

Contents

A. ARMENTI and P. HAVAS	
A class of exact solutions for the motion of a particle in a monopole-prolate quadrupole field	1
N. L. BALAZS	
Does a gravitational field influence chemical equilibria? . . .	17
P. G. BERGMANN	
Status of canonical quantization	23
A. BERS, R. FOX, C. G. KUPER and S. G. LIPSON	
The impossibility of free tachyons	41
J. BIČÁK	
Selected topics in the problem of energy and radiation . . .	47
M. CARMELI	
Applications of SU (2) technique in general relativity . . .	69
C. CATTANEO	
On the energy tensor of a perfect fluid	77
Y. CHOQUET-BRUHAT	
Approximate radiative solutions of Einstein–Maxwell equations	81
J. M. COHEN	
The rotating Einstein–Rosen bridge	87
M. D. COHEN and J. M. COHEN	
Distribution theory and thin shells in general relativity . . .	99
M. CRAMPIN and F. A. E. PIRANI	
Twistors, symplectic structure and Lagrange’s identity . . .	105
B. K. DATTA	
Static electromagnetic fields in general relativity	111

S. DESER and J. HIGBIE	
Gravitational–scalar field coupling	123
J. EHLERS	
Kinetic theory of gases in general relativity	145
D. FEINBLUM	
A new technique for the analysis of singularities	155
D. FINKELSTEIN	
Quantum space-time and general relativity	159
R. FOX and J. SHAMIR	
New experimental tests of relativity	163
B. GAL-OR	
On the possibility of cosmological foundations for classical and relativistic thermodynamics	173
I. GOLDBERG	
Gauge invariance and observer dependence	177
J. N. GOLDBERG	
Equations of motion in general relativity	189
L. HALPERN	
Modification of the classical gravitational field equations due to a virtual quantized matter field	195
A. INOMATA	
Neutrinos in Rainich geometry	199
R. KERNER	
Approximate solutions of Einstein’s equations	205
G. KNAPECZ	
Third principle of relativity	213
J. KULHANEK and G. SZAMOSI	
Cosmological models with non-zero pressure	221
E. LUBKIN	
Analogues of the Landau–Lifshitz pseudotensor	225
R. S. MISHRA	
Classification of space-time curvature tensor	239

R. M. MISRA and U. NARAIN	
A new solution of the field equations with perfect fluid	. . . 253
Y. NE'EMAN and Y. ACHIMAN	
Cosmological implications of the microscopic CP violation	. . . 259
J. PACHNER	
Some notes on cosmology 265
A. PERES	
Invariant evolution of gravitational field 269
S. J. PROKHOVNIK	
A cosmological theory of gravitation 275
D. W. SCIAMA	
The recent renaissance of observational cosmology 283
P. SZEKERES	
Gravitational fields in matter 305
J. WEBER	
Gravitational radiation experiments 309
P. J. WESTERVELT	
Light propagation in a time dependent gravitational field 323
