulations

Chairman : Miss H.L. Reed

H. Fasel	*) Numerical Simulation of Instability and Transition in Boundary Layer Flows	587
X. Normand M. Lesieur P. Comte	Large-Eddy Simulations of Mixing Layers	598
F. Meyer L. Kleiser	Numerical Simulation of Transition due to Crossflow Instability	609
P.R. Spalart	Direct Numerical Study of Crossflow Instability	621
G. Erlebacher M.Y. Hussaini	Second Mode Interactions in Supersonic Boundary Layers	631

Session 9 : 3D Roughness elements

A.C. de Bruin	The Effect of a Single Cylindrical Roughness Element on Boundary Layer Transition in a Favourable Pressure Gradient	645
D.I.A. Poll	The Effect of Isolated Roughness Elements on Transition in Attachment Line Flows	657
D. Arnal F. Vignau J.C. Juillen	Boundary Layer Tripping in Supersonic Flow	669

Poster Session 5

M. Kloker H. Fasel	Numerical Simulation of Two- and Three-Dimensional Instability Waves in Two-dimensional Boundary Layers with Streamwise Pressure Gradient	681
L.D. Kral H.F. Fasel	Numerical Simulation of the Control of the Three-Dimensional Transition Process in Boundary Layers	687
U. Piomelli T.A. Zang C.G. Speziale M.Y. Hussaini	On the Application of Large-Eddy Simulation to Transitional Wall-Bounded Flows	693
L. Gaudet	Visualisation of Boundary Layer Transition	699
N.W.M. Ko Y.C. Leung	Control of Transition of Flow over Circular Cylinder	705

\*) Invited lecture
