PREFACE

PART 1

	<u>Page No.</u>
SECTION 1 GENERAL VISCOUS FLOW	
1. P.M. GRESHO and S.T. CHAN "A new semi-implicit method for solving the time dependent conservation equations for incompressible flows"	3
2. P. SKERGET, A. ALUJEVIC and C.A. BREBBIA 'Analysis of laminar fluid flows by boundary elements"	22
3. A.J.P. SPRAGG, S.J. MASKELL and M.A. PATRICK "Non-Newtonian flow and mixing induced by a spinning disc impeller"	39
4. C.W. RAPLEY, R. STAINSBY and A.I.C. WEBB "Developing laminar flow in elliptical ducts via the F.E.M."	51
5. R. CREFF, P. ANDRE and J. BATINA "A numerical model for a pulsed laminar flow with a slightly compressible fluid"	63
6. K.R. KUMAR, R.M. BARRON, G.W. RANKIN and K. SRIDHAR "Numerical study of fully developed non-Newtonian fluid flow through curved ducts"	74
7. G. YAGAWA and Y. EGUCHI "Penalty finite element method for transient three dimensional flow with rational Runge- Kutta method"	84

8.	H.J. BOEM, E. ZAUNER and W. SCHNEIDER "Numerical investigation of viscous flow induced by an axisymmetric laminar jet issuing from a plane wall"	96
9.	G. DHATT, G. HUBERT, D. NGUYEN and C. THIOU "Methods of pressure evaluation in a F.E. analysis of incompressible fluid flows"	107
10.	V. BODALIA, T.H. HAMMOND, D.G. KNIGHT and R.W. WILLIAMS "Comparison of theoretical and experimental flows about a finite rotating cylinder"	120
11.	E.-M. SALONEN and J. AALTO "A pressure determination scheme"	128
12.	A. MIZUKAMI "Streamline-upwind/Petrov-Galerkin form- ulations for linear triangular elements"	140
13.	K.A. CLIFFE and T. MULLIN "New results on two-cell Taylor flows"	152
14.	Z. DIMING and ZHAN JIEMIN "A numerical solution for crossing-flow in an intersection fracture"	164

SECTION 2 LUBRICATION

1.	J.O. MEDWELL "Finite element analysis of steadily loaded hydrodynamic journal bearings"	173
2.	J. CHRÓŚCIELEWSKI, Z. CYWIŃSKI, I. KREJA and W. SMOLEŃSKI "Effect of pressure and temperature related bush deformation on statical performance of journal bearings"	187
3.	R.W. JAKEMAN "Journal orbit analysis taking into account of oil film history and journal mass"	199
4.	A.J. ADDLESEE "Two dimensional resisted flow"	211

5.	T. NAKAMURA "An analysis of gas lubricated bearings in a magnetic recording disk file"	223
6.	J.F. PIERRE and R. BOUDET "Turbulent flow of non-Newtonian fluid in thin film"	235
7.	A.A.-F. MOUSTAFA, M.O.A. MOKHTAR and E.A.A. EL-DIK "A numerical solution for plain slider bearings with varied film profiles, Part I: Bearing performance"	244
8.	A.A.-F. MOUSTAFA, M.O.A. MOKHTAR and E.A.A. EL-DIK "A numerical solution for plane slider bearings with varied film profiles, Part II: Optimization"	254
9.	P. BOURGIN, M. CALONNE and B. GAY "Squeezing flow of a visco-plastic material. Numerical comparison between the Bingham model and a bi-viscosity model"	264
10.	A.S. SAMBO "Numerical solution of laminar flows in rotor- stator cavities"	274

SECTION 3 GENERAL TURBULENT FLOW

1.	A.G. HUTTON "Current progress in the simulation of turbulent incompressible flow by the finite element method"	289
2.	C. DIMITRIADIS and M.A. LESCHZINER "Computation of three dimensional flow in duct junctions by a zonal approach"	306
3.	J.W. CHEW "Prediction of flow in a rotating cavity with radial outflow using a mixing length turbulence model"	318
4.	J. GOUSSEBAILE, A. JACOMY, A. HAUGEL and J.P. GRÉGOIRE "A finite element algorithm for turbulent flow processing a $k-\epsilon$ model"	330

