

CONTENTS

OPENING REMARKS-REPLACING THE QUANTUM PARADIGM William M. Honig, Conference Director	xiii
---	------

SECTION I

Theoretical Implications of Time-Dependent Double Resonance Neutron Interferometry J.P. Vigiér	1
Calculations in the Causal Interpretation of Quantum Mechanics C. Dewdney	19
Calculation of Amplification Processes Generated by Empty Quantum Waves F. Selleri	41
Relative Metrics and Physical Models for Non-local Particles W.M. Honig	51
A Two-Fluid Vacuum, the Photex, and the Photex-Photon Connection W.M. Honig	69
Discussion I	89

SECTION II

Summary of F. De Martini's Paper, Testing of Particle Distinguish- ability with Laser Interference Experiments W.M. Honig	97
Toward a Causal Interpretation of the Relativistic Quantum Mechanics of a Spinning Particle N. Cufaro-Petroni	99
Nonlinear Behaviour of Light at Very Low Intensities: The Photon Clump Model E. Panarella	105
Geometry-Dependent Predictions of the Quantum Potential Model for the Anomalous Photoelectric Effect A. Kyprianidis	169
EPR-Type Experiments and Enhanced Photon Detection A. Garuccio	181
Discussion II	191

SECTION III

Stochastic Optics: Wave-Particle Duality Without Particles T.W. Marshall	203
Neo-Hertzian Electromagnetism T.E. Phipps, Jr.	223
Effective Photon Hypothesis vs. Quantum Potential Theory: Theoretical Predictions and Experimental Verification E. Panarella	237
Compositeness of Photons and Its Implications P. Raychaudhuri	271
Logical Meanings in Quantum Mechanics for Axioms and for Imaginary and Transfinite Numbers and Exponentials W.M. Honig	285
The Aharonov-Bohm Effect and the Quantum Interference Phase Shift due to an Electrostatic Field G. Matteucci and G. Pozzi	297
Discussion III	307

SECTION IV

Critical Analysis of the Tests of Local Realism Versus Quantum Mechanics E. Santos	313
Physical Photons: Theory, Experiment and Implications G. Hunter and R. Wadlinger	331
The Theoretical Nature of a Photon in a Lattice Vacuum H. Aspden	345
Is the Photon Concept Really Necessary? M. Surdin	361
Beyond Quantum Mechanics Using the Subvac A.B. Datzeff	385
Discussion IV	397

SECTION V

Does Quantum Electrodynamics Explain the Observed Lamb Shift? F.J. Belinfante	407
The Quantum and Rest Frame Vacuum - Absolute Motion with Lorentz Covariance J.D. Edmonds, Jr.	421
The Double Slit Experiment and the Nonergodic Interpretation of Quantum Mechanics V. Buonomano	427
Einstein's Conception of the Ether and Its Up-To-Date Applications in the Relativistic Wave Mechanics L. Kostro	435

Discussion V	451
SECTION VI	
Concluding Remarks G. Hunter	457
Concluding Remarks F. Selleri	459
Comments H. Rymer	463
Photo	466
Conference Participants and Observers	469
Index	471
