Authors Index	705

I Kinetic Theory

Stability of Shock Wave Profiles for a Model Boltzmann Equation R. Caflisch and T. P. Liu	3
Anisotropic Approach to Equilibrium in the Nonlinear Spatially Homogeneous Boltzmann Equation R. O. Barrachina and C. R. Garibotti	10
Non Navier-Stokes Gasdynamics and Thermal-stress Phenomena M. N. Kogan	15
Two-fluid Theory for Monoatomic Gases and the Propagation of Sound in Binary Mixtures R. Fernandez-Feria and J. Fernandez de la Mora	25
The Mott-Smith Ansatz in Singular Cases K. Piechòr	35
Weak Shock for Disparate Gas Mixtures D. H. Tiem	45
Exact Time-dependent Solutions to the Nonlinear Boltzmann Equation V. C. Boffi and G. Spiga	55
Boltzmann Equation for Nonlinear Particle Transport in a Host Medium: Moment Methods and Lie Group Techniques G. Dukek and D. Rupp	64
Influence of Various Source Terms on the Relaxation Process in a Binary Gas Mixture D. Rupp and G. Dukek	75
On the Nonlinear Dynamics of Multispecies Gas Kinetic Equations J. P. Holloway and J. J. Dorning	85
Nonlinear Boltzmann Equation for Particle Transport in a Background Gas with a Maxwellian Distribution G. Spiga and F. Premuda	100
Wave Propagation in a Rarefied Gas of Rough Spheres G. M. Kremer and C. Cercignani	110

VIII

II Mathematical Aspects of Kinetic Theory

Perturbation of Bisemigroups and Boundary Value Problems for Abstract Kinetic Equations	
A. H. Ganchev, W. Greenberg and C. V. M. Van der Mee	125
Abstracts Kinetic Equations Relevant to Transport in Multiplying Media in Slab Geometry	
W. Greenberg and W. Walus	134
Existence of Global Solutions to the Boltzmann Equation in L^∞	
A. Palczewski	144
Initial Layer and Existence of a Solution of the Nonlinear Boltzmann Equation	
M. Lachowicz	150
Mixed Problem for the Enskog Equation in a Half Space	
T. Platkowski	160
The Nonlinear Boltzmann Equation: Analysis of the Influence of the Cut-off on the Solution of the Cauchy Problem	
G. Toscani and N. Bellomo	167

III Analysis of Rarefied Gas Flows

Rarefied Gas Dynamics Problems in Environmental Sciences	
S. K. Loyalka	177
Force and its Moment on a Heated Inclined Plate in a Semi-infinite Expanse of a Highly Rarefied Gas Bounded by a Plane Wall	
Y. Sone, S. Tanaka	194
Transient Free Molecular Flow with Partial Accomodation through a Tube	
D. C. Pack, K. Yamamoto	204
Half-range Expansions for the Solution of the Boltzmann Equation; Application to the Escape of Atmospheres	
U. Weinert and B. Shizgal	214
Details of the Knudsen Layer for a Cold Wall Sphere	
G. T. Chrusciel and L. A. Pool	226
Forces on Heated Circular Cylinders in a Highly Rarefied Gas	
K. Aoki, Y. Sone and T. Ohwada	236
On the Shock-wave Structure in a Binary Gas-mixture Represented by a Discrete Velocities Model	
R. Monaco	245
An Accurate Solution of the Shear flow Equation in Plane Geometry	
D. Valougeorgis	255
Scattering of Impulse Molecular Beam in Rarefied Gas	
V. V. Aristov and E. M. Shakhov	266

IX

Slip Effects in the Entrance Flow in Ducts	
P. G. Berardi, L. De Socio and A. Pozzi	276
Nonlinearities in the Interspecies Transfer of Momentum and Energy for Disparate-mass Gas Mixtures and Shock Wave Structure	
P. Riesco-Chueca, R. Fernandez-Feria and J. Fernandez de la Mora	283
The Infinitely Strong Shock	
R. Narasimha, P. Das	293

IV Polyatomic Gases

On Slip Coefficients for Polyatomic Gases	
B. I. M. Ten Bosch and J. J. M. Beenakker	311
Light Induced Kinetic Effects in Molecular Gases	
R. W. M. Hoogeveen, R. J. Van Den Oord and L. J. F. Hermans	321
Orientalional Dependence of Field Effects in Rarefied Gas Flows	
I. Kuscer and J. J. M. Beenakker	330
Kinetic Theory Analysis of the Scott Effect	
C. Cercignani and M. Lampis	336
Nonequilibrium Vibrational Population Behind Shock Waves: Comparison Theory-Experiments	
J. G. Méolans and R. Brun	345
Rotational Excitation of NH_3 Colliding with He: Experiments and Theore- tical Calculations	
M. Broquier, A. Picard-Bersellini, H. Aroui, J. Hall and G. Billing	355

