

## Contents of Volume I

Preface .....	v
Symposium Committees .....	vii
List of Reviewers .....	viii
Symposium Sponsors, Contributors .....	viii

### I. KINETIC THEORY, NON-EQUILIBRIUM STATISTICAL MECHANICS

The Generalized Boltzmann Equation and Some of Its Applications K. BÄRWINKEL .....	3
Nonlinear Evolution Problems in Gas Kinetic Theory V. C. BOFFI and G. SPIGA .....	11
Closure in Nonlinear Convolution of the BBGKY Fluctuation Equation S. TSUGÉ, K. SAGARA, and S. KADOWAKI .....	19
Theory of Heat Flux Inhibition in Gases: A Self-Consistent Method Approach B. C. EU .....	27
Frequency Moments and Transport Coefficients of Noble Gases S. RANGANATHAN and K. N. PATHAK .....	35
Local Entropy Productivity of the Mott-Smith Solution I. HOSOKAWA and S. INAGE .....	43
Effects of Distribution Function Nonequilibrium Tails on Relaxation and Transfer Processes in Rarefied Gases Yu. N. GRIGORYEV, A. N. MIKHALITSYN, and N. N. YANENKO .....	51
The First Law of Thermodynamics in Thermophoresis N. FUKUTA .....	61

### II. ANALYSES OF RAREFIED GAS FLOW

Analytical Studies of Rarefied Gas Dynamics Y. SONE .....	71
Variational Approach to Rarefied Gas Flows in an External Force Field with an Application to the Gas Centrifuge C. CERCIGNANI and M. LAMPIS .....	89
Forces Acting on Two Arbitrary Width Parallel Plates with Different Tempera- tures in a Highly Rarefied Gas S. TANAKA .....	99
The Numerical Evaluation of the Velocity Perturbation at the Wall for the Rayleigh Problem with Specular and Diffuse Reflection B. GANAPOL .....	107

Force, Its Moment, and Energy Transfer on a Closed Body in a Slightly Rarefied Gas Y. SONE .....	117
Oscillating Radiative Heat Transfer in a Gray Medium S. KUBO .....	127

### III. NUMERICAL ANALYSES AND MONTE CARLO SIMULATION

Kinetic Model Equations and Numerical Results E. M. SHAKHOV .....	137
A Computational Method and Its Application to Analyses of Rarefied Gas Flows K. MORINISHI and H. OGUCHI .....	149
Numerical Analysis of Rarefied Cylindrical Couette Flows H. MAKIHARA and T. ITO .....	159
Discrete Ordinate Method in Kinetic Theory B. SHIZGAL and R. BLACKMORE .....	167
Shock Wave Structure in Gas Mixtures G. A. BIRD .....	175
Analysis of the Internal Structure of Shock Waves by Means of the Exact Direct-Simulation Method K. NANBU and Y. WATANABE .....	183
A Verification of the Monte Carlo Direct Simulation by Using the Fluctuation Dissipation Theorem T. ABE .....	191
Evaluation of Self-Diffusion Coefficients by Use of the Direct-Simulation Method K. NANBU .....	199
Particle-in-Cell Statistical Method and Application to Problems of Gas Kinetics S. P. RADEV, V. E. YANITSKII, and S. K. STEFANOV .....	207

### IV. EXTERNAL FLOWS, VEHICLE AERODYNAMICS

Plume Impingement Upon Spacecraft Surfaces J.-C. LENGEND .....	217
Blunt Cones in Rarefied Hypersonic Flow; Experiments and Monte-Carlo Simulations G. A. DAHLEN, M. N. MACROSSAN, C. L. BRUNDIN, and J. K. HARVEY .....	229
A Comparative Study of Stagnation-Point Hypersonic Viscous Shock-Layer and Hypersonic Merged-Layer Flows A. C. JAIN and S. PRABHA .....	241
Investigation of the Knudsen Layer in the Trailing Edge Region of a Flat Plate L. GOTTESDIENER .....	249
An Experimental Study of the Flow Past a Flat Plate at Incidence in Supersonic Low Density Stream S. L. GAI .....	257

