Preface . . . . .	v
<b>PART I. FREE FIELDS</b>	
CHAPTER 1. INTRODUCTION . . . . .	3
1.1 Relation of Quantum and Classical Field Theory . . . . .	3
1.2 Vibrating Line of Atoms . . . . .	4
1.3 Continuous Vibrating Line . . . . .	6
CHAPTER 2. THE HARMONIC OSCILLATOR . . . . .	9
2.1 Eigenvalues of $H$ . . . . .	9
2.2 Properties of the Eigenstates of $H$ . . . . .	11
2.3 Time Dependence of Motion . . . . .	12
CHAPTER 3. COUPLED OSCILLATORS . . . . .	18
3.1 Eigenvalues of the Hamiltonian . . . . .	18
3.2 Quantum Features . . . . .	20
3.3 Dynamical Aspects . . . . .	21
CHAPTER 4. FIELDS . . . . .	23
4.1 Continuously Coupled Oscillators . . . . .	23
4.2 Derivation of Field Equations from a Lagrangian . . . . .	29
CHAPTER 5. OBSERVABLES . . . . .	34
5.1 Energy, Momentum, and Angular Momentum. . . . .	34
5.2 Parity . . . . .	40
5.3 Number of Particles and Particle Density . . . . .	41
5.4 Local Observables . . . . .	43
CHAPTER 6. STATES . . . . .	47
6.1 Vacuum and One-particle States . . . . .	47
6.2 Two-particle States . . . . .	52
6.3 Many-particle States . . . . .	55

CHAPTER 7. INTERNAL DEGREES OF FREEDOM . . . . .	58
7.1 Fields with Two Internal Degrees of Freedom . . . . .	58
7.2 Three and More Degrees of Freedom . . . . .	63
<b>PART II. SOLUBLE INTERACTIONS</b>	
CHAPTER 8. GENERAL ORIENTATION . . . . .	71
8.1 Field Equations . . . . .	71
8.2 Quantization . . . . .	75
8.3 Scattering and Wave Matrix . . . . .	78
CHAPTER 9. STATIC SOURCE . . . . .	82
9.1 Interpretation of "Static" Source . . . . .	82
9.2 Energy of the Coupled System . . . . .	84
9.3 Connection between Bare and Physical States . . . . .	86
9.4 Fluctuations of the Field . . . . .	89
9.5 Several Sources . . . . .	90
CHAPTER 10. PRODUCTION OF PARTICLES . . . . .	93
10.1 General Remarks . . . . .	93
10.2 Specific Examples . . . . .	96
CHAPTER 11. PAIR THEORY, CLASSICAL . . . . .	100
11.1 General Remarks . . . . .	100
11.2 Bound States . . . . .	104
11.3 Behavior of the Wave Matrix $\Omega$ . . . . .	106
11.4 Scattering . . . . .	109
CHAPTER 12. PAIR THEORY, QUANTUM-MECHANICAL . . . . .	112
12.1 Quantization and Commutation Relations in the Presence of a Bound State . . . . .	112
12.2 Scattering . . . . .	113
12.3 Energy Expressions in Terms of the Asymptotic Fields . . . . .	119
12.4 Virtual Particles . . . . .	122
CHAPTER 13. THE LEE MODEL: STATES WITH $Q = \pm \frac{1}{2}$ . . . . .	126
13.1 Introduction . . . . .	126
13.2 Commutation Relations and Equations of Motion . . . . .	127
13.3 Physical Nucleons. . . . .	130
13.4 Scattering States . . . . .	131
13.5 Completeness . . . . .	132
13.6 The Phase Shift . . . . .	135
CHAPTER 14. LEE MODEL: STATES WITH $Q = -\frac{3}{2}$ . . . . .	139
14.1 Scattering: Low Equation . . . . .	139
14.2 $\pi^- + n$ Scattering . . . . .	141
14.3 Low- and High-energy Behavior of $T(k)$ . . . . .	145
<b>PART III. PION PHYSICS</b>	
CHAPTER 15. INTRODUCTION . . . . .	153
15.1 The Static Model . . . . .	153
15.2 Commutation Relations and Equations of Motion . . . . .	158
15.3 Comparison with Other Models . . . . .	162

CHAPTER 16. GENERAL FEATURES OF THE STATIC MODEL . . . . .	166
16.1 Classical Treatment of Stationary Motion . . . . .	166
16.2 Classical Treatment of Scattering . . . . .	172
16.3 Quantum Aspects of the Static Model . . . . .	175
CHAPTER 17. THE GROUND STATE . . . . .	179
17.1 Exact Results . . . . .	179
17.2 Perturbation Theory . . . . .	183
17.3 Tamm-Dancoff Approximation . . . . .	184
17.4 Tomonaga Intermediate-coupling Approximation . . . . .	186
17.5 Strong-coupling Approximation . . . . .	192
17.6 Numerical Methods . . . . .	196
CHAPTER 18. PION SCATTERING . . . . .	198
18.1 Introduction . . . . .	198
18.2 The Scattering Matrix . . . . .	199
18.3 Properties of the Scattering Matrices . . . . .	201
18.4 Low- and High-energy Limits of Elastic Scattering . . . . .	203
18.5 Diagonalization of the $T$ Matrix . . . . .	204
18.6 Relation of Low Equations to Experiment . . . . .	208
18.7 Approximate Solution of the Low Equation . . . . .	210
18.8 Summary . . . . .	214
CHAPTER 19. PROPERTIES OF THE NUCLEON . . . . .	219
19.1 Expectation Value of the Field . . . . .	219
19.2 Ground-state Expectation Value of Observables . . . . .	220
19.3 Renormalization Constants and Other Parameters of the Static Model . . . . .	222
19.4 Nucleon Self-energy . . . . .	224
19.5 Charge and Current Distribution of Physical Nucleon. Magnetic Moment . . . . .	225
CHAPTER 20. ELECTROMAGNETIC PHENOMENA . . . . .	232
20.1 Contributions to Charge and Current Operators . . . . .	232
20.2 The Production Amplitude . . . . .	235
20.3 General Features of the Cross Section . . . . .	242
20.4 Comparison with Experiment . . . . .	244
20.5 Compton Scattering . . . . .	247
CHAPTER 21. NUCLEAR FORCES . . . . .	249
21.1 Introduction: Classical Calculation of Nuclear Interaction Energy . . . . .	249
21.2 Static Potential, Quantum-mechanical . . . . .	252
21.3 Comparison with Experiment . . . . .	255
21.4 Concluding Remarks . . . . .	256
Appendix . . . . .	259
List of Symbols . . . . .	263
Index . . . . .	269
