

TABLE OF CONTENTS

1. Invited Speakers

P. Schiano and A. Matrone (CIRA) Parallel CFD Applications: Experiences on Scalable Distributed Multicomputers	3
S.V. Peigin and S.V. Timchenko (Tomsk University) The Investigation of 3D Viscous Gas Flow over Complex Geometries Using Multiprocessor Transputer Systems	13
T. Tayfun Tezduyar, S. Aliabadi, M. Behr, A. Johnson and S. Mittal (U. of Minnesota) Massively Parallel Finite Element Computation of 3D Flows - Mesh Update Strategies in Computation of Moving Boundaries and Interfaces	21
D. Mc Carthy and W.R. Jones (Boeing Seattle) Adaptive Domain Decomposition and Parallel CFD	31
M. Ashworth (NERC Computer Services) A Review of the Exploitation of Parallel Processing in Environmental Modelling	41
T. Iwamiya, M. Fukuda, T. Nakamura and M. Yoshida (NAL Chofu) On the Numerical Wind Tunnel (NWT) Program	51
R. Rannacher (U. of Heidelberg) Parallel Solution Methods for the Navier-Stokes Equations	61

2. Networked Computers

F.K. Hebeker On Parallel Simulation of Reactive Flows on an IBM RS/60000 Workstation-Cluster	73
D. Hafermann and M. Kuntz Parallelization of a Direct Simulation Monte-Carlo Code for a Workstation Cluster	81

C. de Nicola, L. Paparone, V. Puoti and R. Tognaccini A Strategy for Load Balancing Problems in Advanced CFD Multiblock Solvers on Distributed Memory Machines	89
--	----

J. Grawe and S. Wagner Parallel Computation of 2D Jet/Airflow Interaction	97
--	----

3. Comparison of Systems

D. Drikakis and F. Durst Computation of Aerodynamic Flows Using Improved Parallelization Procedures	109
---	-----

R. Rankin, J.P. DeVilliers and J.C. Samson Parallel Magnetohydrodynamics on Myrias MIMD Computers	117
--	-----

U. Gärtel, W. Joppich and A. Schüller Parallelizing the 2D Model of the Integrated Forecasting System	125
--	-----

T. Michl, S. Wagner, M. Lenke and A. Bode A DataParallel Implicit Navier-Stokes Solver on Different Multiprocessors	133
---	-----

4. Applications on Transputers

D. Golby and M.A. Leschziner Parallel Computations of Turbulent Transonic Flows on a MEIKO Computing Surface	143
--	-----

N. Hardy, M.J. Downie and P. Bettess Calculation of Fluid Loading on Offshore Structures using Parallel Distributed Memory MIMD Computers	151
---	-----

5. Data Parallel Programming Model

L. Dagum and J.D. McDonald Comparison of Direct Particle Simulation on the MasPar MP-2 and the Connection Machine CM-2	163
--	-----

J. Argyris and G. Pätzold Parallel Lattice-Boltzmann Simulation of 3-D Convective Flow	173
---	-----

M.L. Sawley, J.K. Tegnér and C.M. Bergman A Serial Data-Parallel Multi-Block Method for Compressible Flow Calculations	181
---	-----

6. Tools and Mapping Strategies I

Ch. Walshaw and M. Berzins Adaptive Time-Dependent CFD on Distributed Unstructured Meshes	191
--	-----

F. Dellagiacomma, M. Vitaletti, A. Jameson, L. Martinelli, S. Sibilla and L. Visintini FLO67P: A Multi-Block Version of FLO67 Running within PARAGRID	199
---	-----

B.W. Jones, K. McManus, M. Cross, M.G. Everett, and S. Johnson Parallel Unstructured Mesh CFD Codes: A Role for Recursive Clustering Techniques in Mesh Decomposition	207
--	-----

7. Tools and Mapping Strategies II

S. Narayanan SPAFS - Software for Parallelizing Flow Solvers	217
---	-----

Y.F. Hu, R.J. Blake, J. Peiro, J. Peraire and K. Morgan Partitioning and Scheduling Algorithms and Their Implementation in FELISA - An Unstructured Grid Solver	225
--	-----

D. Vanderstraeten, R. Keunings and Ch. Farhat Optimization of Mesh Partitions and Impact on Parallel CFD	233
---	-----

8. Tools and Mapping Strategies III

K. Lust, J. De Keyser and D. Roose A Parallel Block-Structured Euler/Navier-Stokes Code with Adaptive Refinement and Run-Time Load Balancing on the iPSC-860 Hypercube	243
---	-----

C.S. Ierotheou, M. Cross, S. Johnson and P. Legget CAPTools - An Interactive Toolkit for Mapping CFD Codes onto Parallel Architectures	251
--	-----

M. Carcenac Arborescent Data Structures and Lazy Evaluation: A New Approach to Numerical Problems	261
---	-----

9. Industry Experience I

F. Choukroun, F.X. Roux, Ch. Borel and M. Brédif Implementation of an Industrial CFD Code on a Massively Parallel Computer with Distributed Memory	271
--	-----

