Invited Lectures

CHAPMAN, D.R.: Trends and Facing Items in Computational Aerodynamics.....	1
LONGUET-HIGGINS, M.S.: Polygon Transformations in Fluid Mechanics.....	12
RUSANOV, V.V.: On the Computation of Discontinuous Multi-Dimensional Gas Flows.....	31
VIVIAND, H.: Pseudo-Unsteady Methods for Transonic Flow Computations.....	44

Contributed Papers

ARLINGER, B.: Axisymmetric Transonic Flow Computations Using a Multigrid Method.....	55
BAKER, G.R., and ISRAELI, M.: Numerical Techniques for Free Surface Motion with Application to Drop Motion Caused by Variable Surface Tension.....	61
BARTELS, F.: Viscous Flow Between Concentric Rotating Spheres.....	68
BAUM, H.R., CIMENT, M., DAVIS, R.W., and MOORE, E.F.: Numerical Solutions for a Moving Shear Layer in a Swirling Axisymmetric Flow.....	74
BENQUE, J.P., COEFFE, Y., and HERLEDAN, R.: Flow Induced by a Jet in a Cavity - Measurements and 3D Numerical Simulation.....	80
BOOK, D., BORIS, J., KUHL, A., ORAN, E., PICONE, M., and ZALESK, S.: Simulation of Complex Shock Reflections from Wedges in Inert and Reactive Gaseous Mixtures.....	84
BRILEY, W.R. and McDONALD, H.: Computation of Three-Dimensional Horseshoe Vortex Flow Using the Navier-Stokes Equations.....	91
BRUSHLINSKY, K.V., SAVEL'EV, V.V., and ZUEVA, N.M.: Numerical Analysis of Stability in Magneto-hydrodynamical Problems.....	99
BUNEMAN, O.: Compressible Flow Simulation Using Hamilton's Equations and Clebsch-type Vortex Parameters.....	103
CHATTOT, J.J., GUIU-ROUX, J. and LAMINIE, J.: Finite Element Calculation of Steady Transonic Flow in Nozzles Using Primary Variables.....	107
CHEN, H.: Improved Surface Velocity Method for Transonic Finite-Volume Solutions.....	113
CLOUTMAN, L.D., DUKOWICZ, J.K., and RAMSHAW, J.D.: Numerical Simulation of Reactive Flow in Internal Combustion Engines.....	119
COUËT, B., and LEONARD, A.: Mixing Layer Simulation by an Improved Three-Dimensional Vortex-in-Cell Algorithm.....	125
CUVELIER, C.: On the Numerical Solution of a Capillary Free Boundary Problem Governed by the Navier-Stokes Equations.....	132

IV

DECONINCK, H., and HIRSCH, C.: Transonic Flow Calculations with Higher Order Finite Elements.....	138
DEMIRDZIC, I., GOSMAN, A.D., and ISSA, R.: A Finite-Volume Method for the Prediction of Turbulent Flow in Arbitrary Geometries.....	144
DENNIS, S.C.R., and INGHAM, D.B.: A Finite Difference Method for the Slow Motion of a Sphere in a Rotating Fluid.....	151
DERVIEUX, A., and THOMASSET, F.: Multifluid Incompressible Flows by a Finite Element Method.....	158
DULIKRAVICH, D.S.: Numerical Calculation of Transonic Axial Turbomachinery Flows.....	164
DWYER, H.A., RAISZADEH, F., and OTEY, G.: A Study of Reactive Diffusion Problems with Stiff Integrators and Adaptive Grids.....	170
EISEMAN, P.R.: Coordinate Generation with Precise Controls.....	176
FLETCHER, C.A.J.: An Alternating Direction Implicit Finite Element Method for Compressible, Viscous Flow.....	182
FROMM, J.: Finite Difference Computation of the Capillary Jet, Free Surface Problem.....	188
FUJII, K.: Simultaneous Solutions of Inviscid Flow and Boundary Layer at Transonic Speeds.....	194
HERBERT, T.: Numerical Studies on Nonlinear Hydrodynamic Stability by Computer-Extended Perturbation Series.....	200
HIRSH, R.S., and FERGUSON, R.E.: Compact Differencing Schemes for Advective Problems.....	206
HORIUTI, K., KUWAHARA, K., and Oshima, Y.: Study of Two-Dimensional Flow Past an Elliptic Cylinder by Discrete-Vortex Approximation.....	212
HUANG, D., LI, Y.F., HUANG, L.P., and LIU, Y.Z.: Two Analytical Solutions for the Reflection of Unsteady Shock Wave and Relevant Numerical Tests..	218
INOUE, O.: Separated Boundary Layer Flows with High Reynolds Numbers.....	224
ISRAELI, M., and UNGARISH, M.: Improvement of Numerical Schemes by Incorporation of Approximate Solutions Applied to Rotating Compressible Flows.....	230
JOHNSON, G.M.: An Alternative Approach to the Numerical Simulation of Steady Inviscid Flow.....	236
KENTZER, C.P.: Reformulation of the Method of Characteristics for Multidimensional Flows.....	242
KHOSLA, P.K., and RUBIN, S.G.: A Conjugate Gradient Iterative Method.....	248
KORVING, C.: A Numerical Method for the Wave Resistance of a Moving Pressure Distribution on the Free Surface.....	254
LA HARGUE, J.P., and SOUBBARAMAYER: Numerical Methods for Solving Some Fluid Mechanics Problems Met in a Strongly Rotating Gas Centrifuge.....	260

