

CONTENTS

Preface	vii
Introduction	ix
CHAPTER 1 Symmetries in Field Theory	1
1.1 Symmetries and Currents	1
1.2 Masses	8
1.3 Local Symmetries	9
1.4 More on Noether’s Theorem	12
Problems	13
CHAPTER 2 Leptons	14
2.1 The Electron and Its Friends	14
2.2 $SU(2) \times U(1)$	14
2.3 Renormalizability? An Interlude	18
2.4 Spontaneous Symmetry Breakdown	19
2.5 The Goldstone Theorem	21
2.6 The σ -Model	23
2.7 The Higgs Mechanism	27
2.8 Neutral Currents	31
2.9 $e^+e^- \rightarrow \mu^+\mu^-$	33
Problems	35
CHAPTER 3 Quarks and QCD	38
3.1 Color $SU(3)$	38
3.2 A Toy Model	41
3.3 Quark Doublets	45
3.4 GIM and Charm	46
3.5 The Standard Six-Quark Model	47
3.6 CP Violation	52
Problems	53

3.5	The Standard Six-Quark Model	47
3.6	<i>CP</i> Violation	52
	Problems	53
CHAPTER 4	<i>SU(3)</i> and Hadron Semileptonic Decays	54
4.1	Weak Decays of Hadrons	54
4.2	Isospin and the Determination of c_1	54
4.3	f_π	57
4.4	Strangeness Changing Currents	58
4.5	<i>PT</i> Invariance	60
4.6	Second Class Currents	61
4.7	The Goldberger-Treiman Relation	62
4.8	<i>SU(3)</i> — <i>D</i> and <i>F</i>	63
	Problems	67
CHAPTER 5	Chiral Lagrangians—Goldstone Bosons	68
5.1	$SU(3) \times SU(3) \rightarrow SU(3)$	68
5.2	Effective Low-Momentum Field Theories	69
5.3	Symmetry Breaking	72
5.4	What Happened to the Axial $U(1)$?	73
5.5	Light Quark Mass Ratios	75
5.6	The Chiral Currents	76
5.7	Semileptonic <i>K</i> Decays	78
5.8	The Chiral Symmetry-Breaking Scale	80
5.9	Important Loop Effects	82
5.10	Nonleptonic <i>K</i> Decay	83
5.11	Electromagnetic Interactions and $\pi^0 \rightarrow 2\gamma$	84
	Problems	90
CHAPTER 6	Chiral Lagrangians—Matter Fields	92
6.1	How Do the Baryons Transform?	92
6.2	A More Elegant Transformation Law	93
6.3	The Baryon Lagrangian	95
6.4	Nonlinear Chiral Quarks	96
6.5	Successes of the Nonrelativistic Quark Model	98
6.6	Hyperon Nonleptonic Decays	100
	Problems	105
CHAPTER 7	The Parton Model	106
7.1	Mode Counting	106
7.2	Heavy Quark Decay	109
7.3	Deep Inelastic Lepton-Hadron Scattering	111
7.4	Neutrino-Hadron Scattering	114
7.5	Neutral Currents	116
7.6	The SLAC Experiment	117
	Problems	117
CHAPTER 8	Loops	118
8.1	Choosing a Gauge	118

8.2	Effective Field Theories	124
8.3	The Symmetries of Strong and Electromagnetic Interactions	126
8.4	M_W and M_Z	128
8.5	The ρ Parameter	133
	Problems	135
CHAPTER 9	Nonleptonic Weak Interactions	136
9.1	Why We Can't Calculate	136
9.2	The Renormalization Group	138
9.3	Charm Decays	141
9.4	Penguins and $\Delta I = \frac{1}{2}$ Rule	144
	Problems	147
CHAPTER 10	The Neutral K Mesons and CP Violation	148
10.1	K^0 - \bar{K}^0 Mixing	148
10.2	The Box Diagram and the QCD Corrections	150
10.3	The Gilman-Wise $\Delta S = 2$ Hamiltonian	154
10.4	CP Violation and the Parameter ϵ	157
10.5	$\bar{K}_L \rightarrow \pi\pi$ and the Parameter ϵ'	159
	Problems	162
	Index	163