Some Calculative Formulae of Rarefied Aerodynamic Characteristics on Simple Bodies	
X. YANRU and H. WEI .....	265
Recovery Temperature Determination in Free Molecular Flow of a Polyatomic Gas	
H. LEGGE .....	271
Experimental Analysis of Plume Flow from Small Thrusters	
H. LEGGE, C. DANKERT, and G. DETTLEFF .....	279
Forces Induced by a Simulated Rocket Exhaust Plume Impinging upon a Flat Plate	
J. ALLEGRE, M. RAFFIN, and J.-C. LENGRAUD .....	287
Inference of Free Stream Properties from Shuttle Upper Atmosphere Mass Spectrometer (SUMS) Experiment	
G. K. BIENKOWSKI .....	295
The Influence of the Differential Scattering Cross Section's Shape in Predictions of the Interaction between Spacecraft Effluents and the Atmosphere	
Y. Y. LIN WANG and E. P. MUNTZ .....	303
A Comparative Study of Atmospheric Density Models and Air Drag Effects on the Motion of an Artificial Satellite	
M. MIYASHITA .....	315
Analysis of Spacecraft Self-Contamination in a Test Chamber	
T. MATSUSHITA and S. YOSHIKAWA .....	323

## V. GAS-SURFACE INTERACTIONS AND NEAR-WALL PHENOMENA

Non-Spherical Molecule-Surface Interaction and Transport Phenomena in the Knudsen Regime	
L. J. F. HERMANS .....	333
Helium Scattering from CO Adsorbed on Au(111)	
G. S. ELLIOTT and D. R. MILLER .....	349
Gas Solid Surface Interaction in Slightly Rarefied Turbulent Flow with Pressure Gradient	
B. GAMPERT .....	359
Particle Coagulation and Wall Deposition Mixed Process for Laminar Flows	
J. LAMBARD and A. ROSENGARD .....	367
Scattering of Rare Gases from Contaminated Metal Plane	
A. ONJI .....	375

## VI. EXPERIMENTAL TECHNIQUES, DIAGNOSTICS

Measurement and Analysis of Anisotropic Conditions in a Vacuum Chamber by a Uni-Directional Pressure Gauge	
Y. TUZI, M. KOBAYASHI, and I. ARAKAWA .....	385

Quartz Friction Vacuum Gauge and the Coefficients of Viscosity of Gases K. KOKUBUN, M. HIRATA, M. ONO, H. MURAKAMI, and Y. TODA .....	397
Measurements of the Impact Probe Rarefaction Effect in High Mach Number $\gamma=7/5$ CO <sub>2</sub> Flows S. S. FISHER, D. J. YURKANIN, G. A. GRAYBEAL, and J. E. SCOTT, Jr. ....	405
The Free Molecular Pressure Probe with Finite Length Slot Orifice G. KOPPENWALLNER .....	415
Electron Beam Fluorescence Technique at Relatively High Density J.-C. LENGRE, J. ALLÈGRE, and M. RAFFIN .....	423
Precise Velocity, Electron Temperature and Density Measurements with a Pulsed Langmuir Probe in a Rarefied Ionized Gas Flow G. POISSANT and M. DUDECK .....	431
Temperature Measurement in SF <sub>6</sub> -Flows H. P. RICHARZ and A. E. BEYLICH .....	439
Visualization of Rarefied Gas Flows by a Laser Induced Fluorescence Method K. TESHIMA and H. NAKATSUJI .....	447

## VII. FREE JETS, SHOCK WAVES

Expansion of Gas Mixtures in Free Jets A. E. BEYLICH and H. P. RICHARZ .....	457
A Study on the Structure of Free-Jets of Mixture by Laser-Induced Fluorescence T. FUJIMOTO, S. KATO, M. USAMI, T. NIIMI, and S. KAMIYA .....	467
Experimental Study of the Interaction between Two Rarefied Free Jets C. DANKERT and G. KOPPENWALLNER .....	477
Experimental Study of Interaction of Underexpanded Free Jets T. SOGA, M. TAKANISHI, and M. YASUHARA .....	485
The Structure of the First Part of a Free Jet Studied by Means of Laser Induced Fluorescence W. OVERLAET, P. WILLEMS, and H. HULSMAN .....	493
Density Measurements in Freejets by Laser Interferometry H. KOBAYASHI, T. NAKAGAWA, and M. NISHIDA .....	501
Numerical Computation of Free Jet Expansion into Low Pressure Atmosphere Y. YOSHIZAWA, Y. KOBAYASHI, and H. UCHIDA .....	509
Plane Flow through an Orifice A. E. BEYLICH .....	517
Free-Jet Expansion near Sonic Orifice Exit H. MIKAMI .....	525
Nonstationary Structures of Weak Shock Waves in Carbon Dioxide with Vibrational Excitation H. HONMA, H. TOMIOKA, and K. INOMATA .....	533
Experimental Study of the Flow Induced by a CO <sub>2</sub> Laser on Solid Target in Rarefied Atmosphere D. DUFRESNE, F. PUECH, P. GIOVANNESCHI, J. P. CARESSA, and M. AUTRIC ...	541
