	Page
Arminjon, P., Dervieux, A., Fezoui, L., Steve, H., Stoufflet, B.: Non-oscillatory schemes for multidimensional Euler calculations with unstructured grids ...	1
Billet, G.: Finite-difference schemes with dissipation control joined to a generalization of van Leer flux splitting .....	11
Binninger, B., Jeschke, M., Henke, H., Hänel, D.: Computation of inviscid vortical flows in Piston engines .....	21
Bourdelle, F., Delorme, Ph., Mazet, P.A.: Convexity in hyperbolic problems. Application to a discontinuous Galerkin method for the resolution of the polydimensional Euler equations .....	31
Brio, M.: Admissibility conditions for weak solutions of nonstrictly hyperbolic systems .....	43
Cahouet, J., Coquel, F.: Uniformly second order convergent schemes for hyperbolic conservation laws including Leonard's approach .....	51
Causon, D.M.: High resolution finite volume schemes and computational aerodynamics .....	63
Christiansen, S.: A stability analysis of a Eulerian method for some surface gravity wave problems .....	75
Degond, P., Mustieles, F.J., Niclot, B.: A quadrature approximation of the Boltzmann collision operator in axisymmetric geometry and its application to particle methods .....	85
Dubois, F., Le Floch, P.: Boundary conditions for nonlinear hyperbolic systems of conservation laws .....	96
Eliasson, P., Rizzi, A., Andersson, H.I.: Time-marching method to solve steady incompressible Navier-Stokes equations for laminar and turbulent flow ...	105
Engelbrecht, J.: On the finite velocity of wave motion modelled by nonlinear evolution equations .....	115
Fernandez, G., Larrouy, B.: Hyperbolic schemes for multi-component Euler equations .....	128

	Page
Fogwell, T.W., Brakhagen, F.: Multigrid methods for solution of porous media multiphase flow equations .....	139
Freistühler, H.: A standard model of generic rotational degeneracy .....	149
Gimse, T.: A numerical method for a system of equations modelling one-dimensional three-phase flow in a porous medium .....	159
Glimm, J.: Nonuniqueness of solutions for Riemann problems .....	169
Goldberg, M., Tadmor, E.: Simple stability criteria for difference approximations of hyperbolic initial-boundary value problems .....	179
Greenberg, J.M.: Hyperbolic heat transfer problems with phase transitions .	186
Gustafsson, B.: Unsymmetric hyperbolic systems and almost incompressible flow .....	193
Hackbusch, W., Hagemann S.: Frequency decomposition multi-grid methods for hyperbolic problems .....	209
Hanyga, A., Fabrizio, M.: Existence and uniqueness for linear hyperbolic systems with unbounded coefficients .....	218
Harabetian, E.: A numerical method for computing viscous shock layers ....	220
Henke, H.H.: Solution of the Euler equations for unsteady, two-dimensional transonic flow .....	230
Holden, H., Holden, L.: On some recent results for an explicit conservation law of mixed type in one dimension .....	238
Hsiao, L.: Qualitative behaviour of solutions for Riemann problems of conservation laws of mixed type .....	246
Hunter, J.K.: Strongly nonlinear hyperbolic waves .....	257
Isaacson, E., Marchesin, D., Plohr, B.J.: The structure of the Riemann solution for non-strictly hyperbolic conservation laws .....	269
Klein, R.: Detonation initiation due to shock wave-boundary interactions ...	279

