
Contents

Preface	v
1. The Many-Particle Representation	1
2. Classical Fields	9
3. Field Operators	14
4. Simple Examples	18
5. The Interaction Picture	24
6. Invariant Δ -Functions	30
7. Charged Mesons	36
8. Fermions	42
9. Photons I	57
10. Photons II	64
11. Interactions	72
12. The Scattering Matrix	83
13. The S-Matrix Expansion	87
14. Feynman Graphs	94
15. Compton Scattering	105
16. Coulomb Scattering	116
17. Radiative Corrections	120
18. The Fermion Self-Energy	127
19. Vacuum Polarization	140
20. The Vertex Modification	145
21. The Anomalous Magnetic Moment of the Electron	148
22. Renormalization	151
Exercises	162
Hints for Solving Exercises	168
Appendix: The Dirac Equation	190
Bibliography	198
Index	199
