CONTENTS

Preface iii

I. Modelling in Turbulent Flows and Heat Transfer

Recent Developments in Turbulence Modelling
W. Rodi 3

Modelling Turbulent Recirculating Flows by Finite-Volume Methods —Current Status and Future Directions
M. A. Leschzer 19

Some Contributions to the Algebraic Stress Turbulence Model for the Application of Stratified Flows
I. Uno and H. Ueda 41

Numerical Calculation of Turbulent Flows in Compound Channels with an Algebraic Stress Turbulence Model
Y. Kawahara and N. Tamai 51

Analysis of Transverse Distributions of $\overline{c'^2}$ in Open Channel Flows by Means of $\overline{c'^2}$ - ε Equations
Y. Iwasa, T. Hosoda and K. Matsui 59

Incompressible Flow Calculations with a Full Reynolds-Stress and Turbulent Fluxes Transport Model
M. Kanniche, F. Baron and P.L. Viollet 69

Structural Refinements to Reynolds Stress Closures for Plane, Manipulated and Wake/Boundary Layer Flows
A.M. Savill 77

The Effect of Modifying the Mixing Length Distribution on Prediction of 3-D Turbulent Boundary Layer Behavior
T.D. Hsing, W.H. Guo and L. Wang 87

Numerical Simulation of 2-D and 3-D Channel Flows Using a 3rd-Ordered Accurate Generalized QUICK Scheme
Y. Takemoto and Y. Nakamura 97

Calculations of Thermal Stratification Phenomena in a Cylindrical Vessel
S. Ushijima and S. Moriya 105

Large Eddy Simulation of Turbulent Channel Flow Using Boundary Layer Splitting Model
I. Harada 113

Numerical Simulation of Cumulus Convection and Its Scheme Stability
Y. Horibata 119

A Combined Computational and Experimental Study of a Separated Flow in an Expanding Annular Passage
M.A. Leschziner, M. Kadja and C.J. Lea 129

Unsteady Two-Dimensional Flow about a Rotating Plate
A. Lejeune 139

Vortex Method Simulation for the Flow near a Boundary
Y.W. Dai 147

Modeling of Turbulent Flow Generated by a Circular Cylinder
C.C.S. Song, M. Yuan and S. Gavali 153

Occurrence of the Karman Vortex Due to Cooling of Cylinder; Numerical Simulation
K. Noto and M. Honda 161

Finite Analytic Numerical Solution of Turbulent Flow Past Axisymmetric Bodies
S.K. Cho and C.J. Chen 171

Numerical Simulation of Flow Around Rectangular Cylinders (by a finite difference method and a discrete vortex method)
A. Okajima 179

II. Progress in Numerical Techniques

Finite Analytic Numerical Method and Its Application to Flow Modelling
C.J. Chen, C.H. Yu and K.B. Chandran 191

Finite Element Method for Hyperbolic Equations in Two Independent Variables
X.Q. Xu, Z.X. Gao and Y.C. Chen 201

A Hodograph-Based Finite Element Method for Plane Transonic Cascade Design
Z. Yao 207

Flow Characteristics in a Port-Cylinder Assembly Predicted by a Finite Element Method with Turbulence Modelling
G. Brun, M. Buffat and D. Jeande 215

Two Multimode Schemes for Flow Simulation by the Method of Characteristics
C. Lai 223

Development of an Accurate Numerical Scheme for Scalar Advective Transport
T. Komatsu, K. Ohgushi, K. Asai and N. Nakashiki 233

The Three Dimensional Computation of Secondary Flow and Density Currents in a Curved Pipe
M. Gabillard and P.L. Viollet. 241

Numerical Calculations of Turbulent Open Channel Backward Facing Step Flows
I. Nezu, B. Papritz-Wagner and G. Scheuerer 249

The Seaflos Numerical Codes: High Speed N-S Solvers
C.-Y. Perng and R.L. Street 259

Turbulent Heat Transfer in an Internally Heated Fluid Layer
G. Grötzbach 267

The Numerical Modeling of Unsteady Incompressible Viscous Flows with Forced Vortices near Solid Walls
G. de Felice, B.A. Kolovandin and C. Meola 277

A Numerical Solution Technique for Incompressible Flow
J.P. Holland 287

Ability of a Conventional 2-D Shallow Water Code in Modelling Coherent Structures within a Mixing Layer
J.M. Usseglio-Polatera and M. Lesieur 295

Computation of the Threedimensional Nominal Wake of a Shiplike Body
J. Piquet and M. Visonneau 303

Momentum Transport in a Turbulent Mixing Layer
J.N. Chung 313

III. Dispersion, Stratified Flow in Atmospheric and Water Environments

An Analytical Study of Turbulence in a Stably Stratified Shear Flow
M. Ohtsuka and M. Yamakawa 323

Wind Induced Turbulence in a Thermally Stratified Channel Flow
B. Caussade, L. Masbernat, J. Phordoy and A. Souyri 331