V Monte Carlo Simulation and Numerical Analyses

Theoretical Basis of the Direct Simulation Monte Carlo Method	
K. Nanbu	369
Direct Simulation of Hypersonic Transitional Flow	
J. N. Moss	384
The Diffusion of Individual Molecules within a Gas	
G. A. Bird	400
Rarefied Gas Dynamics Problems on Fabrication Processes of Semiconduc- tor Film	
K. Nanbu	410
Direct Monte-Carlo Calculations on Expansion Wave Structure	
F. Seiler	420

X

Direct Monte-Carlo Simulation Technique Applied to Some Rarefied Gas Dynamics Problems	
F. Seiler, B. Schmidt and N. Kuschnerus	431
Monte-Carlo Simulation of Free Jet Flow from a Slit	
J. B. Anderson, J. D. Foch, M. J. Shaw, R. C. Stern and B. J. Wu	442
Monte-Carlo Simulation of Transitional Flow Around Simple Shaped Bodies	
W. L. Hermina	452
Monte-Carlo Molecular Flow Solutions to Certain Internal Flow Problems and their Experimental Verification	
E. Rathakrishnan and A. K. Sreekanth	461
Simple Differential Scattering Cross Section Model for Use in the Direct Simulation Monte-Carlo Method	
A. U. Chatwani	471
Numerical Studies on Rarefied Flow over a Flat Plate at an Angle of Attack	
E. M. Shakhov	482
Finite Element Solution of the Linearized Boltzmann Equation through its Variational Principle	
K. Sugano and A. Sakurai	492
Oscillatory Flow of a Radiating Rarefied Gas past a Long Vertical Flat Plate	
A. R. Bestman	502
Iteration Scheme for the Solution of the Nonlinear Spatially Homogeneous Boltzmann Equation	
D. H. Fuji, R. D. Barrachina and C. R. Garibotti	514

VI Vehicle Aerodynamics and External Flows

Shear Stress and Pressure in Plume Impingement Flow	
H. Legge	523
Influence of Background Pressure on the Impingement of an Exhaust Plume upon a Perpendicular Flat Plate	
J. Allegre, M. Raffin and J. C. Lengrand	539
Slip Effects on Supersonic Flowfields Around NACA 0012 Airfoils	
J. Allegre, M. Raffin and L. Gottesdiener	548
Tethered Space System: A New Facility for Experimental Rarefied Gas Dynamics	
F. Bevilacqua and C. Chiarelli	558
Low Density Aerothermodynamics Studies Performed by Means of the Tethered Satellite System	
G. M. Carlomagno, L. De Luca, P. M. Siemers and G. M. Wood Jr.	574

XI

Feasibility Study of a Stabilizer Fin for the Tethered Satellite System A. Ercoli Finzi, G. Fiocchi and R. Trucco	586
An Improved Stagnation Point Viscous Shock Layer Flow over a Blunt Body A. C. Jain and P. Kumar	597

VII Gas – Surface Phenomena, Beams

Free Molecule Drag and Lift Deduced from Shuttle Flight Experiments G. R. Karr, J. C. Gregory and P. N. Peters	609
Upper Atmosphere Aerodynamics: Mathematical Modelling and Experimental Validation M. Pandolfi and M. G. Zavattaro	618
Heat Transfer of a Cylinder in Rarefied Gas Flows and Partial Accommodation Coefficients V. Sankovich	627
The Boundary Conditions on the Body Surface for a Diatomic Gas I. N. Larina and V. A. Rykov	635
A Measurement of the Angular Distribution of 5 eV Atomic Oxygen Scattered off a Solid Surface in Earth Orbit J. C. Gregory and P. N. Peters	644
CO ₂ Laser Sustained CW Discharge Atomic Beam Source J. B. Cross, D. A. Kremers, L. H. Spangler, M. A. Hoffbauer and F. A. Archuleta	657
Doped Single Crystals by Double Molecular Beam Epitaxy A. E. Grosser, D. J. Simkin, P. Vasu, A. Bruce and A. Wong	667
Cold H-Atom Beams for Fundamental Studies E. K. Izrailov	676
Temperature Dependence of Gas Atoms Energy Accommodation on the Surface of Equilibrium and Non-Equilibrium Solid B. T. Porodnov, N. Ph. Balakhonov, V. D. Seleznev and V. I. Tokmantsev	685
Metastable TOF-Analysis of Rarefied Gas Flows V. D. Perminov, O. B. Shpenik, A. V. Snegursky and A. N. Zaviropulo	696
