

## CONTENTS

<i>Foreword</i> . . . . .	v
<i>Preface to Second Edition</i> . . . . .	vii
<i>From the Preface to First Edition</i> . . . . .	ix
I. <i>Sources of Ultrasound</i> . . . . .	1
1. Piezo-electric Source . . . . .	4
2. Cutting the Oscillator . . . . .	5
3. Mounting of Quartz . . . . .	12
4. Circuits to Maintain Piezo-electric Oscillators . . . . .	15
5. Impedance of Crystal Oscillator . . . . .	19
6. Magneto-strictive Oscillator . . . . .	23
7. Ferro-electric Crystals . . . . .	25
8. Electro- or Magneto-strictive Transducers . . . . .	27
References . . . . .	29
II. <i>Methods of Detection and Properties of Ultrasonic Radiation</i> 31	
1. Smoke Method . . . . .	32
2. Behaviour of a Large Obstacle in the Field . . . . .	33
3. Radiometers . . . . .	35
4. Electrical Detectors . . . . .	38
5. Optical Methods . . . . .	41
6. Microphones . . . . .	42
7. Radiation from a Disc . . . . .	43
8. Reaction on Source . . . . .	49
9. Change of Wave-Form . . . . .	51
10. "Streaming" from an Acoustic Source . . . . .	52

11. Scattering of Ultrasound by Obstacles . . . . .	57
References . . . . .	61
III. <i>Measurement of Propagation Constants</i> . . . . .	63
1. The Pierce Interferometer . . . . .	64
2. The Fixed-Path Interferometer . . . . .	67
3. The Variable-Path Interferometer . . . . .	70
4. Thermal Absorption . . . . .	74
5. Satellites: Effects of Radial Waves . . . . .	74
6. Viscous Damping in Narrow Tubes . . . . .	81
7. Pulse Methods for Propagation Constants . . . . .	82
8. Velocity in Liquids by Optical Methods . . . . .	85
9. Ultrasonic Wave-Train as Optical Grating . . . . .	88
10. Reverberation Methods for Absorption . . . . .	96
References . . . . .	98
IV. <i>Propagation in Gases</i> . . . . .	101
1. Relaxations . . . . .	101
2. Low Frequency Measurements . . . . .	109
3. Ultrasonic Propagation in Pure Gases . . . . .	110
4. Results at Varying Pressure . . . . .	118
5. Propagation in Vapours . . . . .	121
6. Propagation in Moist Air . . . . .	130
7. Propagation in Other Mixtures of Gases . . . . .	132
8. Propagation at High Temperatures and Pressures . . . . .	134
9. Effects at Low Temperature . . . . .	141
10. Propagation in Gases Contained in Capillary Tubes . . . . .	147
References . . . . .	156
V. <i>Propagation in Liquids</i> . . . . .	161
1. Continuous Wave Methods in Liquids . . . . .	161
2. Pulse Methods for Absorption . . . . .	167
3. Absence of Dispersion of Velocity in Liquids . . . . .	169

4. Attenuation in Liquids . . . . .	172
5. Results for $V$ and $\alpha$ in Liquid Mixtures . . . . .	176
6. Effects of Pressure . . . . .	179
7. Effect of Varying Temperature . . . . .	181
8. Propagation in Condensed Gases . . . . .	186
9. Theories of Anomalous Propagation in Liquids . . . . .	190
10. Elastic Liquids under Shear and Compressional Vibration	199
References . . . . .	211
VI. <i>Critical and Other Fluid Transition States</i> . . . . .	215
1. The Critical State between Liquid and Vapour . . . . .	215
2. The Critical State in Liquid Mixtures . . . . .	220
3. Sol-Gel Transition . . . . .	226
4. Velocity in Liquid Helium . . . . .	227
5. Propagation in Liquid He II . . . . .	231
References . . . . .	233
VII. <i>Propagation in Solids</i> . . . . .	235
1. Plates . . . . .	235
2. Propagation in Rods . . . . .	236
3. Propagation in Rubber-like Materials . . . . .	247
4. Propagation in High Polymers and Fibres . . . . .	249
5. Absorption in Solids . . . . .	252
6. Grain Refining and Ultrasonic Scattering in Melts . . . . .	253
References . . . . .	256
VIII. <i>Ultrasound in Disperse Systems</i> . . . . .	259
1. Propagation in Aerosols . . . . .	259
2. Propagation in Suspensions . . . . .	263
3. Propagation in Emulsions . . . . .	268
4. Air Bubbles in Liquids . . . . .	272
5. Cavitation . . . . .	277
References . . . . .	282

<b>IX. <i>Miscellaneous Physical and Physico-Chemical Actions</i></b>	<b>284</b>
1. Dispersion and Coagulation of Particulate Matter . . . . .	284
2. The Break-up of Liquid Jets . . . . .	287
3. Acoustic Birefringence . . . . .	291
4. Sono-Luminescence . . . . .	294
5. Ultrasound and Turbulent Flow. . . . .	294
6. Measurement of Ionic Solvation in Electrolytes . . . . .	298
References . . . . .	302
Author Index . . . . .	303
Subject Index . . . . .	309
