

CONTENTS

<i>Preface</i>	vii
<i>Participants</i>	ix
<i>Introduction</i>	xi
Supercomputing and Numerical Relativity: A Look at the Past, Present and Future <i>David W. Hobill & Larry L. Smarr</i>	1
Computational Relativity in Two and Three Dimensions <i>Stuart L. Shapiro & Saul A. Teukolsky</i>	18
Slowly Moving Maximally Charged Black Holes <i>Robert C. Ferrell & Douglas M. Eardley</i>	27
Kepler's Third Law in General Relativity <i>Steven Detweiler</i>	43
Black Hole Spacetimes: Testing Numerical Relativity <i>David H. Bernstein, David W. Hobill & Larry L. Smarr</i>	57
Three Dimensional Initial Data of Numerical Relativity <i>Ken-ichi Oohara & Takashi Nakamura</i>	74
Initial Data for Collisions of Black Holes and Other Gravitational Miscellany <i>James W. York, Jr.</i>	89
Analytic–Numerical Matching for Gravitational Waveform Extraction <i>Andrew M. Abrahams</i>	110
Supernovae, Gravitational Radiation, and the Quadrupole Formula <i>L. S. Finn</i>	126
Gravitational Radiation from Perturbations of Stellar Core Collapse Models <i>Edward Seidel & Thomas Moore</i>	146
General Relativistic Implicit Radiation Hydrodynamics in Polar Sliced Space-time <i>Paul J. Schinder</i>	163
General Relativistic Radiation Hydrodynamics in Spherically Symmetric Spacetimes <i>A. Mezzacappa & R. A. Matzner</i>	171
Constraint Preserving Transport for Magnetohydrodynamics <i>John F. Hawley & Charles R. Evans</i>	179

Enforcing the Momentum Constraints During Axisymmetric Spacelike Simulations <i>Charles R. Evans</i>	194
Experiences with an Adaptive Mesh Refinement Algorithm in Numerical Relativity <i>Matthew W. Choptuik</i>	206
The Multigrid Technique <i>Gregory B. Cook</i>	222
Finite Element Methods in Numerical Relativity <i>P. J. Mann</i>	230
Pseudo-Spectral Methods Applied to Gravitational Collapse <i>Silvano Bonazzola & Jean-Alain Marck</i>	239
Methods in 3D Numerical Relativity <i>Takashi Nakamura & Ken-ichi Oohara</i>	254
Nonaxisymmetric Rotating Gravitational Collapse and Gravitational Radiation <i>Richard F. Stark</i>	281
Nonaxisymmetric Neutron Star Collisions: Initial Results Using Smooth Particle Hydrodynamics <i>Christopher S. Kochanek & Charles R. Evans</i>	297
Relativistic Hydrodynamics <i>James R. Wilson & Grant J. Mathews</i>	306
Computational Dynamics of $U(1)$ Gauge Strings: Probability of Reconnection of Cosmic Strings <i>Richard A. Matzner</i>	315
Dynamically Inhomogeneous Cosmic Nucleosynthesis <i>Hannu Kurki-Suonio</i>	335
Initial Value Solutions in Planar Cosmologies <i>Peter Anninos, Joan Centrella & Richard Matzner</i>	342
An Algorithmic Overview of an Einstein Solver <i>Roger Ove</i>	355
A PDE Compiler for Full-Metric Numerical Relativity <i>Jonathan Thornburg</i>	370
Numerical Evolution on Null Cones <i>R. Gómez & J. Winicour</i>	385
Normal Modes Coupled to Gravitational Waves in a Relativistic Star <i>Yasufumi Kojima</i>	402
Cosmic Censorship and Numerical Relativity <i>Dalia S. Goldwirth, Amos Ori & Tsvi Piran</i>	414
