Contents of Volume I	XI
Authors Index	633

VIII Species Separation and Transport Phenomena

Laser Assisted Isotope Separation in a Van Der Waals Cluster Beam R. Monot and H. Van den Bergh	3
The Free Molecular Orifice Pressure Probe for Mass-spectroscopic Studies G. Koppenwallner	24
Reactive Collision of O + H ₂ Produced with Excited States in a Cross Beam Experiment A. Lebéhot, J. Marx, F. Aguilon and R. Campargue	34
Influence of Nonequilibrium Effects on Isotope Separation in Real Flow Fields of Separation Nozzles W. Ehrfeld and W. Schelb	44
Collision Energies of Heavy Species Seeded in Supersonic H ₂ Jets Impinging on Surfaces at Large Background Pressures J. Fernandez De La Mora, P. Riesco Chueca, R. Fernandez-Feria, J. B. Fenn and J. J. Schmitt	56
A Study of Species Separation in Free Jet Expansions G. A. Allen, G. Koppenwallner and K. H. Leners	66

IX Clusters and Aerosols

Generation and Mass Spectrometry of Pb-Sb and Bi-Sb Microclusters D. Schild, R. Pflaum, K. Sattler and E. Recknagel	79
Structural Information from Photon- and Electron-Induced Dissociation of Sodium Halide Clusters R. Pflaum, K. Sattler and E. Recknagel	87
Formation of Localized Excitations inside Ar Clusters by Electron Bombardment E. T. Verkhovseva, E. A. Bondarenko and Yu. S. Doronin	96

VIII

Relaxation Processes in a Jet in the Presence of Phase Transitions A. K. Rebrov and R. G. Sharafudtinov	109
Odd-Even Alternation in Photoionization Behaviour of Alkali-Metal Clusters C. Bréchnac, Ph. Cahuzac and Ph. Roux	124
Acoustic Investigation of Aerosols in the Region $Kn \cong 1$ W. Hiller, M. Huttig and H. Lang	134
The Dispersion of the Free Flying Liquid Droplet Streams Shao-Sheng Quain	144
An Apparatus for the Estimation of the Contamination by Particles A. Drobnik, L. Łukaszewski, K. Pieszynski and L. Wolf	155
Laser Heating of Iron in Nitrogen A. Drobnik and K. Rozniakowski	161
Molecular Dynamics Simulation of Water Cluster Formation in Binary Mixtures T. Sano, M. Yamashita and S. Kotake	169
The Gas Dynamics of Expanding Nozzle Flows with Condensation S. A. Palopezhentsev, V. N. Yarygin, A. E. Zarvin and V. Zh. Madirbaev . .	179
The Cluster Ensemble in the Theory of Nucleation N. Fukuta	188
Experimental Studies of Condensation in Helium Nozzle Beams H. Buchenau, R. Götting, A. Scheidemann and J. P. Toennies	197
Thermal Effects on SF ₆ Clusters in Ne-SF ₆ Expansions J. Farges, M. F. De Faraudy, B. Raoult and G. Torchet	208
Water Clusters: Computational Aspects at Molecular Level Z. Slanina	217

X Condensation and Evaporation

Comets as Large Dirty Snowballs Sublimating in Interplanetary Space: A Review of Gas Dynamics Models J. F. Crifo	229
Evaporation and Condensation of a Vapour-Gas Mixture Between the Coaxial Cylindrical Condensed Phases Y. Onishi	251
Evaporation from a Furnace into a Vacuum Y. Watanabe and K. Nanbu	261
Mott-Smith Solution for Weak Condensation T. Ytrehus and T. Aukrust	271
Direct Statistical Simulation of the Dynamics of Vapour Scatter in an Ax- ially Symmetric Hole S. Radev and S. Stefanov	281
Numerical Simulation of Flows with Condensation and Evaporation A. L. Itkin, U. G. Pirumov, Yu. A. Rijov and P. V. Rozovsky	290

