

## CONTENTS

	Page
<b>CHAPTER I: INTRODUCTION</b>	
1. Stress-Strain Relationships . . . . .	1
2. Maxwell's Equation . . . . .	2
3. Relaxation under Constant Deformation . . . . .	4
4. Visco-Elastic Behaviour . . . . .	6
5. Measurement of Resilience . . . . .	9
 <b>CHAPTER II: RELAXATIONAL BEHAVIOUR, ILLUSTRATED BY MODELS</b>	
1. Visco-Elastic Types . . . . .	10
2. Canonic Forms of Models . . . . .	11
3. Flow of Visco-Elastic Liquids . . . . .	14
4. Periodic Shear of a Visco-Elastic Liquid . . . . .	15
 <b>CHAPTER III: THE INFRASONIC SPECTRUM</b>	
1. Formulae for Internal Friction . . . . .	24
2. Decay Curve v. Band Width . . . . .	27
3. Automatic Recording of Decay Curves . . . . .	28
 <b>CHAPTER IV: THE SONIC SPECTRUM</b>	
1. Experiments of Philipoff . . . . .	34
2. Types of Damping . . . . .	35
3. Vibrating Reeds. Damping of Medium . . . . .	38
4. Experiments of Davies . . . . .	40
5. Internal Friction in Metals . . . . .	46
6. Experiments of Hillier, Kolsky . . . . .	51
7. Resonance Curve Plotting . . . . .	56
8. Propagation of Longitudinal Waves . . . . .	59
9. Irradiation of High Polymers . . . . .	65
10. Electrical Analogue Models . . . . .	68
 <b>CHAPTER V: ULTRASONIC SPECTRUM</b>	
1. Gases . . . . .	74
2. Liquids . . . . .	83
3. Propagation of Sound in Narrow Tubes . . . . .	85
4. Conversion of Ultrasonic Energy . . . . .	87
5. Fluids near the Critical State . . . . .	90

CHAPTER VI: ULTRASONIC RANGE (continued)	Page
1. Solids. Mode Transformation . . . . .	95
2. Metals . . . . .	99
3. Scattering in Solids . . . . .	102
4. High Polymers . . . . .	104
5. Summary of Relaxations in Solids . . . . .	107
6. Transitions in Solids . . . . .	108
7. Mesomorphic Transitions . . . . .	109
8. Gels . . . . .	116

  

CHAPTER VII: DIELECTRIC RELAXATION	
1. Dielectric Theory . . . . .	120
2. Techniques of Measurement of Dielectric Constant . . . . .	122
3. Comparison of Dielectric and Ultrasonic Relaxation . . . . .	125

  

CHAPTER VIII: SPECTRUM ANALYSIS	
1. Delineation of Spectra . . . . .	129
2. Thermodynamic Implications of the Spectrum . . . . .	131
