

# CONTENTS

<i>Preface</i> .. .. .	v
<i>Notations and Conventions</i> .. .. .	1
<b>1. CLASSICAL PHYSICS</b>	
1. Newton's Laws .. .. .	5
2. Variational Formulation .. .. .	6
3. End-Point Variations .. .. .	7
4. Generalization .. .. .	9
5. The General Definition of Momentum .. .. .	11
6. Other Quantities .. .. .	14
7. Canonical Formalism .. .. .	16
8. Canonical Transformations .. .. .	17
9. Poisson Brackets .. .. .	20
10. Transformations Already Used as Canonical Transformations .. .. .	23
11. Generators Generating Themselves .. .. .	24
12. Algebraic Evaluation of Poisson Brackets .. .. .	27
13. Groups of Transformations .. .. .	28
14. The Galilean Group .. .. .	30
15. Another Example of Galilean Invariance .. .. .	34
<b>2. QUANTUM MECHANICS</b>	
16. Explicit Expressions .. .. .	39
17. Quantum Mechanics .. .. .	43
18. Handling Functional Integrals .. .. .	45
19. Explicit Form of Operators: Hermiticity .. .. .	49
20. Equation of Motion .. .. .	53
21. Equations of Motion of Operators .. .. .	57
22. Commutators and Poisson Brackets .. .. .	60
23. Beginning of Interpretation of the Formalism .. .. .	62
24. More Interpretation: Eigenstates, Eigenvalues, and Uncertainty .. .. .	68
25. Canonical Transformations .. .. .	75
26. More about Canonical Transformations .. .. .	82
27. Groups of Transformations; the Galilean Group in Quantum Mechanics .. .. .	85
28. Spin .. .. .	87
29. Momentum Representation .. .. .	94
30. Realization of Time Dependence .. .. .	98
31. Interaction Picture and Perturbation Theory .. .. .	102

32.	Stationary States and Transitions between Them .. .. .	104
33.	Schemes of Quantization .. .. .	107
34.	Variational Scheme of Quantization .. .. .	112
35.	The Method of Sources .. .. .	115

### 3. MANY IDENTICAL PARTICLES

36.	Many Identical Particles .. .. .	119
37.	Many-Particle Perturbation Theory .. .. .	123
38.	Creation and Annihilation Operators .. .. .	127
39.	Brackets, States, and Operators in Terms of Creation and Annihilation Operators .. .. .	130
40.	Number, Density, and Current of Particles .. .. .	134
41.	Creation and Annihilation Operators for Momentum States; Other Representations .. .. .	137
42.	Second Quantization .. .. .	140
43.	Second Quantized Perturbation Theory .. .. .	145
44.	Boundary Conditions for Green's Functions .. .. .	149
45.	Calculations in the Grand-Canonical Ensemble .. .. .	155
46.	An Assembly of Noninteracting Bosons or Fermions .. .. .	159
47.	Complete Green's Functions and Closing Remarks .. .. .	164

### 4. RELATIVISTIC THEORY

48.	The Lorentz Transformation .. .. .	167
49.	The Inhomogeneous Lorentz Group .. .. .	171
50.	Relativistic Notation .. .. .	175
51.	Relativistic Kinematics .. .. .	179
52.	The Local Scalar Field .. .. .	184
53.	Spin in Relativistic Theory .. .. .	188
54.	Spin-One (or Vector) Particles .. .. .	189
55.	Spin- $\frac{1}{2}$ Particles and the Spinor Field .. .. .	192
56.	Charged Spin- $\frac{1}{2}$ Particles .. .. .	198
57.	Interacting Fields and Closing Remarks .. .. .	200

<i>Subject Index</i> .. .. .	203