IX

Four-Moment Models of One-Dimensional, Multicomponent Distillation at High Vacuum	
J. R. Ferron	301
Kinetic Theory Study of the Strong Evaporation of a Binary Mixture	
A. Frezzotti	313
A Study of Unsteady Strong Condensation on a Plane Condensed Phase with Special Interest in Formation of Steady Profile	
Y. Sone, K. Aoki and I. Yamashita	323
Flow of a Rarefied Vapour past a Circular Cylinder Accompanied with Evaporation or Condensation at its Surface	
K. Yamamoto and Y. Ishihara	334

XI Ionized and Chemically Reacting Gases

A Kinetic Equation for a Magnetoplasma	
L. C. Woods	347
Kinetic and Macroscopic Effects of a Rapidly Oscillating Electric Field in a Plasma	
A. H. Øien	354
The Burgers Equation for Ion Motion in a Partially Ionized Gas	
V. G. Molinari and G. Peerani	364
Collisional Kinetic Theory of the Escape of Light Ions from the Polar Wind	
B. Shizgal, U. Weinert and J. Lemaire	374
Transport Phenomena in a Slab in the Presence of Temperature Gradient	
V. G. Molinari and L. Rondoni	384
A Variational Principle for the Plasma Centrifuge	
G. O. Ludwig	393
Experimental Study of the Oscillatory Mode in the Plasma of a Spherically Symmetry Ion Source	
M. A. Bourham and H. M. Soliman	404
Statistical Theory of Electronic Energy Relaxation	
J. B. Anderson, J. D. Foch, M. J. Shaw, R. C. Stern and B. J. Wu	413
A High Temperature Shock Tube Study on Fast Reactions of Methylene and Methyl Radicals	
P. Frank	422
A Continuum Analysis of Chemical Nonequilibrium under Hypersonic Low Density Flight Conditions	
R. N. Gupta	432
Diffusion with Chemical Reaction of a Rarefied Gas Mixture in a One-end Circular Tube	
T. Kanki and S. Iuchi	442

XII Free Jets and Nonequilibrium Expansions

Studies on Physical Gas Dynamic of Jets as Applied to Vacuum Pumps A. K. Rebrov	455
Inertially Tethered Clouds of Gas in a Vacuum E. P. Muntz, D. Kingsbury and C. De Vries	474
Flow in the Interaction Region of Two Parallel Free Jets C. Dankert	486
An Application of Mass-Sampling Probe to Experiments on Free Jets of Rarefied Gases Mixture H. Oguchi and S. Sato	495
Temperature Measurement in Free Jet Expanded Gas Mixtures R. G. Schabram and A. E. Beylich	504
The Sudden-Freeze Model Revisited L.-T. Dao-Gibner and E. L. Knuth	514
The Freezing of Flow Deflection in Prandtl-Meyer Expansion to Vacuum K. W. Naumann	524
Numerical and Experimental Studies of Low-Density Dusty Gas Free Jets M. Nishida and S. Abe	534
Structures of Condensing Free Jets of Argon K. Teshima, K. Abe and T. Nishino	544
Stationary Free Jets of Nitrogen Plasma M. Founoune, C. Danton and M. Dudeck	554
Two-Photon Resonant Third Harmonic Generation in the XUV Range Reflecting Internal State Populations in CW CO Free Jets F. Aguillon, A. Lebéhot, J. Rousseau and R. Campargue	565
Stagnation Pressure Probe for Supersonic Rarefied Gas Flows V. Sankovich	575
Mass Recovery Efficiency of Supersonic Diffusers in Rarefied Flows M. Masuda, H. Nakamuta, H. Yano, M. Akazaki and T. Ikui	585
Structures of Free Jets from Slit Orifices K. Teshima and H. Nakatsuji	595
Free-Jet Flows of Gas-Particle Mixtures R. Ishii and Y. Umeda	605
Simulation of Hydrodynamic Interaction between Particles in Rarefied Gas Flows V. N. Gusev and Yu. V. Nikolsky	614
The Use of Pulse Lasers for Flow Visualization and Local Density Measurements in Free Jets S. A. Novopashin, A. L. Perepyolkin and V. N. Yarygin	623
