Symposium Sponsors, Contributors	vi

VIII. TRANSPORT/RELAXATION PHENOMENA, MOLECULAR BEAMS

Internal State Populations in Supersonic Free Jets and Molecular Beams R. CAMPARGUE, M. A. GAVEAU, and A. LEBÉHOT	551
Terminal Distributions of Rotational Energy in Free Jets of CO and CO ₂ S. B. RYALI, S. P. VENKATESHAN, and J. B. FENN	567
Relaxation of Vibrational and Rotational Energy of Na ₂ Seeded in a Noble Gas Expansion P. WILLEMS and H. HULSMAN	577
Study of Collisional Excitation Transfer in a Free Jet Expansion P. WILLEMS, A. BALIEU, and H. HULSMAN	585
Generalized Transport Terms in Vibrationally Relaxing Flows R. BRUN, M. P. VILLA, and J. G. MEOLANS	593
Rotational Relaxation of N ₂ in Ar Free Jet K. KOURA and S. TSUDA	601
Nonequilibrium Freejets of Rotationally Relaxing Diatomic Gases M. NISHIDA and H. KOBAYASHI	609
Molecular Beam Mass Analysis of Transient Combustion Events F. C. HURLBUT, A. K. OPPENHEIM, D. LUCAS, and R. PETERSON	617
Molecular Beam Technique for Recording Chemical Species behind Incident Shock Waves St. ARNDT and A. FROHN	627
Arc-heated Atomic Nitrogen Beam Source for Crossed Molecular Beam Experiments K. TABAYASHI, S. OHSHIMA, and K. SHOBATAKE	635

IX. SPECIES/ISOTOPE SEPARATION

Effective Separation of Disparate Mass Mixtures in a Single Stage by Double Deflection Separation Nozzles P. BLEY, W. EHRFELD, and D. SCHMIDT	645
Flow in a Laval Nozzle with Gas Mixtures of Disparate Molecular Masses N. K. MITRA and M. FIEBIG	655
Nonequilibrium in Separation Nozzles and Its Effect on Isotope Enrichment M. FIEBIG, W. SCHWAN, and N. K. MITRA	665

A Study of Separative Performance of the Jet Membrane with Upflow S.-S. QIAN and E. P. MUNTZ	677
Dynamics of Molecule Capture on the Gas Flow Free Boundary B. L. PAKLIN and A. K. REBROV	687
Heavy Particle Separation in Nozzle Flow. A Numerical Analysis N. BELLOMO, L. M. de SOCIO, and G. GAFFURI	695
Numerical Analysis of a Freejet Expansion of a Binary Gas Mixture N. TAKAHASHI and K. TESHIMA	703
Rarefaction Effect on Flow Behavior of Gas-Particle Mixtures R. ISHII	711

X. CLUSTER FORMATION

Cluster Formation in Free Jets: Results of Theory and Experiment O. F. HAGENA	721
Dimer Formation in HF at Low Densities — between Knudsen and Kantrowitz J. P. TOENNIES, M. MANN, K. MÜLLER, E. L. KNUTH, and J. B. FENN	733
Off Axis Properties of Free-Jets from Different Subsonic Flows H. R. MURPHY and D. R. MILLER	743
Velocity Distribution and Velocity Slip in Supersonic Rare Gas Beams. Atoms from Binary and Clusters from Pure Sources K. TANAKA, T. KATO, I. KOYANO, N. TAKAHASHI, T. MORIYA, and K. TESHIMA	751
Rayleigh Diffusion Measurements and Calculations for SF ₆ Condensation in a Supersonic Nozzle Expansion A. FROGER and A. ROSENGARD	759
Formation of Water Cluster in a Free Molecular Jet T. INOUE, S. KOTAKE, M. YAMASHITA, and T. SANO	767
Formation of Binary Clusters in Ar/CO ₂ and Ar/N ₂ Systems Y. OZAKI, K. MURANO, K. IZUMI, and T. FUKUYAMA	775
Kinetic Analysis of Dimer Formation of Rare Gases M. YAMASHITA, T. SANO, and S. KOTAKE	783

XI. CLUSTERS, AEROSOLS

Pulsed Molecular Beam Experiments W. R. GENTRY	793
Molecular Dynamics Simulation Study of Aggregation Phenomena in Super- cooled Water P. MAUSBACH, J. SCHNITKER, A. GEIGER, and H. E. STANLEY	809
Molecular Dynamics Simulation of Depolarized Light Scattering by Small Clusters M. G. GRAY and W. C. SCHIEVE	817

