

TABLE OF CONTENTS

Introduction, Part I

Max Planck	1
Rutherford	1
Niels Bohr	2
Einstein	3
The Adiabatic Hypothesis	4
The Principle of Correspondence	5
History of the Correspondence Principle	7
Applications of the Correspondence Principle	8
Systematic guessing	8
Classical dispersion theory	9
Ladenburg's paper	4 10
'Virtual oscillators'	11
Slater's idea	11
Bohr, Kramers and Slater	12
Kramers' dispersion theory	14
Max Born	15
Kramers and Heisenberg	16
Van Vleck	16
The sum rule of Kuhn and Thomas	18

Introduction, Part II

Werner Heisenberg	19
Born, Franck, Pauli and Heisenberg	19
Born and Jordan	20
Bohr and Heisenberg	21
The anharmonic oscillator	23
The letter to Kronig	23
'Fabricating Quantum Mechanics'	25
The final text of paper 12	27
Summary of paper 12	28
Born's reaction to Heisenberg's paper	36

Born's conjecture on $pq - qp$	36
Pauli's reaction	37
Jordan's proof and the joint paper 13	38
Analysis of the paper 13	38
Dirac's paper 14	40
The 'three men's paper' 15	42
Perturbation theory and canonical transformation	43
Transformation to Principal Axes	50
Eigenvalues and Eigenvectors	52
General commutation relations	52
Physical applications of the theory	54
The final redaction of paper 15	55
Pauli's paper 16	57
Dirac's paper 17	58

PART I TOWARDS QUANTUM MECHANICS

1 A. Einstein: <i>Zur Quantentheorie der Strahlung.</i> Physik. Z. 18 , p. 121, received March 3, 1917. First printed in Mitteilungen der Physikalischen Gesellschaft Zürich, Nr. 18, 1916.	63
2 P. Ehrenfest: <i>Adiabatic Invariants and the Theory of Quanta.</i> Phil. Mag. 33 (1917), p. 500. Abridged translation of a paper published in Verslagen Kon. Akad. Amsterdam 25 (1916), p. 412.	79
3 N. Bohr: <i>On the quantum theory of line-spectra.</i> Kgl. Danske Vid. Selsk. Skr., nat.-math. Afd., 8. Raekke IV. 1, Part I. First printed April 1918	95
4 R. Ladenburg: <i>Die quantentheoretische Zahl der Dispersionselektronen.</i> Z. f. Phys. 4 , p. 451, received Febr. 8, 1921.	139
5 N. Bohr, H. A. Kramers and J. C. Slater: <i>The quantum theory of radiation.</i> Phil. Mag. 47 , p. 785, dated Jan. 1924.	159
6 H. A. Kramers: <i>The law of dispersion and Bohr's theory of spectra.</i> Nature 133 , p. 673, dated March 25, 1924.	177
7 M. Born: <i>Über Quantenmechanik.</i> Z. Phys. 26 , p. 379, received June 13, 1924.	181
8 H. A. Kramers: <i>The quantum theory of dispersion.</i> Nature 114 , p. 310, dated July 22, 1924.	199
9 J. H. Van Vleck: <i>The absorption of radiation by multiply periodic orbits, Part I: Some extensions of the Corre-</i>	203

<i>spondence Principle.</i> Phys. Rev. 24 , p. 330, printed October 1924.	
10 H. A. Kramers und W. Heisenberg: <i>Über die Streuung von Strahlen durch Atome.</i> Z. Phys. 31 , p. 681, received Jan. 5, 1925.	223
11 W. Kuhn: <i>Über die Gesamtstärke der von einem Zustande ausgehenden Absorptionslinien.</i> Z. Phys. 33 , p. 408, received May 14, 1925.	253

PART II THE BIRTH OF QUANTUM MECHANICS

12 W. Heisenberg: <i>Über quantentheoretische Umdeutung kinematischer und mechanischer Beziehungen.</i> Z. Phys. 33 , p. 879, received July 29, 1925.	261
13 M. Born und P. Jordan: <i>Zur Quantenmechanik.</i> Z. Phys. 34 , p. 858, received Sept. 27, 1925. Abridged	277
14 P. A. M. Dirac: <i>The Fundamental Equations of Quantum Mechanics.</i> Proc. Roy. Soc. A 109 , p. 642, received Nov. 7, 1925.	307
15 M. Born, W. Heisenberg und P. Jordan: <i>Zur Quantenmechanik II.</i> Z. Phys. 35 , p. 557, received Nov. 16, 1925.	321
16 W. Pauli: <i>Über das Wasserstoffspektrum vom Standpunkt der neuen Quantenmechanik.</i> Z. Phys. 36 , p. 336, received Jan. 17, 1926.	387
17 P. A. M. Dirac: <i>Quantum Mechanics and a Preliminary Investigation of the Hydrogen Atom.</i> Proc. Roy. Soc. A 110 , p. 561, received Jan. 22, 1926.	417
