

CONTENTS

CHAPTER		PAGE
1	Introduction: The Fluid State	1
2	The Classical Approach	8
3	Fluids of Small Viscosity	25
4	The Flow of Compressible Fluids	80
5	Hypersonic Flow	97
6	Aerodynamic Noise	102
7	Fluids with a Temperature Gradient	117
8	Liquid having a Free Surface	136
9	Behaviour of Particles in Suspension in a Stream	166
10	Fluids showing Anomalous Viscosity: Suspensions	184
11	Elastic Liquids	202
12	Magnetohydrodynamics	217
	Author Index	225
	Subject Index	228
