

# Contents

<b>Introduction</b>	<b>1</b>
<b>Chapter 1.</b>	
<b>General properties of solutions of the Klein-Gordon and Dirac equations</b>	<b>7</b>
1 Basic notations and equations .....	7
2 Some properties of the Dirac matrices, scalar product of relativistic wave functions and transformation laws .....	13
3 On relations between solutions of the Dirac and Klein-Gordon equations .....	28
4 Spin operators for the Dirac equation .....	32
<b>Chapter 2.</b>	
<b>Most important exactly solvable problems in relativistic quantum mechanics</b>	<b>43</b>
5 Free relativistic particle. §1 .....	43
6 Motion of charge in a constant and homogeneous magnetic field. §2 .....	49
7 Motion of charge in the plane-wave electromagnetic field. §3 .....	61
8 Solutions in spherically symmetric fields. §4 .....	67
<b>Chapter 3.</b>	
<b>Exact solutions of relativistic equations of motion in external fields of special configuration</b>	<b>75</b>
9 General properties of motion of an electron in a crossed electromagnetic field .....	77

<b>10</b>	<b>Electron in crossed stationary electromagnetic fields. §§5 – 7</b>	<b>80</b>
<b>11</b>	<b>Exact solutions for a charge in nonstationary crossed fields. §§8 – 19</b>	<b>87</b>
<b>12</b>	<b>Charge motion in longitudinal electromagnetic fields. §§20 – 25</b>	<b>103</b>
<b>13</b>	<b>Electron motion in a combination of crossed and longitudinal fields. §§26 – 39</b>	<b>110</b>
<b>14</b>	<b>Exact solutions in the fields of nonstandard structure. §§40 – 43</b>	<b>144</b>
 <b>Chapter 4.</b>		
	<b>Green's functions of relativistic wave equations in external electromagnetic fields</b>	<b>157</b>
<b>15</b>	<b>Introduction</b>	<b>157</b>
<b>16</b>	<b>Proper-time solution of equations for the Green's functions in a constant field and in a combination of the latter with a plane-wave field</b>	<b>161</b>
<b>17</b>	<b>Solutions and evolution functions of the Klein-Gordon and Dirac equations in a constant field and in its combination with a plane-wave field</b>	<b>170</b>
 <b>Chapter 5.</b>		
	<b>Coherent states of relativistic particles</b>	<b>181</b>
<b>18</b>	<b>Introduction</b>	<b>181</b>
<b>19</b>	<b>Coherent states of relativistic particles that move in an external electromagnetic field</b>	<b>185</b>
 <b>Chapter 6.</b>		
	<b>Charged particles in a quantized plane-wave field</b>	<b>194</b>

<b>20</b>	Basic equations and their interpretation .....	194
<b>21</b>	Separation of the spin variables in the Dirac equation .....	199
<b>22</b>	Separation of the spatial and photon variables. Conserved energy-momentum operator of the system .....	201
<b>23</b>	Charge in quantized field of a monochromatic plane wave with arbitrary polarization .....	205
<b>24</b>	Decomposition in linear polarizations for a quantized wave with arbitrary spectral composition and polarization .....	209
<b>25</b>	Canonical forms of the Hamiltonian for quantized wave of general form .....	212
<b>26</b>	Coordinate representation. Reduction of the Hamiltonian to the canonical form in the coordinate representation .....	225
<b>27</b>	Stationary states .....	227
<b>28</b>	Relations of orthogonality, normalization and completeness .....	231
<b>29</b>	Integrals of motion. Coherent states .....	233
<b>30</b>	Relation between the Volkov solutions and the wave functions in a quantized plane-wave field .....	235
<b>31</b>	The Green's functions of the Klein-Gordon and Dirac equations in a quantized plane-wave field .....	237
<b>32</b>	Charge in the quantized plane-wave field combined with a classical electromagnetic field .....	240
 <b>Chapter 7.</b>		
	<b>Exact solutions of Dirac-Pauli equations</b>	<b>249</b>
<b>33</b>	The Dirac-Pauli equation .....	249

<b>34</b>	<b>A charged particle with the anomalous moments in a constant and homogeneous magnetic field .....</b>	<b>251</b>
<b>35</b>	<b>Exact solutions of the Dirac-Pauli equation for a particle in a plane electromagnetic wave field .....</b>	<b>253</b>
<b>36</b>	<b>Solution of the Dirac-Pauli equation in a plane-wave field combined with a longitudinal running electric field .....</b>	<b>258</b>
 <b>Appendix I</b>		
	<b>Exact solutions of the one-dimensional stationary Schrödinger equation .....</b>	<b>260</b>
 <b>Appendix II</b>		
	<b>Systems with quadratic Hamiltonians .....</b>	<b>289</b>
	<b>References .....</b>	<b>299</b>
	<b>Subject Index .....</b>	<b>323</b>