LEE, K.D., and RUBBERT, P.E.: Transonic Flow Computations Using Grid Systems with Block Structure.....	266
LINDROOS, M.: On the Convergence of Iterative Methods for Solving the Steady-State Navier-Stokes Equations by Finite Differences.....	272
METCALFE, R.W., and RILEY, J.J.: Direct Numerical Simulations of Turbulent Shear Flows.....	279
MOL, W.J.A.: Numerical Solution of the Navier-Stokes Equations by Means of a Multigrid Method and Newton-Iteration.....	285
MORF, R.H., ORSZAG, S.A., MEIRON, D.I., FRISCH, U., and MENEGUZZI, M.: Analytic Structure of High Reynolds Number Flows.....	292
NEDELEC, J.C.: Incompressible Mixed Finite Elements for the Stokes' Equation in IR^3	299
NICHOLS, B.D., HIRT, C.W., and HOTCHKISS, R.S.: A Fractional Volume of Fluid Method for Free Boundary Dynamics.....	304
ONO, K., KUWAHARA, K., and OSHIMA, K.: Numerical Analysis of Dynamic Stall Phenomena of an Oscillating Airfoil by the Discrete-Vortex Approximation.....	310
ORLANDI, P.: Implicit Non-Iterative Scheme for Turbulent Unsteady Boundary Layers.....	316
PANDOLFI, M., and ZANNETTI, L.: A Physical Approach to Solve Numerically Complicated Hyperbolic Flow Problems.....	322
PATERA, A.T., and ORSZAG, S.A.: Transition and Turbulence in Planar Channel Flows.....	329
PIRUMOV, U.G., PROKHOROV, M.B., and RYZHOV, Y.A.: Some Mathematical Problems of the Air Basin Preservation.....	336
REDDY, K.C.: A Projection Method Based on Gaussian Quadratures with Application to Compressible Navier-Stokes Equations.....	342
RIZZI, A., and SKÖLLERMO, G.: Semidirect Solution to Steady Transonic Flow by Newton's Method.....	349
ROE, P.L.: The Use of the Riemann Problem in Finite Difference Schemes.....	354
RYZHOV, O.S., and ZHUK, V.I.: Stability and Separation of Freely Interacting Boundary Layers.....	360
SANKAR, N.L., and TASSA, Y.: An Algorithm for Unsteady Transonic Potential Flow Past Airfoils.....	367
SHIDLOVSKY, V.P.: Numerical Analysis of the Asymptotic Flow Behavior about the Edge of a Rotating Disk.....	373
SHOKIN, Y.: Analysis of Conservative Properties of the Difference Schemes by the Method of Differential Approximation.....	383
SOD, G.A.: A Generalized Hybrid Random Choice Method with Application to Internal Combustion Engines.....	387

VI.

STRANI, M., and PIVA, R.: Computational Models of Convective Motions Induced at Fluid Interfaces.....	393
TIEM, D.H., and GATIGNOL, R.: Free Molecular Flows Past a Concave Body....	399
VAN DYKE, M.: Successes and Surprises with Computer-Extended Series.....	405
VELDMAN, A.E.P., and DIJKSTRA, D.: A Fast Method to Solve Incompressible Boundary-Layer Interaction Problems.....	411
WAI, J.C., and YOSHIHARA, H.: Viscous Transonic Flow Over Airfoils.....	417
WANG, R.Q., JIAO, L.Q., and LIU, X.Z.: Numerical Methods for the Solution of the Simplified Navier-Stokes Equations.....	423
WARMING, R.F., and BEAM, R.M.: Recent Advances in the Development of Implicit Schemes for the Equations of Fluid Dynamics.....	429
WOODWARD, P.R., and COLELLA, P.: High Resolution Difference Schemes for Compressible Gas Dynamics.....	434
WU, H.M., and YANG, M.L.: SOMS - A Second Order Monotone Scheme for Shock Capturing and Its Application to the Solutions of Compressible Navier-Stokes Equations.....	442
YANENKO, N.N., KOVENYA, V.M., TARNAVSKY, G.A., and CHERNY, S.G.: Economical Methods for Solving the Problems of Gas Dynamics.....	448
YANENKO, N.N., GRIGORYEV, Y.N., and IVANOV, M.S.: Numerical Simulation of Rarefied Gas Flows.....	454
ZANG, T.A., and HUSSAINI, M.Y.: Mixed Spectral/Finite Difference Approximations for Slightly Viscous Flows.....	461
ZHU, Y.-l, and CHEN, B.-m.: An Accurate Method for Calculating the Interactions between Discontinuities in Three Dimensional Flow.....	467
LIST OF PARTICIPANTS.....	473
