Preface	ix
List of contributors	xi
Bibliography of P. A. M. Dirac	xiii
1 Dirac in Cambridge, <i>by</i> R. J. EDEN AND J. C. POLKINGHORNE	1
2 Travels with Dirac in the Rockies, <i>by</i> J. H. VAN VLECK	7
3 'The golden age of theoretical physics': P. A. M. Dirac's scientific work from 1924 to 1933, <i>by</i> JAGDISH MEHRA	17
4 Foundation of quantum field theory, <i>by</i> RES JOST	61
5 The early history of the theory of the electron: 1897–1947, <i>by</i> A. PAIS	79
6 The Dirac equation, <i>by</i> A. S. WIGHTMAN	95
7 Fermi–Dirac statistics, <i>by</i> RUDOLPH PEIERLS	117
8 Indefinite metric in state space, <i>by</i> W. HEISENBERG	129
9 On bras and kets, <i>by</i> J. M. JAUCH	137
10 The Poisson bracket, <i>by</i> C. LANCZOS	169
11 La 'fonction' δ et les noyaux, <i>by</i> L. SCHWARTZ	179
12 On the Dirac magnetic poles, <i>by</i> EDOARDO AMALDI AND NICOLA CABIBBO	183
13 The fundamental constants and their time variation, <i>by</i> FREEMAN J. DYSON	213
14 On the time–energy uncertainty relation, <i>by</i> EUGENE P. WIGNER	237
15 The path-integral quantization of gravity, <i>by</i> ABDUS SALAM AND J. STRATHDEE	249
Index	263

Plates

An early portrait of P. A. M. Dirac	<i>frontispiece</i>
Dirac at a recent Solvay Conference	<i>facing page 7</i>
