

## CONTENTS

Foreword . . . . .	7
--------------------	---

### P A R T I

BAŽAŃSKI, S., The problem of motion . . . . .	13
BERGMANN, P. G. and KOMAR, A. B., Status report on the quantization of the gravitational field . . . . .	31
BONDI, H., Relativity and cosmology . . . . .	47
GINZBURG, V. L., Experimental verifications of the general theory of relativity . . . . .	57
LICHNEROWICZ, A. et FOURÈS-BRUHAT, Y., Problèmes mathématiques en relativité . . . . .	73
PIRANI, F. A. E., Survey of gravitational radiation theory . . . . .	89
TONNELAT, M. A., Les espoirs et les difficultés de la théorie du champ unifié d'Einstein . . . . .	107

### P A R T II

ANDERSON, J. L., Absolute change in general relativity . . . . .	121
ARNOWITT, R. L. DESER, S. and MISNER, C. W., Canonical analysis of general relativity . . . . .	127
BAŽAŃSKI, S., The equations of motion and the action principle in general relativity . . . . .	137
BELINFANTE, F. J., Two kinds of Schrödinger equations in general relativity theory . . . . .	151
BONNOR, W. B., On Birkhoff's theorem . . . . .	167
COSTA DE BEAUREGARD, O., Une expérience macroscopique pour tester l'asymétrie du tenseur inertiel des milieux doués de spin . . . . .	171
DEWITT, B. S., Invariant commutators for the quantized gravitational field . . . . .	175
DIRAC, P. A. M., Interacting gravitational and spinor fields . . . . .	191
EHLERS, J., Relativistic hydrodynamics and its relation to interior solutions of the gravitational field equations . . . . .	201
FOCK, V., Einsteinian statics in conformal space . . . . .	209
GOLD, T., The arrow of time . . . . .	225
GOLDBERG, I., On the quantum theory of gravitation . . . . .	235
GOLDBERG, J. N., Dynamical variables and surface integrals . . . . .	241
GUPTA, S. N., Quantum theory of gravitation . . . . .	251
HAVAS, P., General relativity and the special relativistic equations of motion of point particles . . . . .	259

HOFFMANN, B., On the extension of Birkhoff's theorem to the case in which an electromagnetic field is present . . . . .	279
JORDAN, P., Empirical confirmation of Dirac's hypothesis of diminishing gravitation . . . . .	283
JORDAN, P., Remarks about the Ambarzumian's conception of prestellar matter . . . . .	289
KLEIN, O., Mach's principle and cosmology in their relation to general relativity . . . . .	293
KUNDT, W. and HOFFMANN B., Determination of gravitational standard time . . . . .	303
KUNDT, W., Note on the equivalence problem . . . . .	307
LANCZOS, C., Some properties of the Riemann-Christoffel curvature tensor	313
LAURENT, B. E., On a generally covariant quantum theory . . . . .	323
MARDER, L., Locally isometric space-times . . . . .	333
OZSVÁTH, I. and SCHÜCKING, E., An anti-Mach-metric . . . . .	339
PAPAPETROU, A. and TREDER, H., Shock waves in general relativity . .	351
PERES, A., Motion and radiation of pole particles . . . . .	361
PERES, A. and ROSEN N., Boundary conditions in general relativity theory	367
PETROV, A. Z., Invariant classification of gravitational fields . . . . .	371
PETROV, A. Z., Gravitational field geometry as the geometry of automorphisms . . . . .	379
ROSEN, G., Interpretation of Rainich geometry . . . . .	387
SACHS, R., Distance and the asymptotic behavior of waves in general relativity . . . . .	395
SCHILD, A., Conservative gravitational theories of Whitehead's type . .	409
SCIAMA, D. W., On the analogy between charge and spin in general relativity	415
SYNGE, J. L., Relativity based on chronometry . . . . .	441
TAUB, A. H., On spherically symmetric distributions of incompressible fluids . . . . .	449
TRAUTMAN, A., On the propagation of information by waves . . . . .	459
TULCZYJEW, B. and TULCZYJEW, W., On multipole formalism in general relativity . . . . .	465