Klingenberg, C., Osher, S.: Nonconvex scalar conservation laws in one and two space dimensions .....	289
Koren, B.: Upwind schemes for the Navier-Stokes equations.....	300
Kosiński, S.: Normal reflection transmission of shock waves on a plane interface between two rubber-like media .....	310
Kosiński, W.: On the concept of weak solutions in the BV-space .....	320
Kozel, K., Vavřincová, M., Nhac, N.: Numerical solution of the Euler equations used for simulation of 2D and 3D steady transonic flows .....	329
Kröner, D.: Numerical schemes for the Euler equations in two dimensions without dimensional splitting .....	342
Lar'kin, N.A.: Initial-boundary value problems for transonic equations in the unbounded domain .....	353
Le Floch, P.: Entropy weak solutions to nonlinear hyperbolic systems in nonconservation form .....	362
Le Roux, A.Y., De Luca, P.: A velocity-pressure model for elastodynamics .	374
Mandal, J.C., Deshpande, S.M.: Higher order accurate kinetic flux vector splitting method for Euler equations .....	384
Marshall, G.: Monte Carlo finite difference methods for the solution of hyperbolic equations .....	393
Mertens, J., Becker, K.: Numerical solution of flow equations. An aircraft designer's view .....	403
Montagné, J.-L., Yee, H.C., Klopfer, G.H., Vinokur, M.: Hypersonic blunt body computations including real gas effects .....	413
Moretti, G., Dadone, A.: Airfoil calculations in Cartesian grids .....	423
Morton, K.W., Childs, P.N.: Characteristic Galerkin methods for hyperbolic systems .....	435
Munz, C.D., Schmidt, L.: Numerical simulations of compressible hydrodynamic instabilities with high resolution schemes .....	456

	Page
Pandolfi, M.: On the "Flux-difference splitting" formulation .....	466
Peradzynski, Z.: On overdetermined hyperbolic systems .....	482
Pfitzner, M.: Runge-Kutta split-matrix method for the simulation of real gas hypersonic flows .....	489
Pham Ngoc Dinh, A., Dang Dinh Ang: On some viscoelastic strongly damped nonlinear wave equations .....	499
Rostand, P., Stoufflet, B.: TVD schemes to compute compressible viscous flows on unstructured meshes .....	510
Schick, P., Hornung, K.: Nonstationary shock wave generation in droplet vapour mixtures .....	521
Schöffel, St.U.: Nonlinear resonance phenomena for the Euler-equations coupled with chemical reaction-kinetics .....	530
Sethian, J., Osher, S.: The design of algorithms for hypersurfaces moving with curvature-dependent speed .....	544
Shapiro, R.A.: Prediction of dispersive errors in numerical solutions of the Euler equations .....	552
Sommerfeld, M.: Numerical prediction of shock wave focusing phenomena in air with experimental verification .....	562
Staat, M., Ballmann, J.: Fundamental aspects of numerical methods for the propagation of multi-dimensional nonlinear waves in solids .....	574
Straškraba, I.: On a nonlinear telegraph equation with a free boundary .....	589
Sweby, P.K.: "TVD" schemes for inhomogenous conservations laws .....	599
Temple, B.: The $L^1$ -Norm distinguishes the strictly hyperbolic from a non-strictly hyperbolic theory of the initial value problem for systems of conservation laws .....	608
Ting, T.C.T.: The Riemann problem with umbilic lines for wave propagation in isotropic elastic solids .....	617

Toro, E.F.: Random-choice based hybrid methods for one and two dimensional gas dynamics .....	630
Voskresensky, G.P.: Some features of numerical algorithms for supersonic flow computation around wings of lifting vehicles .....	640
Wada, Y., Kubota, H., Ishiguro, T., Ogawa, S.: Fully implicit high-resolution scheme for chemically reacting compressible flows .....	648
Warming, R.F., Beam, R.M.: Stability of semi-discrete approximations for hyperbolic initial-boundary-value problems: Stationary modes .....	660
Wendroff, B., White, A.B.: Some supraconvergent schemes for hyperbolic equations on irregular grids .....	671
Westenberger, H., Ballmann, J.: The homogeneous homentropic compression or expansion - A test case for analyzing Sod's operator-splitting .....	678
Zajaczkowski, W.M.: Global existence of solutions for noncharacteristic mixed problems to nonlinear symmetric dissipative systems of the first order ...	688
Ziółko, M.: Stability of initial - boundary value problems for hyperbolic systems .....	698
List of Participants and Authors .....	708
Support and Sponsorship Acknowledgements .....	718