5.	C. TAYLOR, A.A. GHEISSARY and J.O. MEDWELL "A note on the replacement of universal profiles in near wall zones using the finite element method"	345
6.	P.C.W. FRITH "Turbulence modelling of swirling flows"	353
7.	H.I. ANDERSSON and C. BENOCCI "An improved pressure iteration technique for the SOLA algorithm"	364
8.	M. MALAFAYA-BAPTISTA "Energy losses in turbulent flows. An explicit alternative solution to the Colebrook- White function"	376
9.	W.D. McCOMB and V. SHANMUGASUNDRAM "Calculation of the subgrid eddy viscosity by progressive elimination of small scales"	385
10.	H. UCHIDA and H. HONMA "Finite element solutions of a two equation model of turbulent flow using a pseudo-time dependent approach"	394
11.	K. DANG "Large eddy simulation of a passive scalar in homogeneous turbulence"	406
12.	M. TSUCHIYA and T. MORIYA "A treatment of wall boundaries for the finite element analysis of turbulent flows"	418

SECTION 4 FLOW WITH SEPARATION/ CIRCULATION

1.	M.F. PEETERS, W.G. HABASHI and E.G. DUECK "Finite element solutions of the Navier-Stokes equations"	433
2.	S. TROLLHEDEN and B. SUNDÉN "A numerical investigation of laminar flow in a parallel plate channel with a large cavity"	445
3.	D.J. EVANS and A.W.B. JUSOH "Finite solution of the Navier-Stokes equations"	454

4.	L. FUCHS "Computation of viscous laminar flows in cavities"	468
5.	A.G.F.A. NASSER and M.A. LESCHZINER "Computation of transient recirculating flow using spline approximations and time space characteristics"	480
6.	V. RUAS "Finite element solution of 3-D viscous flow using non standard degrees of freedom"	492
7.	J. FREITAS, A.N. FINDIKAKIS and R.L. STREET "The physics of three dimensional cavity flow"	503
8.	F.N. VAN DE VOSSE, F.H. VIAL, A.A. VAN STEENHOVEN, A. SEGAL and J.D. JANSSEN "A finite element and experimental analysis of steady and pulsating flow over a two-dimensional step"	515
9.	E. DICK "A relaxation method for steady Navier-Stokes equations, based on flux-vector splitting"	527
10.	J.G. RICE and R.J. SCHNIPKE "An efficient finite element method for viscous fluid flows"	539
11.	F. DURST and J.C.F. PEREIRA "The calculation of some steady laminar flows using various discretisation finite difference schemes"	551
12.	J.F. BRISON, M. BUFFAT, D. JEANDEL and E. SERRES "Finite element simulation of turbulent flows, using a two equation model"	563
13.	P.L. BETTS and V. HAROUTUNIAN k- ϵ modelling of turbulent flow over a backward facing step by a finite element method. Comparison with finite volume solutions and experiment.	574

- | | | |
|-----|---|-----|
| 14. | E.E. KHALIL
"An investigation of turbulence modelling of recirculating flows" | 586 |
| 15. | C. NONINO and S. DEL GIUDICE
"An improved procedure for finite element analysis of two dimensional elliptic flows" | 597 |
| 16. | L.C. CHIEN and Y.P. WANG
"Numerical solution for separated flow around an impulsively started circular cylinder" | 609 |
| 17. | O. DAUBE, F. NIANG and T.P. LOC
"Unsteady viscous flow around a circular cylinder with suction" | 621 |
| 18. | T.P. LOC and O. DAUBE
"Unsteady viscous flow around a circular cylinder at moderate Reynolds numbers" | 631 |
| 19. | M. LINDROOS
"Numerical investigation of steady flow past a hump on a flat plate" | 643 |
| 20. | A.L. COOPER and R.A. SKOP
"The turbulent wake of a cylindrical body travelling beneath a free surface" | 659 |
| 21. | M. BRAZA, P. CHASSAING and H. HA MINH
"A numerical study of the dynamics of different scale structures in the near wake of a cylinder in laminar and turbulent transition" | 672 |
| 22. | S. HAFEZ
"Computation of the recirculating flow over and under bluff bodies" | 687 |
| 23. | K. HOURIGAN, M.C. THOMPSON, M.C. WELSH and A.N. STOKES
"Discrete-vortex model of flow over a semi-infinite plate in a fluctuating field" | 696 |
| 24. | J.Y. TRÉPANIÉ and A. LANEVILLE
"A numerical simulation of the flow around 2-D rectangular cylinders" | 708 |
| 25. | I. GRANT and F.H. BARNES
"The application of the distributed array processor (DAP) to the discrete vortex method" | 720 |

