

SEVENTH SYMPOSIUM ON TURBULENT SHEAR FLOWS
Stanford University, August 21-23, 1989

CONTENTS OF VOLUME 1
SESSIONS 1-15

SESSION 1 - PLENARY PRESENTATIONS

- 1-1 The structure of pressure fluctuations in turbulent shear flows
J. Kim, M. J. Lee
- 1-2 Extinction by stretch of turbulent premixed flames in counterflowing streams
K. N. C. Bray, M. Champion, L. W. Kostiuk, P. A. Libby
- 1-3 Fossil two-dimensional turbulence in the ocean
C. H. Gibson
- 1-4 A study of the sensitivity of an incompressible turbulent boundary layer on the verge of separation
P. Dengel, H. H. Fernholz

SESSION 2 - WALL FLOWS - I

- 2-1 Relation of turbulence production to eddy structure in wall turbulence
S. L. Lyons, T. J. Hanratty, J. B. McLaughlin
- 2-2 Bursts and wall shear stress fluctuations in turbulent boundary layers
J. F. Morrison, P. Bradshaw
- 2-3 Turbulence characteristics inside a turbulent spot in plane Poiseuille flow
D. S. Henningson, J. Kim
- 2-4 Some characteristics of bypass transition in a heated boundary layer
K. H. Sohn, J. E. O'Brien, E. Reshotko
- 2-5 Production of turbulence in boundary layers
R. E. Falco, J. C. Klewicki, Q. Pan

SESSION 3 - FREE SHEAR FLOWS - I

- 3-1 Experimental and numerical analysis of the three-dimensional evolution of an axisymmetric jet
E. Meiburg, J. C. Lasheras, J. E. Martin
- 3-2 Effect of velocity ratio on plane mixing layer development
R. D. Mehta, R. V. Westphal
- 3-3 Calculations of axisymmetric turbulent jets by the PDF method
M. S. Anand, S. B. Pope, H. C. Mongia
- 3-4 Zonal modeling of turbulent free shear flows
K. L. Tzuoo, J. H. Ferziger, S. J. Kline

SESSION 4 - NUMERICAL TECHNIQUES - I

- 4-1 Local solutions of the Navier-Stokes equations - application to time-dependent problems
A. E. Perry, M. S. Chong
- 4-2 Vortex models of a pseudo-turbulent shear flow
T. E. Base, K. R. Wheaton
- 4-3 Inviscid simulations of turbulent shear layers - fluctuating flow profiles
K.-Y. Chien, R. E. Ferguson, A. L. Kuhl, H. M. Glaz, P. Colella
- 4-4 Prediction of extremal events by numerical simulation
H. M. Tsai, D. C. Leslie, P. R. Voke
- 4-5 A discussion on turbulence model by means of LES
Y. Miyake, T. Kajishima

SESSION 5 - WALL FLOWS - II

- 5-1 An investigation of the nature of Reynolds stress in the wall region of turbulent pipe flow
P.-A. Chevrin, H. L. Petrie, S. Deutsch
- 5-2 Boundary layer turbulence structure in the presence of embedded streamwise vortex pairs
W. R. Pauley, J. K. Eaton
- 5-3 Calculation of a variety of boundary layers with a second-moment closure applicable up to a wall
N. Shima
- 5-4 A comparative study of length scale equations in turbulent boundary layers
E. Arad, M. Wolfshtein
- 5-5 Grid-independent wall layer turbulence model for complex flow calculations
M. J. Jennings, T. Morel

SESSION 6 - FREE SHEAR FLOWS - II

- 6-1 An experimental investigation of the turbulent structure in a two-dimensional momentumless wake
J. M. Cimbala, W. J. Park
- 6-2 Three-dimensional aspects and transition of the wake of a circular cylinder
C. H. K. Williamson
- 6-3 Reynolds stress evolution in curved two-stream turbulent mixing layers
M. W. Plesniak, J. P. Johnston
- 6-4 Structure in the near field of the transverse jet
T. F. Fric, A. Roshko
- 6-5 An experimental investigation of wall jets issuing from rectangular sharp-edged orifices
R. R. Schwab, A. Pollard

SESSION 7 - NUMERICAL TECHNIQUES - II

- 7-1 Direct simulation of a fast chemical reaction in a homogeneous turbulent shear flow
S. E. Elghobashi, K. K. Nomura
- 7-2 Spectral element-RNG simulations of turbulent flows in complex geometries
G. Karniadakis, A. Yakhot, S. Rakib, S. Orszag, V. Yakhot
- 7-3 A finite volume multigrid method for calculating turbulent flows
M. Peric, M. Ruger, G. Scheuerer

SESSION 8 - WALL FLOWS - III

- 8-1** The structure of sheared turbulence near a plane boundary
M. J. Lee, J. C. R. Hunt
- 8-2** Turbulence statistics in a shock wave boundary layer interaction
M. Elena, P. Rakoto
- 8-3** Turbulence in turbulent boundary layer developed along plane wall in linear shear stream
S. Okamoto, K. Tsunoda
- 8-4** The disturbance to the turbulent channel flow produced by a cylinder with axis perpendicular to the walls: A study with a quadruple hot-wire probe
V. Schulz, V. I. Vasanta Ram
- 8-5** Study on a turbulent boundary layer disturbed by a cylinder - effect of cylinder size and position
K. Suzuki, H. Suzuki, Y. Kikkawa, H. Kigawa