Laser Spectroscopic Studies of van der Waals Complexes of Aniline Formed in Supersonic Jets of Rare Gases K. YAMANOUCHI, H. WATANABE, S. KODA, S. TSUCHIYA, and K. KUCHITSU ..	825
Collisional Ionization of van der Waals Clusters of CS ₂ and CH ₃ CN by Long-Lived Excited Rare Gas Atoms T. KONDOW, K. MITSUKE, and K. KUCHITSU	833
Production of Metal Atom Clusters and Characterization by Mass Spectrometry Y. SAITO, T. NODA, and K. MIHAMA	839
Mass and Momentum Loss of Hypervelocity Hydrogen Cluster-Ions in Hydrogen Gas H. O. MOSER and B. KREVEZ	847
Ion Pumping and Free Jet Expansion C. M. WHITEHOUSE, M. YAMASHITA, C. K. MENG, and J. B. FENN	857
Accurate Measurements of Thermal and Diffusion Forces on a Spherical Particle T. KANKI and S. IUCHI	865

XII. CONDENSATION/EVAPORATION FLOWS

A Two-Surface Problem of Evaporation and Condensation in a Vapor-Gas Mixture Y. ONISHI	875
Kinetic Theory of Unsteady Evaporation or Condensation Caused by Sudden Change of Wall Temperature K. AOKI	885
Kinetic Theory of Condensation on and Evaporation from a Droplet K. YAMAMOTO and T. NISHITANI	893
Flow Break-Down in Condensation Knudsen Layers T. YTREHUS and T. AUKRUST	901
Kinetic Approach to Supersonic Condensation Processes and Bifurcation Phenomena M. HATAKEYAMA	909

XIII. CONDENSATION/EVAPORATION PROCESSES

The Injection of Liquids into High Vacuum for R.G.D. and Space Applications E. P. MUNTZ, S-S. QIAN, and M. DIXON	919
Modified Homogeneous Condensation Model. Comparison of Theoretical and Experimental Results A. L. ITKIN, U. G. PIRUMOV, and Yu. A. RIJOV	937
Nonequilibrium Condensation in Spherical Symmetrical Unsteady Rarefied Wave A. L. ITKIN, U. G. PIRUMOV, Yu. A. RIJOV, and P. V. ROZOVSKY	945

The Effect of Homogeneous Condensation on Gasdynamics and IR Radiation of Carbon Dioxide and Water Vapour Free Jets V. N. YARYGIN, P. A. SKOVORODKO, N. G. GORCHAKOVA, G. A. KHRAMOV, and O. A. NERUSHEV	951
Effect of Homogeneous Condensation of Steam on Flow Field in a Supersonic Nozzle K. MATSUO, S. KAWAGOE, T. SETOGUCHI, K. SONODA, and S. B. KWON	959
A Spectroscopic Study of Free Evaporation of Sodium W. B. TAKENS, W. MISCHKE, J. KORVING, and J. J. M. BEENAKKER	967
Experimental Investigation on Droplet Evaporation in a Wide Knudsen Number Range K. ANDERS and A. FROHN	975
Condensation Onset in Free Jets Measured by Laser Light Scattering C. DANKERT	983

XIV. IONIZED GASES, APPLICATIONS

Rotational Rainbow Effect in Collisions of Na ⁺ Ions with N ₂ and CO Molecules S. KITA, T. HASEGAWA, M. IZAWA, and H. INOUE	993
A Discharge Excited Supersonic Expansion as a Source for Thermal Metastable Rare Gas Atoms M. J. VERHEIJEN and H. C. W. BEIJERINCK	1001
Monte Carlo Simulation of Electron Thermalization in Gases: Subexcitation Electrons in Hard-Sphere and Maxwell Model Gases K. KOURA	1007
Heat Flux in Steep Temperature Gradient Lorentzian Plasma M. OGASAWARA, M. ISHIKAWA, and A. FUKANO	1015
Instability of Propagation and Rotating Ion Beam K. NIU, M. SETO, and M. TAMBA	1023
Structures of Low Density Supersonic Jets for the Neutralization of Fast Ion Beams M. MASUDA, H. YANO, M. AKAZAKI, and T. IKUI	1031
Application of Glow Discharge in Supersonic N ₂ Flow to CO ₂ Mixing Laser K. MAENO and N. YAMAGUCHI	1039
Pulsed Plasma Driver with New Cryogenic Anode K. KASUYA, K. HORIOKA, T. TAKAHASHI, H. KUWABARA, and H. YONEDA ...	1047
High Speed Flow Accompanied with Laser Initiated Electrical Discharges K. HORIOKA, H. TAMURA, M. NISHIWAKI, and K. KASUYA	1055
Electrostatic Drag of Spherical Conducting Bodies Moving through a Collisionless, Maxwellian Plasma; A Parametric Study R. GODARD and J. G. LAFRAMBOISE	1063
Heat Transfer to Spherical Conductive Objects in Collisionless Magneto-Plasmas J. -S. CHANG and R. GODARD	1073

Kinetic Theory of the Escape of Planetary Atmospheres	
B. SHIZGAL and R. BLACKMORE	1081
An Application of Rarefied Gas Dynamics to Astrophysics: The CRESU	
Technique	
J. B. MARQUETTE, B. R. ROWE, and G. DUPEYRAT	1089
An Aerodynamic Simulation of Solar Flares	
K. K. YOSHIKAWA	1097
Index of Authors	1109
List of Rarefied Gas Dynamics Series Volumes	1111