E.A. Gerteisen and A. Jameson Massive Parallel Implementation of the Aircraft Euler Method and Performance Tests on Different Computational Platforms	277
---	-----

10. Industry Experience II

G. Alleon and E. Duceau Simulation of Electromagnetic Wave Interactions on Large MIMD Supercomputers	289
--	-----

J.C.T. Wang and S. Taylor A Concurrent Navier-Stokes Solver for Implicit Multibody Calculations	295
--	-----

C.B. Jenssen A Parallel Block-Jacobi Euler and Navier-Stokes Solver	307
--	-----

11. Domain Decomposition Methods I

R. Glowinski, Tsorng-Whay Pan and J. Periaux A One Shot Domain Decomposition/Fictitious Domain Method for the Solution of Elliptic Equations	317
--	-----

F. Stella, M. Marrone and E. Bucchignani A Parallel Preconditioned CG Type Method for Incompressible Navier-Stokes Equations	325
M.S. Tsai Parallel Implicit Navier-Stokes Solver on the Intel Paragon™ Supercomputer	333
Y.P. Chien, F. Carpenter, A. Ecer and H.U. Akay Load Balancing for Parallel Computation of Fluid Dynamics Problems	341
D. Tromeur-Dervout and F.-X. Roux Parallelization via Domain Decomposition Techniques of Multigrid and ADI Solvers for Navier-Stokes Equations	349
 12. Domain Decomposition Methods II	
F. Nataf and F. Rogier A Schur Type Method Based on Outflow Boundary Condition	359
F. Desprez and M. Garbey Parallel Computation of a Combustion Problem	363
L. Hemmingsson A Domain Decomposition Method for Hyperbolic Problems in 2D	373
N. Bouhamou, Q.V. Dinh and J. Periaux Basic Linear Parallel Solvers for Large CFD Applications Using Decomposed Unstructured Meshes	381
 13. Subspace Iterative Algorithms	
W.D. Gropp, D.E. Keyes and M.D. Tidriri Parallel Implicit Solvers for Steady, Compressible Aerodynamics	391
M.D. Kremenetsky, J. Richardson and H.D. Simon Parallel Preconditioning for CFD Problems on the CM-5	401

R. Aggarwal, F.-X. Roux and R. Keunings Iterative Methods for the Solution of Integral Viscoelastic Equations on Parallel Computers	411
---	-----

14. FEM and Irregular Meshes

R. Choquet and P. Leyland Viscous Flow Computations on the Connection Machine by a Finite Element Petrov-Galerkin Scheme	421
--	-----

L. Bomholt and P. Leyland Implementation of Unstructured Finite Element Codes on Different Parallel Computers	429
---	-----

R. Ramamurti and R. Löhner Simulation of Complex Incompressible Flows Using a Finite Element Solver on MIMD Machine	443
---	-----

Z. Johan, K.K. Mathur, S.L. Johnsson and T.J.R. Hugues Parallel Implementation of Recursive Spectral Bisection on the Connection Machine CM-5 System	451
--	-----

15. Reacting or Turbulent Flow

F. Pit and F. Rogier Computation on a Massively Parallel Machine of Turbulent Reactive Flows Using an Eulerian-Lagrangian Probabilistic Approach	463
--	-----

X.J. Gu, D. Bradley, P.H. Gaskell, D.R. Emerson, J.G. Carter, R.J. Blake and R.J. Allan Parallel Computation of Turbulent Recirculating Combustion Processes and Chemically Reacting Industrial Flows	469
--	-----

J.K. Lee and Y.-Y. Chen, C.A. Lin and C.M. Lu Modelling Three-Dimensional Gas-Turbine-Combustor-Model Flows on a Parallel Machine with Distributed Memory	477
---	-----

16. From Explicit to Implicit Algorithms on MIMD Systems

M. Lorient and L. Fezoui
A Parallel Compressible 3D Navier-Stokes Solver Using Unstructured Meshes 487

D.P. Jones and S.P. Fiddes
Parallel Solution of the Incompressible Two Dimensional Navier-Stokes Equations Using a Spectral Galerkin Formulation 497

P. Charrier, J. Roman and P. Vezolle
Implementation of a Symmetric Boundary Element Method on Distributed Memory Computers for 3D Maxwell Equations 505

17. Euler and Navier-Stokes Solvers

L. Le Toullec and Ph. Guillemin
Parallelization of a 3-D CFD Code 515

N. Satofuka, M. Obata and T. Suzuki
Parallel Computation of 2-D Potential and Euler Equations on Transputer Arrays 525

C.M. Mobarry, U.A. Ranawake and J.R. Thorp
Steps Toward a Machine Independent Parallelization of the Sanders and Weiser Algorithm 533

18. Adaptive Methods

Y. Kallinderis and A. Vidwans
A Generic Adaptive-Grid Navier-Stokes Algorithm 545

Z. Weinberg and L.N. Long
An Adaptive, Unstructured Solver for the Three Dimensional Viscous Flows on Massively Parallel Machines 553
