

## TABLE OF CONTENTS

- PANDOLFI, M. - Politecnico di Torino, Italy :  
Upwind formulations for the Euler equations
- DECONINCK, H. - VKI :  
A survey of upwind principles for the multidimensional Euler equations
- KORDULLA, W. - DFVLR-Göttingen, F.R. Germany :  
Integration of the Navier-Stokes equations in finite-volume formulation
- EBERLE, A. - Messerschmitt-Bölkow-Blohm, München, R.F. Germany :  
Characteristic flux averaging approach to the solution of Euler's equations
- MORGAN, K. & PERAIRE, J. - Inst. for Numerical Methods in Engineering,  
U. Wales, Swansea, UK :  
Finite element methods for compressible flows
- DESLANDES, R. - Messerschmitt-Bölkow-Blohm, München, F.R. Germany :  
Time accurate techniques  
using characteristic flux averaging with applications to  
unsteady aerodynamics
- BERGER, M.J. - Courant Institute, NY, USA :  
Adaptive finite difference methods in fluid dynamics
- BRUNO, C. - CNR-CNPM, Italy :  
Nonequilibrium reacting flows
