

## Volume II

### **PART 1. Superconductivity**

High-Temperature Superconductivity in Ceramic Compounds and Bisoliton Model . . . . .	327
<i>A.S. Davydov</i>	

Lattice Pinning of a CDW and Quantum Fluctuations . . . . .	342
<i>S. Aubry &amp; P. Quemerais</i>	

### **PART 2. Hydrogen-Bonded Systems**

Nonlinear Aspects of Collective Proton Dynamics in Bioenergetics . . . . .	367
<i>G.P. Tsironis &amp; St. Pnevmatikos</i>	

Two-component Kink Dynamics of Hydrogen-Bonded Chains . . . . .	384
<i>A. Zolotaryuk &amp; St. Pnevmatikos</i>	

Dynamical Properties of Acetanilide, A Crystal with Hydrogen-Bonded Chains . . . . .	411
<i>M. Barthes</i>	

### **PART 3. Nonlinear Atomic Lattices**

Commensurate Structures in a Triagonal and Square Lattice at Zero and Finite Temperatures . . . . .	419
<i>G. Vlastou-Tsinganos &amp; N. Flytzanis</i>	

Soliton Dynamics in Coupled Sine-Gordon Chains . . . . .	436
<i>Y.S. Kivshar</i>	

The Impurity Mode in a $\varphi^4$ Atomic Chain . . . . .	447
<i>T. Fraggis, St. Pnevmatikos &amp; E.N. Economou</i>	

Modelling One Degree of Freedom Behaviour of Dissipative Hamiltonian Systems with Forcing . . . . .	457
<i>T.P. Valkering, G. Derkx &amp; E. van Groesen</i>	

### **PART 4. Long Josephson Junctions and Sine-Gordon Solitons**

Nonlinear Dynamics of the Josephson Junction . . . . .	473
<i>P.L. Christiansen &amp; N.F. Pedersen</i>	

The Josephson Fluxon Mechanics . . . . .	510
<i>G. Reinisch &amp; J.C. Fernandez</i>	

Global Analysis of the Josephson Junction Dynamics Using Cell Mapping . .	539
<i>M.P. Soerensen, A. Davidson, N.F. Pedersen &amp; S. Pagano</i>	

On the Role of Soliton Solutions in Temporal Chaos: Examples for Plasmas and Related Systems . . . . .	555
<i>K.H. Spatschek, H. Pietsch, E.W. Laedke &amp; Th. Eickermann</i>	
Stationary Stochastic Configurations of the Sine-Gordon System under Spatial White Noise . . . . .	565
<i>A. Sanchez &amp; L. Vazquez</i>	
<b>PART 5. Hydrodynamics</b>	
On a Singularity Encountered during the Numerical Study of a Fluid-dynamics Boundary-layer Problem . . . . .	581
<i>P. Luchini</i>	
Turbulent Transport Measurement by Optical (Non-intrusive) Techniques .	601
<i>P.N. Papanicolaou</i>	
<b>PART 6. Other Topics</b>	
Dynamics of Optical Solitons in Glass Fibers – Recent Progress . . . . .	615
<i>A. Hasegawa</i>	
Wenckebach Rhythms in Isolated Ventricular Heart Cells . . . . .	629
<i>M.R. Guevara, D. Jeandupeux, F. Alonso &amp; N. Morissette</i>	
Fractal Physiology; A Paradigm for Adaptive Response . . . . .	643
<i>B.J. West</i>	
Nonlinear Dynamical Phenomena in Liquid Crystals . . . . .	665
<i>X.Y. Wang &amp; Z.M. Sun</i>	
A Brief Survey of Analytical and Numerical Results from the Theory of Davydov Solitons . . . . .	681
<i>D.W. Brown, K. Lindenberg &amp; X. Wang</i>	
The Quantum Nonlinear Dimer and Extensions . . . . .	698
<i>V.M. Kenkre</i>
