

CONTENTS

Preface	ix
Dedication	xv
White Noise and Stochastic Analysis J. Asch and J. Potthoff	1
Quelques Remarques sur le Cut-Locus sous-Riemannien G. Ben Arous and R. Léandre	15
Simulation on Random Graphs of the Epidemic Dynamics of Sexually Transmitted Diseases – A New Model for the Epidemiology of AIDS G. F. Bolz	23
Sur une version à deux dimensions du modèle de Ginzburg et Landau pour la supraconductivité A. Boutet de Monvel	53
Differential Calculus and Integration by Parts on Poisson Space E. A. Carlen and E. Pardoux	63
Introduction to Entire Cyclic Cohomology (of $\mathbb{Z}/2$ -Graded Banach Algebras) D. Kastler	75
Stochastic Analysis, Mathematical Structures and Distributions Methods P. Kreé	153
Ward Identities for Conformal Models S. Lazzarini and R. Stora	169
Dynamical Systems in Plasma Theory E. K. Maschke	173
Bosonic Strings and Measures on Infinite Dimensional Manifolds S. Paycha	189
A Reaction-Diffusion Model for Moderately Interacting Particles H. Rost	205
Nondegeneracy in the Perturbation Theory of Integrable Dynamical Systems H. Rüssmann	211
Energy Forms in Terms of White Noise L. Streit	225
Linear Stability and the Parameter Modulation Approach for Solitary Waves in Hamiltonian Systems with Symmetries J. Stubbe	235
Index	247