Nonlocal Diffusion Model in Turbulent Boundary Layer
A. Nakayama, H.D. Nguyen and M.B. Daif 341

Numerical Experiment on the Oceanic General Circulation in the North Pacific Ocean
T. Takahata and K. Taguchi. 351

Visualization of Interaction between Oceanic Current and River Effluent
S. Onishi 359

A Numerical Model of the Turbulent Mixing Process in the Estuary
K. Taguchi and T. Terasawa 367

Application of Kalman Filter and Finite Element to Hydrothermal Modeling
D.L. Young and K.S. Cheng 377

Rise of Buoyant Jet in Stably Stratified Environment
T. Yamada and S. Ito 387

Numerical Simulation of Turbulent Structure Produced by Combined Action of Mechanical and Thermal Stirring Using a Turbulence Closure Model
A. Murota and K. Michioku 395

Markov-Chain Simulation of Turbulent Diffusion in the Wind Tunnel under Neutral and Unstable Conditions
K. Sada and Y. Ichikawa 403

On the Modelling of the Effects of Large Temperature Difference on the Development of a Turbulent Wake
T.F. Tureaud, A.A. Szewczyk, K.T. Yang and V.W. Nee 413

IV. Flows in Urban and Architectural Environments

Tridimensional Numerical Modelling of Air Flow and Heat Exchange in a Transformer Substation
Y. Caytan and R. Tan 423

Field Observation and Numerical Simulation of an Urban Wind
J. Tsutsumi, T. Katayama, A. Ishii and M. Nishida 433

V. Thermal Hydraulics in a Nuclear Reactor

Recent Topics Concerning Thermal Flow Models
M. Akiyama 443

On the Development and Use of Refined Three-Dimensional Numerical Modelling for Nuclear Reactor Thermal-Hydraulic Analysis
P.L. Viollet 451

A Numerical Technique for the Prediction of the Fine Structure of Flow and Temperature Fields in Wire-Wrapped Fuel Pin Bundle Geometries —Development and Testing of the SPIRAL Code
T. Shimizu, H. Ninokata and H. Shishido 463

Thermal-Hydraulic Phenomena and Practical Modelling of Spent Fuel Cooling in LMFBR
M. Akamatsu, Y. Doi, K. Takitani, M. Hirokawa, K. Yoshida, T. Fukada
T. Akimoto and N. Tanaka 471

Thermal-Hydraulic Analysis of the Local Turbulent Sodium Cross Flow in a Tube Bundle Applied to a L.M.F.B.R. Helically Coiled Tube Steam Generator
V. Czop, R. Lahrech and M. Robert 479

Computation of Flows with Distributed Resistance and Heat Sources
D. Grand, N. Coulon, J.P. Magnaud and M. Villand 487

Overview of the ANL Advanced LMR System Thermal-Hydraulic Test Program Supporting Both GE/PRISM and RI/SAFR
J.J. Oras, T.M. Kuzay and K.E. Kasza 495

Pressure Variations in the Low Frequency Pulsating Flow in the Circulating Pipe Line with Pressure Vessels
E. Katô 507

Similarity Rules of Thermal Stratification Phenomena for Water and Sodium
Y. Shibata, T. Ikeda, M. Ohtsuka, M. Yamakawa, S. Moriya
S. Ushijima and K. Fujimoto 515

Fine Thermohydraulics Calculations in the Design of Nuclear Breeder Reactor Cores Assessment at the End of the Super-Phenix 1 Startup
J.R. Pages 523

VI. Mixing by Buoyant Jets

Numerical Simulation of Turbulent Buoyant Recirculating Flow in an Intake-Under-Outlet System
H.Q. Ni, N.J. Wang and L.X. Zhou 533

A Three-Dimensional Computer Simulation Model of River Plume
A. Murota, K. Nakatsuji and J.Y. Huh 539

A New Depth-Averaged Two-Equation ($\tilde{k}$-$\tilde{w}$) Turbulent Closure Model
L.R. Yu and S.N. Zhang 549

Numerical Simulation of Vertical Forced Plume in Stratified Cross Flow
M. Mizutori, N. Katano and N. Nakashiki 557

Development of Predictive Method for Thermal Diffusion in the Sea near the Cooling Water Outlet
A. Wada and H. Araki 567

VII. Flows in Rivers and Open Channes

Coherent Structures in the Flow in Rivers and Open Channels
N. Tamai 577

Two Dimensional Analytical Solution for a Compound Channel
K. Shiono and D. W. Knight 591

Turbulent Structure in Compound Channel Flows with Rectangular and Trapezoidal Main Channel
A. Tominaga, K. Ezaki and I. Nezu 601

Prediction of Depth-Averaged Flow Characteristics in Compound Channels
R.J. Keller, B.J.C. Perera and W. Rodi 611

Distributions of Streamwise Velocity and Boundary Shear Stress in Compound Ducts
C.J. Lai and D.W. Knight 619

Numerical Simulation of Flow in Compound Channels
R. Larsson 633

Mean and Turbulence Structure near the Inclined Side-wall in an Open Channel Flow
H. Imamoto and T. Ishigaki 641

