

TABLE OF CONTENTS

J. L. Lumley: Application of central limit theorems to turbulence problems	1
M. Rosenblatt: Probability limit theorems and some questions in fluid mechanics	27
J. M. Burgers: Statistical problems connected with asymptotic solutions of the one-dimensional nonlinear diffusion equation	41
K. M. Case: Burger's equation: Generalizations and solutions	61
T. S. Lundgren: A closure hypothesis for the hierarchy of equations for turbulent probability distribution functions	70
M. Kac: Singular perturbation in some problems of statistical mechanics	101
F. H. Busse: The bounding theory of turbulence and its physical significance in the case of turbulent couette flow	103
S. A. Orszag and G. S. Patterson, Jr.: Numerical simulation of turbulence	127
J. R. Herring and R. H. Kraichnan: Comparison of some approximations for isotropic turbulence	148
E. N. Lorenz: Investigating the predictability of turbulent motion	195
W. Meecham and W. C. Clever: Use of Cameron-Martin-Wiener representations for nonlinear random process applications	205
G. Kallianpur: Homogeneous chaos expansions	230
W. J. Cocke: Non-analytic character of the shear-tensor distribution function in incompressible turbulence	255
H. K. Moffatt: Dynamo instability and feedback in a stochastically driven system	266
J. B. Taylor and W. B. Thompson: The statistical mechanics of the guiding center plasma	280
D. Ruelle: Strange attractors as a mathematical explanation of turbulence	292
S. Corrsin: Random geometric problems suggested by turbulence	300
M. J. Karweit and S. Corrsin: Simple and compound line growth in random walks	317
S. Corrsin and M. J. Karweit: The mixing of scalar stripes by an isotropic ensemble of single velocity modes	327

VIII

B. B. Mandelbrot: Possible refinement of the lognormal hypothesis concerning the distribution of energy dissipation in intermittent turbulence 333

J. A. Dutton and D. G. Deaven: Some observed properties of atmospheric turbulence 352

J. C. Wyngaard and Y. H. Pao: Some measurements of the fine structure of large Reynolds number turbulence 384

C. Van Atta and J. Park: Statistical self-similarity and inertial subrange turbulence 402

C. H. Gibson and P. J. Masiello: Observations of the variability of dissipation rates of turbulent velocity and temperature fields 427

F. N. Frenkiel and P. S. Klebanoff: Probability distribution of turbulent fields 454

W. H. Munk: Turbulence in a stratified ocean 455

E. J. Hannan: Spectra changing over narrow bands 460

E. Parzen: Some recent advances in time series analysis 470
