

## CONTENTS

CHAPTER 1. THE PRINCIPLE OF RELATIVITY . . . . .	1
1-1 Velocity of propagation of interaction . . . . .	1
1-2 Intervals . . . . .	4
1-3 Proper time . . . . .	9
1-4 The Lorentz transformation . . . . .	11
1-5 Transformation of velocities . . . . .	15
1-6 Four-vectors . . . . .	17
1-7 Four-dimensional velocity and acceleration . . . . .	22
CHAPTER 2. RELATIVISTIC MECHANICS . . . . .	24
2-1 Elementary particles in the theory of relativity . . . . .	24
2-2 The principle of least action . . . . .	25
2-3 Energy and momentum . . . . .	27
2-4 Mass defect . . . . .	32
2-5 Collisions . . . . .	33
2-6 Angular momentum . . . . .	37
CHAPTER 3. CHARGES IN FIELDS. . . . .	41
3-1 Four-potential of a field . . . . .	41
3-2 Equations of motion of a charge in a field . . . . .	44
3-3 The isotropy of time . . . . .	46
3-4 Gauge invariance . . . . .	47
3-5 Constant electromagnetic field . . . . .	48
3-6 Motion in a constant uniform electric field . . . . .	50
3-7 Motion in a constant uniform magnetic field . . . . .	52
3-8 Motion of a charge in constant uniform electric and magnetic fields	54
3-9 The electromagnetic field tensor . . . . .	56
3-10 Lorentz transformation of the field . . . . .	60
3-11 Invariants of the field . . . . .	62
CHAPTER 4. THE FIELD EQUATIONS . . . . .	66
4-1 The first pair of Maxwell's equations . . . . .	66
4-2 The action function of the electromagnetic field . . . . .	67
4-3 The four-dimensional current vector . . . . .	70
4-4 The equation of continuity . . . . .	73
4-5 The second pair of Maxwell equations . . . . .	75
4-6 Energy density and Poynting vector . . . . .	78
4-7 The energy-momentum tensor . . . . .	80
4-8 Energy-momentum tensor of the electromagnetic field . . . . .	84
4-9 The virial theorem . . . . .	89
4-10 The energy-momentum tensor for macroscopic bodies . . . . .	91

CHAPTER 5. CONSTANT FIELDS . . . . .	94
5-1 Coulomb's law . . . . .	94
5-2 Electrostatic energy of charges . . . . .	95
5-3 The field of a uniformly moving charge . . . . .	97
5-4 Motion in the Coulomb field . . . . .	100
5-5 The dipole moment . . . . .	103
5-6 Multiple moments . . . . .	104
5-7 System of charges in an external field . . . . .	106
5-8 Constant magnetic field . . . . .	107
5-9 Magnetic moments . . . . .	109
CHAPTER 6. ELECTROMAGNETIC WAVES . . . . .	114
6-1 D'Alembert's equation . . . . .	114
6-2 Plane waves . . . . .	115
6-3 Monochromatic plane waves . . . . .	118
6-4 The Doppler effect . . . . .	121
6-5 Polarization . . . . .	122
6-6 Spectral resolution . . . . .	123
6-7 Partially polarized light . . . . .	126
6-8 The Fourier resolution of the electrostatic field . . . . .	129
6-9 Characteristic vibrations of the field . . . . .	130
CHAPTER 7. THE PROPAGATION OF LIGHT . . . . .	136
7-1 Geometrical optics . . . . .	136
7-2 Intensity . . . . .	140
7-3 The angular eikonal . . . . .	142
7-4 Narrow bundles of rays . . . . .	145
7-5 Image formation with broad bundles of rays . . . . .	150
7-6 The limits of geometrical optics . . . . .	152
7-7 Diffraction . . . . .	155
7-8 Fresnel diffraction . . . . .	161
7-9 Fraunhofer diffraction . . . . .	165
CHAPTER 8. THE FIELD OF MOVING CHARGES . . . . .	171
8-1 The retarded potentials . . . . .	171
8-2 The Lienard-Wiechert potentials . . . . .	174
8-3 Spectral resolution of the retarded potentials . . . . .	177
8-4 The Lagrangian to terms of second order . . . . .	180
CHAPTER 9. RADIATION OF ELECTROMAGNETIC WAVES . . . . .	186
9-1 The field of a system of charges at large distances . . . . .	186
9-2 Dipole radiation . . . . .	190
9-3 Radiation during collisions . . . . .	193
9-4 Radiation in the case of Coulomb interaction . . . . .	197

CONTENTS

ix

9-5	Quadruple and magnetic dipole radiation . . . . .	204
9-6	The field of the radiation at near distances . . . . .	207
9-7	Radiation from a rapidly moving charge . . . . .	210
9-8	Radiation from a charge moving uniformly in a circle . . . . .	213
9-9	Radiation damping . . . . .	218
9-10	Spectral resolution of the radiation in the ultrarelativistic case . . . . .	227
9-11	Scattering by free charges . . . . .	231
9-12	Scattering of low-frequency waves . . . . .	237
9-13	Scattering of high-frequency waves . . . . .	239
CHAPTER 10. PARTICLE IN A GRAVITATIONAL FIELD . . . . .		244
10-1	Gravitational fields in nonrelativistic mechanics . . . . .	244
10-2	The gravitational field in relativistic mechanics . . . . .	246
10-3	Curvilinear coordinates . . . . .	249
10-4	Distances and time intervals . . . . .	256
10-5	Covariant differentiation . . . . .	260
10-6	The relation of the Christoffel symbols to the metric tensor . . . . .	265
10-7	Motion of a particle in a gravitational field . . . . .	268
10-8	Limiting transition . . . . .	271
10-9	The equations of electrodynamics in the presence of a gravitational field . . . . .	272
10-10	The constant gravitational field . . . . .	274
10-11	Rotation . . . . .	281
CHAPTER 11. THE GRAVITATIONAL FIELD EQUATIONS . . . . .		283
11-1	The curvature tensor . . . . .	283
11-2	Properties of the curvature tensor . . . . .	286
11-3	The action function for the gravitational field . . . . .	289
11-4	The energy-momentum tensor . . . . .	293
11-5	The gravitational field equations . . . . .	296
11-6	Newton's law . . . . .	301
11-7	The centrally symmetric gravitational field . . . . .	304
11-8	Motion in a centrally symmetric gravitational field . . . . .	312
11-9	The energy-momentum pseudotensor . . . . .	316
11-10	Gravitational waves . . . . .	323
11-11	Weak gravitational fields . . . . .	326
11-12	Radiation of gravitational waves . . . . .	329
11-13	Isotropic space . . . . .	332
11-14	Space-time metric in the closed isotropic model . . . . .	336
11-15	Space-time metric for the open isotropic model . . . . .	340
11-16	The propagation of light . . . . .	344