Numerical Simulation of High Turbulent Free Surface Flow under the Curvilinear Coordinates
W.X. Xu and Z.Q. Jin 649

Combined Digital Image and Finite Element Analysis of Mixing in Compound Open Channel Flow
U. Arnold, J. Höttges and G. Rouvé 657

Analysis of Non-Uniform Flow with Suspended Sediment by Using k-ε Turbulence Model
Y. Fukushima 665

Analysis and Application of Numerical Routing Model for Sewer Network
C.L. Liu and R. Hsu 675

The Coherent Patterns of the Fluctuating Pressure and their Computing
Z.C. Liang 683

Visualization of the Flow at a Confluence
I. Fujita and S. Komura 691

A Refined Model for Hydraulic Jumps
M. Jin and Z.Z. Guo 699

Interaction between Flow over Rough Permeable Bed and Flow in Porous Medium Composed of Bed Materials
H. Nakagawa, T. Tsujimoto, Y. Shimizu and S. Murakami 707

VIII. Migration of Ground Water in Soils and Rocks

Stochastic Analysis on Groundwater Flow and Radionuclide Migration in Saturated-Unsaturated Soils
M. Kawanishi and Y. Inoue 717

Numerical Analysis of Radioactive Nuclide Migration and Heat Transfer around High Level Waste Disposal Cavern by Deformable and Fractured Rock Model
K. Sato, Y. Ito and T. Shimizu 727

Three Dimensional Flow in Fractured Rock Mass —Analysis Method with Discrete Fracture Approach
A. Kobayashi 737

IX. Deformation of Waves

The Characteristics of Wave Grouping in Rough Sea
C.C. Kao and G.C. Sheu 749

Numerical Computaion of Wave Deformation and Nearshore Current with Wave-Current Interaction
S. Ohnaka, A. Watanabe and M. Isobe 757

Evaluation Model on the Exchange of Seawater in the Closed Inner Bay
T. Sugimoto, T. Hattori, T. Takahashi, K. Adachi and M. Ohishi 765

Effect of Repeated Reflection on Wind Generated Waves
R.M. Kansoh 771

X. Flow Visualization Techniques

Visualization of Turbulent Flowfield Generated by Numerical Simulation
S. Murakami 781

A Laser/Fluorescent-Dye Flow Visualization Technique Developed for Thermal Hydraulic Studies of System Components
J.J. Oras and K.E. Kasza 793

Infrared Sensing of Buoyant Surface Plumes
O. Petersen and T. Larsen 801

XI. Turbulent Flow Measurements

Trends in Turbulence Measurements
W.Z. Sadeh 811

Some Contributions to the Utility Development of LDV
M. Hino 833

Turbulent Characteristics of Thermal Stratification in a Sodium Flow
Y. Iritani, K. Nakamura, S. Ueda, T. Kiyokawa
S. Ushijima and S. Moriya 847

Waves Observed in Stable Atmospheric Boundary Layer
T. Mizuno 855

Measurement of Turbulence Fluxes in a Steady, Stratified, Mixing Layer
R.E. Uittenbogaard 863

Turbulent Thermal Plume from a Horizontal Line Heat Source (Spectrum and Several Factors of Swaying Motion)
K. Noto and T. Horii 873

Measurements in Turbulent Plane Jet and Plume
A. Murota, K. Nakatsuji and M. Tamai 881

Visualization and Measurement of Particle Dispersion in a Turbulent Plane Mixing Layer
F. Wen, N. Kamalu, C.T. Crowe, T.R. Troutt and J.N. Chung 891

An Ultrasonic Turbulence Measuring Method and Instrument
R.J. He, S.J. Wang and J.Q. Yuan 901

Measurement of Concentration Using Digital Image Analysis
R.E. Uittenbogaard and B.C. Van der Waals 909

Oceanic Boundry Layer Measurements under Landfast Ice
K. Shirasawa and R.G. Ingram 919

Turbulent Structure and Control of Coherent Vortex in Mixing Layer of Open-Channel Parallel Coflows
I. Nezu, H. Nakagawa and T. Matsumoto 927

Measurement of Turbulence of River Flows with Ultrasonic Flowmeter
T. Kanda and M. Sera 937

A Method of Measuring Secondary Currents Using a Propeller
A.W. Jayawardena and W.S. Chiang 947

XII. Unsteady Flow in Pipe

A Numerical Method for Rapidly Varying Pressurized Flow in Storm Sewers
S. Kawaguchi, H. Yasukawa and M. Ui 959

On the Characteristics of the Unsteady Flow Generated by a Sudden Removal of a Vertical Barrier Separating Full/Partly-Full Flow Region in a Horizontal Circular Conduit
S. Kawaguchi, H. Yasukawa and M. Ui 967

Turbulent Pressure Fluctuations and Cavitation at a Sudden Enlargement
J.H. Loveless and A. Mansoori 975

List of Participants 985