SESSION 9 - FREE SHEAR FLOWS - III

- 9-1** Large scale structures in reacting mixing layers
C. Lee, R. Metcalfe, F. Hussain
- 9-2** Asymmetric effects in three-dimensional spatially-developing mixing layers
J. C. Buell, N. N. Mansour
- 9-3** The development of three-dimensional temporally-evolving mixing layers
M. M. Rogers, R. D. Moser
- 9-4** Direct numerical simulations of transition in a compressible wake
J. H. Chen, N. N. Mansour, B. J. Cantwell
- 9-5** Growth of oblique waves in the mixing layer at high Mach number
N. D. Sandham, W. C. Reynolds

SESSION 10 - SEPARATED FLOWS

- 10-1** The flow over two-dimensional, surface-mounted obstacles at high Reynolds numbers
G. Dimaczek, R. Kessler, R. Martinuzzi, C. Tropea
- 10-2** Large-eddy simulation of turbulent flow over a square rib in a channel
H. Werner, H. Wengle
- 10-3** Flow analysis in a vortex flowmeter: an experimental and numerical approach
F. Blot, A. Giovannini, P. Hebrard, A. Strzelecki
- 10-4** Experimental and numerical investigations of the axisymmetric, turbulent pipe flow over a wall-mounted thin obstacle
F. Durst, A. B. Wang
- 10-5** The effect of the near-wall treatment on the behavior of Reynolds-stress turbulence models for reattaching flows
W. C. Lasher, D. B. Taulbee

SESSION 11 - UNSTEADY FLOWS

- 11-1** The effects of forcing on a single stream shear layer and its parent boundary layer
R. C. Haw, J. F. Foss
- 11-2** Ejections and bursts in pulsatile turbulent wall flow measurements and visualizations
S. Tardu, G. Binder
- 11-3** Experimental study of a flat plate oscillating in pitch
R. Houdeville, J. L. Bonnet, J. Cousteix
- 11-4** Time-dependent calculation of a forced mixing layer using a k - ϵ turbulence model
J. M. MacInnes, R. W. Claus, P. G. Huang
- 11-5** Physical analysis and second-order modelling of an unsteady turbulent flow: the oscillating boundary layer on a flat plate
H. Ha Minh, J. R. Viegas, M. W. Rubesin, D. D. Vandromme, P. Spalart

SESSION 12 - STRATIFIED FLOWS

- 12-1** Numerical prediction of turbulent buoyant flows
Y. Nagano, Y. Yin, T. Tsuji
- 12-2** The evolution of turbulence in the presence of mean shear and stable stratification
S. E. Holt, J. R. Koseff, J. H. Ferziger
- 12-3** Second moment closure prediction of recirculating flow and of countergradient heat flux in stratified flow
M. Kanniche, F. Baron, P.-L. Viollet
- 12-4** Measurement and modelling of buoyancy-modified, elliptic turbulent shear flows
R. Cresswell, V. Haroutunian, N. Z. Ince, B. E. Launder, R. T. Szczepura
- 12-5** Modeling the cloudy boundary layer with a 2-D third-order closure model: a case study
B. Lacroix

SESSION 13 - APPLICATIONS - I

- 13-1** Application of a PDF method to in-cylinder flows in reciprocating engines
D. C. Haworth, S. H. El Tahry
- 13-2** Numerical calculation of the jet-interaction induced separation with respect to thrust vector control
W. Waidmann
- 13-3** Development of a new low-Reynolds-number type Reynolds stress model and its application to lobe mixer flow
M. Yamamoto, C. Arakawa, T. Tagori
- 13-4** Mean and turbulence measurements in the wake of an axisymmetric body driven by a marine propeller
B. S. Hyun, V. C. Patel
- 13-5** Velocity and turbulence characteristics of isothermal lobed mixer flows
P. Koutmos, J. J. McGuirk

SESSION 14 - SCALAR FLOWS

- 14-1** High resolution three-dimensional (256^3) spatio-temporal measurements of the conserved scalar field in turbulent shear flows
W. J. A. Dahm, K. A. Buch
- 14-2** Measurement and computation of differential molecular diffusion in a turbulent jet
A. R. Kerstein, R. W. Dibble, M. B. Long, B. Yip, K. Lyons
- 14-3** Effect of flow distortion on a turbulent scalar field
H. R. Rahai, J. C. LaRue
- 14-4** Turbulence model for triple velocity and scalar correlations
Y. Nagano, M. Tagawa
- 14-5** On the effect of the disturbance of a sphere on the point source diffusion process in grid-generated turbulence
I. Nakamura, Y. Sakai, H. Tsunoda, S. Liu

SESSION 15 - TWO PHASE FLOWS

- 15-1** Dispersion of monosized heavy particles in a grid turbulence. Effects of body forces
C. Maquet, M. Trinite, M. Ledoux
- 15-2** Fluid turbulence in a particle-laden flat-plate boundary layer
C. B. Rogers, J. K. Eaton
- 15-3** Particle dispersion in turbulent, free shear flows
B. J. Lazaro, J. C. Lasheras
- 15-4** On the determination of particle-erosion rates within a turbulent boundary-layer
A. D. Ciccone, J. G. Kawall, J. F. Keffer
- 15-5** Turbulence length scale equation for two-phase flow prediction
T. W. Abou-Arab, M. C. Roco