SECTION 5 CONVECTION/DIFFUSION

1. I.P. JONES 733
"The convergence of a simple iterative strategy
for strongly stratified flows"
2. D.W. PEPPER 741
"Recirculation within a glass mixture subjected
to external and resistive heating"
3. Y.Y. AZMY and J.J. DORNING 753
"Nodal integral method solutions of cavity
thermal convection problems"
4. E. KRAMEZ and D. NAOT 768
"The whole field solver algorithm and the
upwind scheme in convective flow"
5. H.A. ROODBERGEN 781
"Prediction of natural convection in an enclosed
cavity by a penalized finite element method"
6. J.A. REIZES, E. LEONARDI and G. DE VAHL DAVIS 794
"Natural convection near the density extremum
of water"
7. C.R. MALISKA and F.E. MILIOLI 805
"A non-orthogonal model for the solution of
natural convection problems in arbitrary
cavities"
8. E.K. GLAKPE, C.B. WATKINS Jr., and B. KURIEN 817
"The numerical computation of three-dimensional
natural convection in a vertical enclosure"
9. D. KALACHE, F. PENOT and P. LE QUERE 829
"Numerical investigation of the validity of
the two dimensional assumption in the
computation of natural convection within a
trapezoidal cavity"
10. P. LE QUERE and T.A. DE ROQUEFORT 841
"Transition to unsteady convection of air in
differently heated vertical cavities"

11. F. YGUEL, P. LE QUERE and J.J. VULLIERME 853
 "Natural convection of air in cavities:
 Numerical solutions at high Rayleigh numbers
 and comparison with experiments"
12. K. NOTO and R. MATSUMOTO 865
 "Three-dimensional analysis of the Navier-
 Stokes equations on laminar natural convection
 around a vertical flat plate"
13. P.L. BETTS, A.A. DAFA'ALLA and V. HAROUTUNIAN 878
 "Low Reynolds number modelling of the wall
 region for turbulent natural convection in a
 tall cavity"
14. C-K. CHEN, F-S. LIEN and J.W. CLEAVER 890
 "Mixed convection over rotating bodies with
 blowing and suction"
15. A.C.M. SOUSA and G.V. HADJISOPHOCLEOUS 901
 "Numerical studies of convective flows driven
 by discrete sources"
16. L.D. LIBERSKY and A.G. PETSCHKE 913
 "Numerical calculation of laminar and turbulent
 plumes"
17. P.A. TANGUY, M. DUPUIS, E. DERNEDDE and 923
 J.C. MÉTHOT
 "A finite element study of free and forced
 thermal convection at high Grashof numbers"
18. R.M. ISLAM and K. NANDAKUMAR 937
 "Mixed convection flow in fluid stratified
 porous media in the non-Darcy regime"
19. M. IKEUCHI 948
 "Further development of boundary elements in
 steady convective diffusion problems"
20. A.R. BESTMAN 960
 "The thermal instability of a rotating dusty
 gas heated from below"
21. A.R. BESTMAN 969
 "Hydrodynamic flow of a radiating gas past
 a horizontal rotating porous plate"
22. S. SIMITOVIC, N.C. MARKATOS and K. PERICLEOUS 979
 "On the three-dimensional modelling of air-
 borne evaporative cooling tower effluent in
 interaction with the atmosphere"

- | | | |
|-----|--|------|
| 23. | H. OKAMOTO
"Boundary element method for chemical reaction system in convective diffusion" | 991 |
| 24. | M. SAKAKIHARA and M. IKEUCHI
"Characteristics integration method for one-dimensional initial value problems of the convective diffusion equation" | 1003 |
| 25. | A.N. STOKES and M.G. BARTON
"Computing shear dispersion in parallel flow" | 1011 |

PART 11

SECTION 6 TURBULENT HEAT TRANSFER

- | | | |
|----|--|------|
| 1. | H. IACOVIDES and B.E. LAUNDER
"ASM predictions of turbulent momentum and heat transfer in coils and U-bends" | 1023 |
| 2. | B. SUNDÉN
"On some accuracy aspects in numerical solution of flow and heat transfer problems" | 1046 |
| 3. | E. SAATDJIAN, B. ROWE, R. PRUD'HOMME and F. VALLÉE
"Numerical simulation and numerical experiments of a rarified, high temperature Argon plasma inside a constant temperature cylindrical tube" | 1058 |
| 4. | A.A. EL-HADIK, M.M. MAHGOB and M.A. SHALABY
"A study of heat and fluid flow in cusped ducts in laminar case" | 1069 |
| 5. | M.H. BERGER
"Practical finite element computations of multidimensional source/sink flows in a gas centrifuge" | 1089 |
| 6. | Zs. RÉVÉSZ
"An approach to the numerical modelling of the shell side fluid flow in a steam condensor" | 1102 |
| 7. | J.A. SCHMITT
"Multidimensional flows inside a tube behind an accelerating piston" | 1115 |
| 8. | J. VLACHOPOULOS, C. TZOGANAKIS and E. HAMIELEC
"Numerical simulation of reactive polymer flows" | 1127 |
